

MARKETS SHIFT TO NEW FIELDS, KLEIN REPORTS

Director of Foreign Trade Points Out Significant Facts of Commerce.

NEW YORK, Oct. 12.—America's overseas markets are gradually shifting from Europe to Asia and the near-by countries of the new world, in the opinion of Dr. Julius Klein, director of the bureau of foreign and domestic commerce of the Department of Commerce.

Speaking Wednesday night before the Associated Business Papers Incorporated, at their annual meeting held in the Hotel Astor, Dr. Klein declared that "through the absolute values of our shipments across the Atlantic undoubtedly will continue for years in excess of the pre-war figures, the relative importance of markets outside Europe steadily is increasing."

Sees Peak of Importance

As evidence of the shift, Klein pointed to the fact that during the three fiscal years immediately preceding the war, Europe took an annual average of 61.2 per cent of American exports. The peak of Europe's relative importance as a market for American goods was reached in 1914-15 with a record of 71.2 per cent of the total.

"There has been a progressive decline in the relative importance of Europe as an export market since that time," Dr. Klein said. "Her average annual proportion in the three year period ending June 30, 1922, having been 55.7 per cent."

SPARES FINE TREES

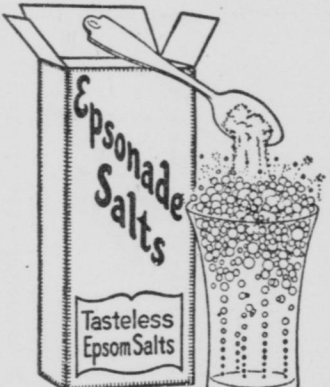

Highway Commission Curves Roads to Save Monarchs.

The policy of the State highway commission is to save trees along State roads whenever possible, and in many instances in order that a particularly fine tree be spared, roads have been curved slightly. This action is being taken relative to widening State Road No. 1, near Crothersville in Jackson County.

Just south of Crothersville an immense maple in front of a country home is too near the right-of-way, but in order to save the big tree, which is highly prized as a landmark, the commission has permitted engineers to swing the right-of-way over a little. A large oak standing almost in the center of the road near the same town is to be removed, officials taking the position that it is a menace to traffic.

COAL COMMITTEE MEETING DELAYED

A. E. Bradshaw, Chairman, Is Out of City—Plan Cooperation With Federal Group.

A. E. Bradshaw, chairman of the city coal commission, is expected to be out of the city until Monday. This will prevent the first meeting of the body until then, other members said today. Mayor Shank requested that they organize some time this week.

Chairman John McCordie of the public service commission notified the city body the State commission will be glad to confer with it at once.

Both the city and State commissions will act in an advisory capacity to the Federal fuel administration. Through the interstate commerce commission the Federal Administration has power to order railroads not to ship coal to dealers who do not abide by Federal regulations. If a local dealer were charging unfair prices or interfering with just distribution in time of shortage he could

be disciplined by the Federal body upon recommendation of the local commission, members believe.
