

# Indiana Daily Times

INDIANAPOLIS, INDIANA.

Daily Except Sunday, 25-29 South Meridian Street.

Telephone—MA in 3500.

MEMBERS OF AUDIT BUREAU OF CIRCULATIONS.

Advertising offices: New York, Boston, Payne, Burns & Smith, Inc. Chicago, Detroit, St. Louis, G. Logan Payne Co.

Subscription Rates: Indianapolis, 10c per week; elsewhere, 12c per week.

Entered as Second Class Matter, July 25, 1914, at Postoffice, Indianapolis, Ind., under act March 3, 1879.

BIRTH control or not, a full house beats a pair.

THOSE DOGS Conan Doyle says are in heaven probably are Skye terriers.

A BOY who, at 19, has served in three prisons, is qualifying for a lifetime job.

IT BEGINS to look as if the veterans who kept their insurance will collect before they get their bonus.

IF THOSE municipal automobiles are locked up over the primary some people would be interested in knowing who carries the garage key.

A SIDELIGHT on President Harding's leadership is the fact bets are being placed in Washington on whether he will veto the bonus bill if it ever reaches him.

ATTORNEY GENERAL Daugherty also may have to ask for the expulsion of Congressman Johnston, if the latter keeps on talking about the Department of Justice.

IF AUGUST PROBST, the young Swiss butler, had fallen in love with an ordinary American girl and not a member of "society," he probably would not have been ordered deported.

MR. BEVERIDGE is delightfully inconsistent at times. He enumerates a long list of evils from which the country is suffering and then tells the folk he is going to support President Harding.

AT THE start of the campaign President Harding announced he would maintain a hands-off policy in the Indiana primary contest, yet we are assured by Senator New's favorite newspaper that the Senator "has the hearty indorsement both of the President and his fellowworkers."

## Senator New and the Future

Senator New, in an address to the Republican voters of Gary, claimed credit for having been part of an Administration that is saving \$4,000,000 a day in taxes. The Senator's campaign for renomination has been conducted in retrospect; he has never been able—and apparently was not so minded—to divorce himself from any of the unpopular moves of the Harding Administration and has elected to stand or fall as an integral part of the present National Government.

No one can question his sincerity in calling the voters' attention to the fact that he is part and parcel of the Washington Administration and by the same token he and his supporters have little reason to complain when his political opponents seize upon some measures that did not merit unmitigated public approval; for instance, the Senate vote seating Newberry, and manufacture sizable campaign ammunition from it.

It strikes us, however, that what the voters should be more interested in is not how "regular" a candidate has been, but how he is going to act in the future, what are his ideas upon this or that problem and what plans has he for restoring business and making living conditions easier in this country. One of the men nominated next Tuesday, be he either Democrat or Republican, will remain in the United States Senate for the next six years and will have an opportunity to assist in formulating and adopting laws that will personally affect all of us.

This being true, it would seem that a lot of people would be more interested in hearing Senator New's views upon the half billion deficit the Government will face next year and his idea of just how much it is going to cost us to wipe it out, rather than to hear him congratulate himself for having supported all Republican measures since he took his seat in the Senate. Campaign promises always are vague and ambiguous, but the public is usually an apt listener when a leader puts forth a sound, constructive thought in an honest, sincere manner.

## The Negro Problem

The growing tendency of negroes to seek homes in the white residential sections, despite the advice of their sensible leaders, has led a determined group of north side women to voice a protest against conditions in Indianapolis. At the very time these women were meeting it was necessary to station police about Shortridge High School to protect girl students from insults of negroes and depraved whites, while on the inside of the building one of the indefensible anomalies of our educational system was on exhibition—the comingling of blacks and whites in the classrooms.

"The negro may have the legal right to buy property and live in your neighborhood, but he has not the moral right to do so, when he knowingly takes away half of your property value," was the message given to this little group of women by one of their own number.

"Such actions as those of the negro moving in among whites not only incite race prejudice more than anything else, but damage the community as a whole, and the best interests of both whites and blacks demand that such practices cease," was another remark that will be concurred in by members of both races who have the courage of their convictions.

The negro is among us and the race should be encouraged to progress, but that path should never lead to social mingling. Miscegenation has no advocate in decent circles. Sane leaders, white and black, realize that each race must work out its separate destiny with a mutuality of interests but without amalgamation.

