WHITE TIRES OF WAITING AT JAIL

Sage of Emporia Worries Friend Henry With Added Per Cent.

By United Press
EMPORIA, Kan., July 22.—William Allen White and Governor Allen, political pals and inseparable chums, were met on the streets of Emporia, Kan., today by a crowd of thousands of people, who were waiting for the sage of Emporia to appear. White, after conferences with Industrial Court Judges J. H. McDermott and Walter Huggins, said to be Allen peace emissaries, obstinately announced increase of the card in his window to "fifty-two per cent sympathy" for striking shopmen.

"And by god, I ain't going to stay dressed up another day for execution," declared the "celebrity of Emporia."

Meanwhile, Kansas hasn't been so worked up over anything since the Stubb administration slapped Jay H. Stubb, Topeka political writer, in jail, theoretically, for refusing to tell where he claimed he could buy a drink of liquor in Kansas.

HOW TO MAKE FIGURES OF SAND

By DAN BEARD.
National Scout Commissioner.
When a bunch of girls go on an outing to some sandy beach, how the damp, smooth sand beneath their feet calls each girl to try her skill in writing, or still better in drawing a picture on its surface. Armed with a sharp-pointed stick, or its substitute, and standing a good distance apart, at a given signal they began to work, each making an outline like figure 1 on the sand, not less than one yard in length, then, without waiting, another line is drawn (figure 2), like

the first, but reversed.

Quickly the pointed stick connects the two loose ends (figure 3), and lines are also drawn connecting points of tail with body (figure 4). Then the eye and mouth are drawn (figure 5). The

After general inspection of one another's work, at another signal the artists immediately change into sculptors, each girl bringing a damp sand and with it padding out a bas-relief within the outline of her drawing, making a slight indentation for the eye and mouth, and we begin to see a resemblance to a fish.

If it is desired to indicate scales on the fish, curved lines are drawn across its side (figure 6), and these crossed by other lines (figure 7). Figure 8 gives the fish-modeled bas-relief.

Tomorrow: Baskets you can make.

Farmers Optimistically Abandon Despairs; Resume March to Agricultural Prosperity

By JAMES B. HOLM
The American farmer is coming back.

He is beginning to emerge from the tremendous slough of despair and suffering, in which he has floundered for the past twenty months. His head is once more above water and he feels that the crisis is past. He believes better times are coming, although almost imperceptibly slow.

The farmer himself says this. In a 2,500-mile trip through the heart of agricultural America I have learned the true conditions from the man with the hoe and the man behind the plow. I have talked with the "dirt farmer," the rich and poor, landlord and tenant, with the country banker and the county farm bureau agent.

I have learned first-hand of the tremendous struggle the farmer has had to make both ends meet during the past year and a half. Literally, the farmer has suffered not only from want of the comforts, but of the necessities of life, that America and the world might expect. For a year or more he felt himself a beaten man for whom the future held but little.

Now his courage has returned. He has faced about with the light of a new spirit in his eye. The practical American farmer is not claiming that prosperity is here. Far from it. But he believes it is on the way, slowly coming nearer every day.

I heard everywhere, "We lost money last year. This year we expect to break even or perhaps make a little money. Things look better."

LAND OFFER TO CITY RENEWED

Municipal Lake, North of Sellers Farm, Again Proposed by Gravel Firm.

Offer to sell the city 125 acres just north of Sellers farm to develop a mile-long municipal lake, made a year ago, was renewed today by the Granite Sand and Gravel Company. Proposal was made to the board of park commissioners, which took it under advisement.

Right to dig gravel on the Sellers farm when excavation reaches the city's line also is stipulated, the company to pay the city for the concession.

Representatives of the company said the lake would be from 175 to 200 acres in area. The company's excavations already have made a five-acre lake there. Water seeps into the pit from Eagle Creek and White River.
