

PUTS MOTOR FUEL PLAN UP TO CONGRESS

Henry Ford Suggests Use of Alcohol to Supplant Gasoline.

CORN MARKET IN VIEW

DETROIT, Mich., Jan. 30.—Henry Ford today authorized the Detroit Times to telegraph to the members of Congress his suggestion that they give their immediate attention to the vital question of the future supply of fuels for use in combustion engines, principally automobile motors.

In an interview, Ford said that at such a time as the country has millions of bushels of corn on hand and with no prospect of a market for the produce, Congress should turn its attention to the manufacture of commercial alcohol.

WOULD SUPPLANT GASOLINE WITH ALCOHOL

"With 500 millions of bushels of corn in the hands of the farmers, and with the country stocked with food enough to last for the next five years, I suggest to Congress that manufacturing plants be established about the country for the manufacture of alcohol, and take the place of the fast diminishing supply of gasoline," he said.

"Congress is in a position to pass the necessary legislation to permit of the establishment of these manufacturing points and I take this means of citing to our Senators and Congressmen a grave situation."

"A manufacture of commercial alcohol would have at least two results, which would make it worth while," said Mr. Ford. "First, it would create a substitute for shale oil products, which, when they are exhausted, will not be created again until the earth experiences another upheaval, if ever; and, second, it will create a market for the farmer, whose corn is now a drag on the market."

TYPE OF ALCOHOL

"It is my desire that this situation be brought to the attention of members of Congress. In event of action on their part, I will be pleased to offer them the use of my laboratory, together with any suggestions I may have relative to the manufacture of commercial alcohol."

The possibility that the present prohibition law might delay the establishment of such commercial alcohol plants was suggested to Mr. Ford, but his reply was that the introduction of a dash of kerosene into the alcohol would kill any use it might have as a beverage.

WASHINGTON, Jan. 30.—If enough

REPUBLICANS TO PUSH PASSAGE OF DEBT BILL

Limit Debate on Measure to Twenty Minutes Today.

WASHINGTON, Jan. 30.—Enough

Senators are able to dig themselves out of their snowbound residences, Republi-

cans leaders hope to secure the passage

of the bill by unanimous consent

of the Senate who are majoring in the

department of history. Its aim is to

bring to the college each month some

prominent speaker.

Despite the latitude for discussion al-

lowed by the agreement, both sides share

the expectation that the bill will be

passed not later than tomorrow as agreed

to in a conference of ranking members

of the Senate Committee and House Ways

and Means Committees.

Senate approval was given by both

chambers.

Although conceding that the bill soon

will become a law, Democratic leaders

are continuing their preparations to at-

attack its constitutionality in court on the

grounds that it fails to provide that

whatever agreements are made by the

commission created by it for the con-

version or refunding of the foreign debt

is to be submitted to the Senate for its

approval.

The contention of the Democrats that

such agreements would be "binding

upon the government" is denied by

the Republicans.