The misguided ambitions of some members of the colored race to overturn the relative status of racial divisions can be traced in many instances to the pampering and flatterings of the politicians who are especially active at this stage of a campaign.

And it is true, as these women were told, that the politician of "neither party cares for anything except the negro's ballot on election day."

The sooner the negroes learn that their so-called political leaders cannot lead them into the fields of racial equality, save as a grudging politician bestows a beneficence, and listen to the good advice of their foresighted spokesmen, the better for the future.

## Abolishing the Dope Peddler

The report that there are one million drug addicts in the United States is a startling disclosure, in lieu of the fact that dope peddling is held as a distinct crime and arrests for this practice are being made daily in the big cities.

The clever methods used by the dope merchants to lure the innocent into their coils—as was revealed by the case of the two New York girls from good families—make it difficult for the police to completely wipe out this situation.

The drug fiend is not always to blame for his false appetite. Many poor creatures have come under the power of this destructive drug through the use of doped medicine given them by physicians to alleviate pain during illness. Neither is the physician altogether to blame, as a small amount of drug is permissible in medicine and if the patient is an extreme sufferer he is tempted to increase the dose.

The strange thing is that once a slave to dope it is impossible to give up the habit without pangs of suffering. True, there are sanitariums where drug fiends may go to be cured, but this treatment is not always convenient for the sufferer, and there is a question as to whether or not victims are as good physically as before.

From the ring of dope fiends come some of the worst outlaws with which authorities have to deal. It is unnatural for human beings to be criminals. Crimes can almost always be traced to the use of drugs, intoxicating liquor or insanity.

Drastic methods should be used to handle the sailors who bring the drug into New York and San Francisco on steamers, and frontier smugglers who work through Canada, as the only way to wipe out this situation is to begin at its source.

## Ye TOWNE GOSSIP

Copyright, 1922, by Star Company.

By K. C. B.

Dear K. C. B.—I am a constant reader of your column, and because you have helped so many, maybe you can help me.

I have a 14-year-old boy who will not learn to be tidy about his appearance, and, although I have tried every remedy I know, they have all been unsuccessful. Therefore, I appeal to you for assistance through your column.

A WORRIED MOTHER.

I WOULDN'T WORRY.

IF I were you.

IF I GIVE it up.

AND TURN the task.

TO FATHER Time.

AND SIT me down.

IN CONSOLEATION.

WITH THE fact.

THAT MOST great men.

WEREN'T TIDY boys.

NOR TIDY men.

FOR AFTER all.

IT IS your pride.

THAT WORRIES most.

YOU'D LIKE your boy.

TO BE as spic.

AS OTHER boys.

WITH WHOM he plays.

AND GOES to school.

JUST AS you like.

TO DRESS as well.

AS OTHER mothers.

IN YOUR block.

AND THAT'S all right.

BUT IF he won't.

WHY THEN he won't.

AND IT'S no sin.

AND IT'S no crime.

AND LATER on.

WHEN HE grows up.

IF IT should be.

HE PROVES a genius.

IN SOME line.

HOW HE must matter.

HOW HE looks.

AND YOU won't care.

BUT IF he finds.

HE'S COMMON clay.

LIKE MOST of us.

HE'LL ALSO find.

HE MUST be tidy.

IN HIS clothes.

TO GET a job.

AND FIND a girl.

AND THINGS like that.

IF HE'S all right.

HE'LL BE all right.

AND I'D leave him alone.

I THANK you.

## Unusual Folk

PONTIAC, Mich., April 28.—When future historians of the United States need information concerning happenings of the long ago in the land of Chief Pontiac it is to the records and collection of Mrs. Lillian Drake Avery that they surely will turn for enlightenment.

For years Mrs. Avery has been gathering relics of the past, and keeping up current history of her State by means of great scrapbooks filled with newspaper and magazine clippings and personal letters.

Mrs. Avery's personal collection of material in existence bearing on the story of Michigan.

During the war she was on the lookout for every scrap of information relating to soldiers of the Michigan troops and her war history of the State is said to be unrivaled in completeness.

Mrs. Avery is a daughter of the American Revolution and an officer in various local and State pioneer societies. Her work as an unofficial chronicler has the highest value from a historical standpoint.

## A THOUGHT FOR TODAY

And Jesus answered him, Thou shalt love the Lord thy God with all thy heart, and thy neighbor as thyself. There is none other commandment greater than these.—March 12:31-32.

