

CHINA IS ABLE TO SEE FUTURE

War in Southern Part Cited as Proof of Her Awakening.

HOPE IN ARMS MEET

WASHINGTON, Oct. 15.—The uprising in South China is "proof that China is awakening to her possibilities," Feng Hui Huang, secretary to the Chinese delegation to the armistice and Far East conference, declared today.

"This war has the appearance of a rebellion of purely military caliber, but as a matter of fact it is merely political warfare," said Huang. "Since the century, ignored by the great powers, except to be exploited by them, despotic and oligarchic in government for decades unnumbered, China now raises its head and has something to say."

"True, this particular disturbance is internal and would suggest to the outsider serious disquiet within China. But to us, it means the Chinese people have begun to take an interest in their government. The desire of the provinces of Huai and Hunan to be granted independence presages the birth of a spirit of independence that, far from being detrimental to China's aims, is admirably suited to her aims. It is China's wish to see the people of the provinces have a voice and that having it they may speak and be heard."

"Not that the revolt of Hunan and Huai provinces and the reported invasion of North China by an army headed by Dr. Sun Yat Sen is in any way discounted," Huang hastened to make assurance, and continued, "rather is this revolt looked upon as a springing to the surface of a century old desire on the part of the people to be given a voice in their government. And where they point out dissatisfaction, they will receive delectation. North China, upon this spirit of independence, now finding outlet in a somewhat noisy fashion. It is from such discontent as this that the nations of the Americans have built up their power and their greatness."

Huang pointed out that the original thirteen colonies often came to blows with their neighboring colonies, but they united to battle the common foe.

"In this wise will China rise," Huang stated.

YOUTH IS HELD IN ATTEMPT AT JAIL DELIVERY

(Continued From Page One.)

said to have been offered him to get a weapon and saws to Clint Simms, alias Shaw, alleged leader of the bank robbers gang, was too much for Nelson and he lowered the rope from the jail the next morning when his time is up he will be rearrested on the charge of aiding prisoners to escape. The sheriff had been in hiding and had watched Nelson lower the rope.

Nelson was found guilty of petit larceny and fined \$1 and costs and sentenced to serve thirty days in jail. Nelson was working as a waiter in the prisoners' dining room on the third floor of the jail and this privilege gave him the opportunity to lower the rope through the window.

When examined the pistol was found to contain nine steel nosed bullets, one in the firing chamber and eight in the magazine. The six saws were blue steel hacks that would cut through even the hardest steel bars of the jail. McKinley, the man caught after he left the saws in the rope, has been arrested three times, twice for vagrancy and once for vehicle taking and served sixty days in jail some time ago.

He admitted he twice visited Simms at the jail since that man's arrest, and McKinley claimed that he knew no other prisoners in the jail but Simms. He admitted that 5:10 a. m. was the time he was to have appeared to let the weapon and saws to the rope, but that he was fifteen minutes late.

The three alleged bank robbers who have been identified by a number of persons as the men who took part in the Beech Grove State Bank robbery, are Clint Simms, alias Shaw, 26, 468 Division street; George Miller, 24, 547 North Oakland avenue, and Glenn Stout, 26, 140 South Fleming avenue.

Simms, who is alleged to have been the driver of the hand truck that remained in front of the bank with the motor running while two white men and a man who was either a negro or a white man, took the money, entered the bank and held up the employees, escaping with money and bonds amounting to \$24,400.

Miller, Simms and Stout have been indicted and are scheduled to be arraigned in Criminal Court today. The detectives advance the theory that had one of the three alleged robbers obtained possession of the automatic pistol that they would have made an attempt to escape from the jail. Stout is alleged to have been taken from the jail to Criminal Court.

The same gang have been identified as the men who held up and robbed the Pligsky Wiggy grocery store and escaped with about \$1,100 about a week before the Beech Grove robbery. Simms, Miller and Stout were arrested Sept. 28. They are charged with robbery and grand larceny.

Sheriff Snyder has Miller locked up in the "bum row," as the row of cells on the first floor in the north wing of the jail is known. Simms and Stout are prisoners in Federal row, the second-floor cell room in the north wing of the jail is called.

On Monday when General Pershing lays the congressional medal upon the grave of English "unknown warrior," both countries will feel more clearly than ever before the blood relationship and traditions existing between them.

The Daily Telegram commented as follows: "We recognize in the decision of the American Government to do homage to the unknown British soldier a tribute to the spirit of the allied armies. It is recognition of brotherhood in service and sacrifice."

"It would be fortunate for all the world if, when General Pershing enters the nave of Westminster Abbey, our country and the United States could say, 'This service in the abbey makes us one.'"

LONDON PAPERS WELL DISPOSED

Express Cordial Feelings for America.

LONDON, Oct. 15.—"Englishmen who worked with Americans by land and by sea during the great war will always have a feeling of comradeship for them," said a London paper in commenting upon the forthcoming visit of General Pershing.

"On Monday when General Pershing lays the congressional medal upon the grave of English 'unknown warrior,' both countries will feel more clearly than ever before the blood relationship and traditions existing between them."

The Daily Telegram commented as follows: "We recognize in the decision of the American Government to do homage to the unknown British soldier a tribute to the spirit of the allied armies. It is recognition of brotherhood in service and sacrifice."

"It would be fortunate for all the world if, when General Pershing enters the nave of Westminster Abbey, our country and the United States could say, 'This service in the abbey makes us one.'"

DENIES TAXI DRIVERS' REQUEST. Judge Arthur E. Robinson today refused to issue a temporary order which was requested by independent taxicab drivers incorporated under the name of the Green Line, and which would have restricted the Indianapolis police from enforcing an ordinance requiring taxicabs not operated from a central point to be equipped with a taximeter and also to have the letters of the names of the drivers prominently displayed on the roof. Arguments were heard last week.

LOWER FREIGHT RATES URGED BY TRAFFIC GROUP

Freight Committee of State C. of C. Would Kill National Agreement.

A resolution urging lower freight rates, and taking up other features of the railroad situation, was adopted at a meeting of the freight and traffic committee of the Indiana State Chamber of Commerce, yesterday at headquarters of the Indiana State Chamber of Commerce in this city.

The resolution is as follows: "Whereas, There is at this time a very general depression in practically all lines of commerce, and the freight and traffic committee of the Indiana State Chamber of Commerce, yesterday at headquarters of the Indiana State Chamber of Commerce in this city.

"Whereas, The price of farm and other products has declined to practically the pre-war basis, while the price of transportation and of wages paid to transport employees has remained practically at their highest level known to history, and that the price of transportation and the wages of railroad employees do not bear their proper relation to prices of all other commodities and wages paid to other similar classes of labor.

"Whereas, The wages paid to transportation employees, together with the so-called national agreements—warming measures—are largely responsible for the present high level of freight rates, which has materially decreased in a large measure tonnage which the carriers move, and consequently the carriers' revenue.

"Resolved, That the freight and traffic committee of the Indiana State Chamber of Commerce that it urge the carriers to reduce freight rates to a horizontal reduction in all freight rates, and especially on coal, building material, and other commodities, which are moving in large quantities today, due to the fact that the freight rates applicable thereto produce charges more than such traffic will bear.

"Resolved, That it recommend that the railway executives demand the abrogation immediately of the so-called national agreements, and that they direct with their employees to bring about a proper readjustment of railway wages.

"Resolved, That a copy of these resolutions be sent to the chairman of the Association of Railway Executives, Committee of the Interstate Commerce Commission, and to the chairman of the Senate Committee in charge of Interstate Commerce."

Resolved, That a copy of these resolutions be sent to the chairman of the Senate Committee in charge of Interstate Commerce, and to the chairman of the Senate Committee in charge of Interstate Commerce."

Resolved, That a copy of these resolutions be sent to the chairman of the Senate Committee in charge of Interstate Commerce, and to the chairman of the Senate Committee in charge of Interstate Commerce."

TO HOLD THEIR STATE COUNCIL

Sessions to Open Tuesday and Parade Will Occur in Evening.

ELECTION OF INTEREST

Red Men of Indiana have their eyes upon the annual Great Council which will be held in Indianapolis next Tuesday and Wednesday, the annual election of officers being one of the chief points of interest. John E. Seabrook, of Martinsville, great senior sagamore of the improved Order of Red Men in the United States, will be one of the speakers at the council. About 1,400 representatives of Red Men from all over the State are expected to be present.

Present State officers, known as great chiefs are great sachem, F. E. Mabec, Connersville, great senior sagamore, T. C. O'Connor, Evansville, great junior sagamore, James Stockdale, New Albany; great prophet, W. H. Elchorn, Bluffton; great chief of records, Arch Hobbs, Muncie, and great keeper of wampum, Miles Cox, Rushville.