Love is the greatest thing that God can give to us, and the greatest thing that we can give to God.—Jeremy Taylor.

## BOXING PONY IS A UNIQUE FEATURE

On Keith's Third of a Century Anniversary Bill

One of the novelties on the current anniversary bill at B. F. Keith's is the boxing pony, presented by Polly Dassi and company. The picture shows the pony with boxing gloves engaged in a "fistic" encounter with a member of the act.

## ON STAGE AND SCREEN.

"The Unloved Wife" will be the offering all next week at the Park Theater. This is not a movie but a popular-priced dramatic offering. Griffith's "Orphans of the Storm" opens a limited engagement at the Ohio Sunday.

## TONIGHT'S PROGRAM

INDIANAPOLIS STATION WJK—

9:30 p. m., time and weather reports (453 meters).

CHICAGO STATION KYW—

6:30 p. m., news, final markets and financial report.

7:30 p. m., children's bedtime story.

8:00-9:00 p. m., musical program by Mera Lustgarten, soprano; Earle Anderson, baritone; Fritz Kunk, violinist; Hadassah McGriffin, accompanist; Grace Tompkins, accompanist; Otto G. Beyer, accompanist; instrument program by the McKay Trio; Malvina Nelson, violin; Walter Brauer, cello; Helen McKay, piano.

9:00 p. m., news and sports.

SCHENECTADY (N. Y.) STATION WGY (easter time)—

7:00 p. m., market quotations supplied by New York State department of farms, and markets and weather reports.

7:45 p. m., musical program.

PITTSBURGH STATION KDKA (easter time)—

7:30 p. m., bedtime stories for kiddies.

7:45 p. m., special news, Government market reports, summary of New York Stock Exchange, weather reports.

8:00 p. m., "The Summer Vegetable," by W. B. Nisley, "Commercial Engineering," by Thomas Stockham Baker.

8:30 p. m., varieties by Lillian Wood, soprano; Henry Hubert, pianist; and Anna Elwell, reader.

9:00-9:05 p. m., news (United Press service).

9:15-10:00 p. m., Arlington time signals.

NEWARK (N. J.) STATION WJZ (easter time)—

7:00 p. m., "Man-in-the-Moon" stories for children.

7:30 p. m., concert by the Philippine

The attractions on view today include: Anniversary bill, at Keith's; Spring Festival bill, at the Lyric; "Foolish Wives," at the Ohio; "Little Lord Fauntleroy," at Myster Smith's; "A Doll's House," at Loew's State; "Find the Woman," at the Alhambra; "Ten Nights in a Barroom," at the Isis; "Doubling for Romeo," at the Circle, and "His Night Out," at the Rialto.

Orchestra from the S. S. Lone Star State, Ross D. Myrick. 8:00 p. m., during intermission of concert a financial letter will be read by courtesy of the Magazine of Wall Street. 9:00 p. m., recital by Bernard Grattin, celebrated soprano, and Isolt Flane, lyric baritone. 9:45 p. m., musical program; Isolt Flane, lyric baritone. 9:52 p. m., Arlington time signals. DETROIT (MICH.) STATION WJZ (easter time)— 7:00 p. m., musical program. ATLANTA (GA.) STATION WSB (easter time)— 6:00 p. m., sports and late news. 8:00 p. m., musical program. MEDFORD (HILLSIDE, MASS.) STATION WJZ (easter time)— 8:45 p. m., musical program.

## Boston Radio Show Will Exhibit Strange Antenna

BOSTON, April 28.—Wireless equipment of hitherto unheard-of design will be exhibited at the Boston Radio Show, the first of its kind to be held here. The show opens May 3 and ends May 6. A set known as the "garter type," because a lady's garter plays an important part, is perhaps the most unusual. A paraboloid of the wire frame of a hat serves as the antenna. A glass tube attached to the center contains the crystal detector. The tuning coils are in a small container that can be placed in a pocket or handbag; a thin chain, one end of which is to be held beneath the foot, acts as the ground. Another set closely resembles a book. Demonstrations will show how other mechanical appliances may be controlled by radio. Toy dolls, automobiles and the like will be used.

## Variometer Aids Set

DAILY RADIO FEATURES

BY R. L. DUNCAN, Director, Radio Institute of America. Here is a way of increasing the power of a crystal detector set without using a vacuum tube.

Substituting a variometer in the aerial circuit for the loose coupler.