The election will be held at the Tuesday session. Candidates for the various offices are as follows: Great sachem, Mr. O'Connor; great senior sagamore, Mr. Stockdale; great junior sagamore, Mr. O'Connor; great prophet, S. L. Smith of South Bend, Charles Dill of Muncie and John Price of Mohawk; great prophet, Mr. Mabec; great chief of records, Mr. Hobbs; great keeper of wampum, Ralph S. Baker of Sheridan, Charles M. Cohee of Frankfort and John H. Boyd of Franklin, and great trustee, Gus O. Knapp of Evansville and E. C. Seabrook of New Albany.

A large class of pale faces will be initiated in Tomlinson Hall Tuesday, the degree being conferred by three prize-winning teams, as follows: Washington Tribe No. 419, adoption degree; William Tribe No. 139, warrior's degree; and Minola Tribe No. 86, chief's degree.

Proceeding the degree work there will be a social hour through downtown streets. The first division of the parade will form on the west side of Meridian from North to South. The second division will form on the east side of Meridian from North to South. The third division will form on the west side of Meridian from North to South. The fourth division will form on the east side of Meridian from North to South. The fifth division will form on the west side of Meridian from North to South. The sixth division will form on the east side of Meridian from North to South. The seventh division will form on the west side of Meridian from North to South. The eighth division will form on the east side of Meridian from North to South. The ninth division will form on the west side of Meridian from North to South. The tenth division will form on the east side of Meridian from North to South. The eleventh division will form on the west side of Meridian from North to South. The twelfth division will form on the east side of Meridian from North to South. The thirteenth division will form on the west side of Meridian from North to South. The fourteenth division will form on the east side of Meridian from North to South. The fifteenth division will form on the west side of Meridian from North to South. The sixteenth division will form on the east side of Meridian from North to South. The seventeenth division will form on the west side of Meridian from North to South. The eighteenth division will form on the east side of Meridian from North to South. The nineteenth division will form on the west side of Meridian from North to South. The twentieth division will form on the east side of Meridian from North to South. The twenty-first division will form on the west side of Meridian from North to South. The twenty-second division will form on the east side of Meridian from North to South. The twenty-third division will form on the west side of Meridian from North to South. The twenty-fourth division will form on the east side of Meridian from North to South. The twenty-fifth division will form on the west side of Meridian from North to South. The twenty-sixth division will form on the east side of Meridian from North to South. The twenty-seventh division will form on the west side of Meridian from North to South. The twenty-eighth division will form on the east side of Meridian from North to South. The twenty-ninth division will form on the west side of Meridian from North to South. The thirtieth division will form on the east side of Meridian from North to South. The thirty-first division will form on the west side of Meridian from North to South. The thirty-second division will form on the east side of Meridian from North to South. The thirty-third division will form on the west side of Meridian from North to South. The thirty-fourth division will form on the east side of Meridian from North to South. The thirty-fifth division will form on the west side of Meridian from North to South. The thirty-sixth division will form on the east side of Meridian from North to South. The thirty-seventh division will form on the west side of Meridian from North to South. The thirty-eighth division will form on the east side of Meridian from North to South. The thirty-ninth division will form on the west side of Meridian from North to South. The fortieth division will form on the east side of Meridian from North to South. The forty-first division will form on the west side of Meridian from North to South. The forty-second division will form on the east side of Meridian from North to South. The forty-third division will form on the west side of Meridian from North to South. The forty-fourth division will form on the east side of Meridian from North to South. The forty-fifth division will form on the west side of Meridian from North to South. The forty-sixth division will form on the east side of Meridian from North to South. The forty-seventh division will form on the west side of Meridian from North to South. The forty-eighth division will form on the east side of Meridian from North to South. The forty-ninth division will form on the west side of Meridian from North to South. The fiftieth division will form on the east side of Meridian from North to South. The fifty-first division will form on the west side of Meridian from North to South. The fifty-second division will form on the east side of Meridian from North to South. The fifty-third division will form on the west side of Meridian from North to South. The fifty-fourth division will form on the east side of Meridian from North to South. The fifty-fifth division will form on the west side of Meridian from North to South. The fifty-sixth division will form on the east side of Meridian from North to South. The fifty-seventh division will form on the west side of Meridian from North to South. The fifty-eighth division will form on the east side of Meridian from North to South. The fifty-ninth division will form on the west side of Meridian from North to South. The sixtieth division will form on the east side of Meridian from North to South. The sixty-first division will form on the west side of Meridian from North to South. The sixty-second division will form on the east side of Meridian from North to South. The sixty-third division will form on the west side of Meridian from North to South. The sixty-fourth division will form on the east side of Meridian from North to South. The sixty-fifth division will form on the west side of Meridian from North to South. The sixty-sixth division will form on the east side of Meridian from North to South. The sixty-seventh division will form on the west side of Meridian from North to South. The sixty-eighth division will form on the east side of Meridian from North to South. The sixty-ninth division will form on the west side of Meridian from North to South. The seventieth division will form on the east side of Meridian from North to South. The seventy-first division will form on the west side of Meridian from North to South. The seventy-second division will form on the east side of Meridian from North to South. The seventy-third division will form on the west side of Meridian from North to South. The seventy-fourth division will form on the east side of Meridian from North to South. The seventy-fifth division will form on the west side of Meridian from North to South. The seventy-sixth division will form on the east side of Meridian from North to South. The seventy-seventh division will form on the west side of Meridian from North to South. The seventy-eighth division will form on the east side of Meridian from North to South. The seventy-ninth division will form on the west side of Meridian from North to South. The eightieth division will form on the east side of Meridian from North to South. The eighty-first division will form on the west side of Meridian from North to South. The eighty-second division will form on the east side of Meridian from North to South. The eighty-third division will form on the west side of Meridian from North to South. The eighty-fourth division will form on the east side of Meridian from North to South. The eighty-fifth division will form on the west side of Meridian from North to South. The eighty-sixth division will form on the east side of Meridian from North to South. The eighty-seventh division will form on the west side of Meridian from North to South. The eighty-eighth division will form on the east side of Meridian from North to South. The eighty-ninth division will form on the west side of Meridian from North to South. The ninetieth division will form on the east side of Meridian from North to South. The ninety-first division will form on the west side of Meridian from North to South. The ninety-second division will form on the east side of Meridian from North to South. The ninety-third division will form on the west side of Meridian from North to South. The ninety-fourth division will form on the east side of Meridian from North to South. The ninety-fifth division will form on the west side of Meridian from North to South. The ninety-sixth division will form on the east side of Meridian from North to South. The ninety-seventh division will form on the west side of Meridian from North to South. The ninety-eighth division will form on the east side of Meridian from North to South. The ninety-ninth division will form on the west side of Meridian from North to South. The hundredth division will form on the east side of Meridian from North to South. The hundred-first division will form on the west side of Meridian from North to South. The hundred-second division will form on the east side of Meridian from North to South. The hundred-third division will form on the west side of Meridian from North to South. The hundred-fourth division will form on the east side of Meridian from North to South. The hundred-fifth division will form on the west side of Meridian from North to South. The two hundred-thirty-eighth division will form on the east side of Meridian from North to South. The two hundred-thirty-ninth division will form on the west side of Meridian from North to South. The two hundred-fortieth division will form on the east side of Meridian from North to South. The two hundred-forty-first division will form on the west side of Meridian from North to South. The two hundred-forty-second division will form on the east side of Meridian from North to South. The two hundred-forty-third division will form on the west side of Meridian from North to South. The two hundred-forty-fourth division will form on the east side of Meridian from North to South. The two hundred-forty-fifth division will form on the west side of Meridian from North to South. The two hundred-forty-sixth division will form on the east side of Meridian from North to South. The two hundred-forty-seventh division will form on the west side of Meridian from North to South. The two hundred-forty-eighth division will form on the east side of Meridian from North to South. The two hundred-forty-ninth division will form on the west side of Meridian from North to South. The two hundred-fiftieth division will form on the east side of Meridian from North to South. The two hundred-fifty-first division will form on the west side of Meridian from North to South. The two hundred-fifty-second division will form on the east side of Meridian from North to South. The two hundred-fifty-third division will form on the west side of Meridian from North to South. The two hundred-fifty-fourth division will form on the east side of Meridian from North to South. The two hundred-fifty-fifth division will form on the west side of Meridian from North to South. The two hundred-fifty-sixth division will form on the east side of Meridian from North to South. The two hundred-fifty-seventh division will form on the west side of Meridian from North to South. The two hundred-fifty-eighth division will form on the east side of Meridian from North to South. The two hundred-fifty-ninth division will form on the west side of Meridian from North to South. The two hundred-sixtieth division will form on the east side of Meridian from North to South. The two hundred-sixty-first division will form on the west side of Meridian from North to