Many amateurs have done this and have received telephone and spark signals from a distant station as great as before.

The variometer may be constructed as previously explained or may be purchased for about \$4.50.

A variable condenser may be connected in the aerial circuit. This condenser should be of twenty-three plates or .0005 microfarads capacity.

Always bear in mind that you probably will have to try several pieces of galena before obtaining one that is suitable for radio wave detection in using a crystal detector of that metal.

Head phones shunted by a small fixed condenser should be of 2,000 to 3,000 ohms resistance.

Since all these parts can be used in making other sets, it would be good experience for the amateur who wants to get as much fun out of radio as possible to construct or assemble a receiving set along these lines.

## Study of Static Will Mark Summer

Radio fans may expect to hear of radical progress in the development of the science this summer.

That is the time when a full will come in the use of receiving and broadcasting. The heat will keep the amateurs and novices outside, while atmospheric interference will make it hard for transmission and reception.

But it is just this time for which radio engineers are waiting.

## "STATIC" PROBLEM.

One of their greatest problems is the elimination of static. That will be at its peak during the warm days.

For this reason Government and other radio experts are preparing to make all sorts of experiments with radio apparatus in order to reduce as far as possible this form of interference. Tests have been made in tropical countries, but the engineers say the conclusions formed at these tests may not apply in the temperate zones of summer.

Dr. Louis Cohen, consulting engineer of the United States signal Corps and chief of the Army radio research, has been making a special study of radio disturbances. He has made several experiments at Army stations in Texas, where he found much static interference on which to base his studies.

## STUDIES CONTINUED.

During the warm days in the northern part of the country, Dr. Cohen will continue his studies and expects to perfect a plan by which atmospheric interference can be eliminated. He is said already to have invented an instrument which will eliminate "strays," or foreign disturbances.

Then will be the ideal time for their experiments. Engineers for private radio manufacturing and broadcasting firms also report activity in the study of static elimination. They are only awaiting the dog days, when static will be so troublesome as to make it almost impossible to receive signals.

Then will be the ideal time for their experiments.

HER CIGARETTE BILL \$500.

BOSTON, April 28.—A debt suit tried here brought out the fact that Mrs. Harriette Lemmon owed \$500 for cigarettes.

## Alabama to Install New High Power Sending Station

BIRMINGHAM, Ala., April 28.—Alabama will have two high-powered radio broadcasting stations by June 1, one already begun by an electrical company here dealing in the radio equipment and the other at Auburn Polytechnic Institute. These two stations, of equal sending capacity with Pittsburgh, will put the State firmly on the map in radio leadership.

Interest in the development of radio is evidenced by the fact that the equipment company here dealing in receiving station outfits has disposed of twenty-five complete stations in two weeks and in the same period has booked seventy-five orders for future delivery.

Department stores, hotels, clubs, cafes and athletic institutions are leading in the radio race now. Dealers in the station outfit, swamped with more orders than can be filled for several weeks, declare that if the present pace is maintained every important business house will be serving radio concerts to its customers and clients for amusement during business hours.

Further research and scientific development of radio is expected to result here, dealers and students declare, because of the character of the equipment in demand. Light, small outfits are not wanted, and the simple amateurish outfit remains closed. Only the high power, efficient stations are wanted, indicating an eagerness among purchasers to delve effectively into the wonder science.

With the completion here of the big broadcasting station, even further advances are anticipated in the already remarkable growth.

## Downtown RADIO Receiving Station

Come to our third floor anytime tomorrow night till 9—and hear the intensely interesting concerts broadcasted from various sources.

L. STRAUSS & Company

## Your Last Chance! To Trade in Your Old Watch

Saturday is the last day of this offer, so it's up to you to act quick.

Remember, Any Watch Taken in Trade (Except Ingersolls)

No extra charge, no delays. Just bring in your watch and we'll allow you a liberal price for the old watch and sell you a new one at the standard cash price.

HAMILTON, ELGIN, HOWARD, WALTHAM, HAMPTON, ILLINOIS.

Diamonds

We are showing a wonderful collection of beautiful and brilliant stones. Invest your money safely in a diamond.

\$1 a Week

\$1 a Week Pays the Balance

Trade in the old watch and buy the new one on the easy Windsor Perfect Credit Plan. You'll never miss the money.

South Bend Watches Reduced to... \$40

WINDSOR JEWELRY COMPANY