South. The two hundred-sixty-second division will form on the east side of Meridian from North to South. The two hundred-sixty-third division will form on the west side of Meridian from North to South. The two hundred-sixty-fourth division will form on the east side of Meridian from North to South. The two hundred-sixty-fifth division will form on the west side of Meridian from North to South. The two hundred-sixty-sixth division will form on the east side of Meridian from North to South. The two hundred-sixty-seventh division will form on the west side of Meridian from North to South. The two hundred-sixty-eighth division will form on the east side of Meridian from North to South. The two hundred-sixty-ninth division will form on the west side of Meridian from North to South. The two hundred-seventieth division will form on the east side of Meridian from North to South. The two hundred-seventy-first division will form on the west side of Meridian from North to South. The two hundred-seventy-second division will form on the east side of Meridian from North to South. The two hundred-seventy-third division will form on the west side of Meridian from North to South. The two hundred-seventy-fourth division will form on the east side of Meridian from North to South. The two hundred-seventy-fifth division will form on the west side of Meridian from North to South. The two hundred-seventy-sixth division will form on the east side of Meridian from North to South. The two hundred-seventy-seventh division will form on the west side of Meridian from North to South. The two hundred-seventy-eighth division will form on the east side of Meridian from North to South. The two hundred-seventy-ninth division will form on the west side of Meridian from North to South. The two hundred-eightieth division will form on the east side of Meridian from North to South. The two hundred-eighty-first division will form on the west side of Meridian from North to South. The two hundred-eighty-second division will form on the east side of Meridian from North to South. The two hundred-eighty-third division will form on the west side of Meridian from North to South. The two hundred-eighty-fourth division will form on the east side of Meridian from North to South. The two hundred-eighty-fifth division will form on the west side of Meridian from North to South. The two hundred-eighty-sixth division will form on the east side of Meridian from North to South. The two hundred-eighty-seventh division will form on the west side of Meridian from North to South. The two hundred-eighty-eighth division will form on the east side of Meridian from North to South. The two hundred-eighty-ninth division will form on the west side of Meridian from North to South. The two hundred-ninetyth division will form on the east side of Meridian from North to South. The two hundred-ninety-first division will form on the west side of Meridian from North to South. The two hundred-ninety-second division will form on the east side of Meridian from North to South. The two hundred-ninety-third division will form on the west side of Meridian from North to South. The two hundred-ninety-fourth division will form on the east side of Meridian from North to South. The two hundred-ninety-fifth division will form on the west side of Meridian from North to South. The two hundred-ninety-sixth division will form on the east side of Meridian from North to South. The two hundred-ninety-seventh division will form on the west side of Meridian from North to South. The two hundred-ninety-eighth division will form on the east side of Meridian from North to South. The two hundred-ninety-ninth division will form on the west side of Meridian from North to South. The two hundredth division will form on the east side of Meridian from North to South. The two hundred-first division will form on the west side of Meridian from North to South. The two hundred-second division will form on the east side of Meridian from North to South. The two hundred-third division will form on the west side of Meridian from North to South. The two hundred-fourth division will form on the east side of Meridian from North to South. The two hundred-fifth division will form on the west side of Meridian from North to South. The two hundred-sixth division will form on the east side of Meridian from North to South. The two hundred-seventh division will form on the west side of Meridian from North to South. The two hundred-eighth division will form on the east side of Meridian from North to South. The two hundred-ninth division will form on the west side of Meridian from North to South. The two hundred-tenth division will form on the east side of Meridian from North to South. The two hundred-eleventh division will form on the west side of Meridian from North to South. The two hundred-twelfth division will form on the east side of Meridian from North to South. The two hundred-thirteenth division will form on the west side of Meridian from North to South. The two hundred-fourteenth division will form on the east side of Meridian from North to South. The two hundred-fifteenth division will form on the west side of Meridian from North to South. The two hundred-sixteenth division will form on the east side of Meridian from North to South. The two hundred-seventeenth division will form on the west side of Meridian from North to South. The two hundred-eighteenth division will form on the east side of Meridian from North to South. The two hundred-nineteenth division will form on the west side of Meridian from North to South. The two hundred-twentieth division will form on the east side of Meridian from North to South. The two hundred-twenty-first division will form on the west side of Meridian from North to South. The two hundred-twenty-second division will form on the east side of Meridian from North to South. The two hundred-twenty-third division will form on the west side of Meridian from North to South. The two hundred-twenty-fourth division will form on the east side of Meridian from North to South.
