

NEEDS OF WORLD ARE DESCRIBED

Judge: Guilty? Girls: Yes Sir.

Department of Commerce Tells 6,000,000 Readers of Marts in Foreign Fields.

By United Press

WASHINGTON, Oct. 24.—A world information service revealing to American business opportunities for the sale of raw materials and manufactured products across the seas, has been established by the Department of Commerce under the direction of Secretary Herbert Hoover.

In little more than half a year, Paul J. Croghan, chief of the editorial division of the department, has built up a news-gathering agency with more than one thousand correspondents scattered in every corner of the globe and he has increased his "bureau circulation," from 5,000 to 6,000,000.

All of this has been accomplished by a combination feature service, conceived and prepared by Croghan and his assistant, William L. Kilcoin. This service is divided in three sections, Shows World's Needs.

The first section is entitled "What the World Wants and Needs. Trade Opportunities." This publication is released every Monday and contains up-to-the minute information from all over the world on needs of the various nations, together with actual advertisements announcing the wants of specific concerns for American goods.

The second publication is released on each Tuesday and is entitled "Foodstuffs Around the World." Crop conditions, trade in foodstuffs and allied subjects are treated with in this portion of the service.

The third is the "Weekly Cable Service," compiled by the department's foreign staff and touching upon general matters of interest abroad. Financial and economic developments in every country in the world are reported and forecasted expertly and accurately in this publication.

"Based on the advertised circulation of newspapers carrying portions of our printed service weekly, we now have 6,000,000 readers. Papers which carry this news throughout every section of the United States, and each carries from a column or less to more than a full page. Under the old system of mailing out a daily commerce report we reached not more than 5,000 persons."

6,000,000 Not Limit

Six million readers, however, it was pointed out, is not the limit of the circulation of this news. Every paper in the country receives through its Washington correspondents or through news services the important or nationally interesting portions of the department's service.

Every American consul, trade commissioner and commercial attaché, numbering in all slightly more than 1,000, plus international attaches in their sections of the world for use in Croghan's service. Reports come in by wireless, cable and mail, depending upon their importance. By way of reward for their efforts, newspaper cuttings, all giving appropriate credit, are returned to the men from whom the reports originate.

"It works better than a salary," Croghan avers. "When they see all the publicity they get back in the States they redouble their efforts, and we could print an entire newspaper with the copy we get daily now."

ARTISTS FEEL HUNGER

Writers and Dramatists in Paris Like All Others.

MILWAUKEE, Oct. 24.—Artists and writers who look to Paris as the Mecca for the development of their professions must realize, even in that city, the "hunger" element must be accounted for, according to Prof. Frank Schoell, who spoke on "Paris of Today, in Art and Literature," before the Milwaukee College Endowment Association.

"Artists and writers are always complaining that their works are not getting the proper recognition and men of those professions in Paris are no exception," he said. "Take the Society of the Men of Letters, for instance. Out of a membership of about 1,500, only 100 succeed in making a living by the work of their pens. The dramatists fare about as badly. Out of some 4,500 dramatists in that city, more than 4,000 do not make more than \$2 a year from their works!"

"To keep hunger away, many of the writers make literary contributions to the newspapers."

RULING CAUSES SCRAPS

Italian Cabinet Says Peasants May Occupy Uncultivated Land.

ROME, Oct. 24.—The cabinet has passed a law giving peasants the right to occupy estates which are not being cultivated to their full capacity.

This law has caused more litigation and bloodshed than almost any other, it being debatable question whether any particular estate is cultivated to its full capacity.

At Casignano, in Reggio di Calabria, a pitched battle occurred between peasants who invaded the estate of Prince Della Roccella and carabinieri had to be sent to expel them, firearms being freely used on both sides. Dr. Ceravolo, the mayor of Casignano, an alderman, and two peasants were killed and five people were wounded, including two carabinieri.

ELEPHANT WINS

Camel Loses in Drinking Contest at Zoological Gardens.

NEW YORK, Oct. 24.—The camel can go a long time without drink, and it is generally supposed when he does drink he consumes a large quantity. He does, but according to experiments at the Bronx Zoological Park, a camel can not drink as much as an elephant.

The test was made with Gobi, the Siberian camel, and Kharroum, the African elephant, by Curator Dittmars. A specially prepared tank was used in which the water was measured. Gobi could only accommodate twenty-two gallons, while Kharroum put in thirty. The camel has a way of storing up his water supply for use in a dry country, being his own bootlegger, but the elephant consumes his thirty gallons daily.

DEPORT WAR HERO

Young Pole With Two Decorations Will Be Sent Home.

NEW YORK, Oct. 24.—Awaiting deportation at Ellis Island is Josef Kopczynski, 16 years old, who arrived last week on the Savoie. The boy has with him two war decorations, the Croix de Guerre and a Polish War Cross, which he says he won in action abroad.

He says that in the World War he got possession of two revolvers and that while the troops were in action he crept up on two German soldiers, covered them with a revolver and brought the men to his own lines. He was only 10 years old then, according to his story. For that adventure he was given the Croix de Guerre.

AIRMAN LEAPS 1,500 FEET TO SAFETY; PLANE WRECKED

First actual use of the army's parachute for use in escaping from a disabled airplane saved the life of Lieut. Harold R. Harris at Dayton, Ohio. When 1,500 feet up, Harris found his plane was not working properly, and the wings were crumpling under pressure of the wind. Leaping from the plane, Harris alighted without injury. The plane crashed to bits, as shown by the above photograph. In an upper corner is inset of Lieutenant Harris. Lower inset is the parachute used, as it appears when the aviator gets in his "ship."

BRITISH TANKS WILL CARRY 50

New Model War Machines More Comfortable and Faster Than First Ones.

By United Press

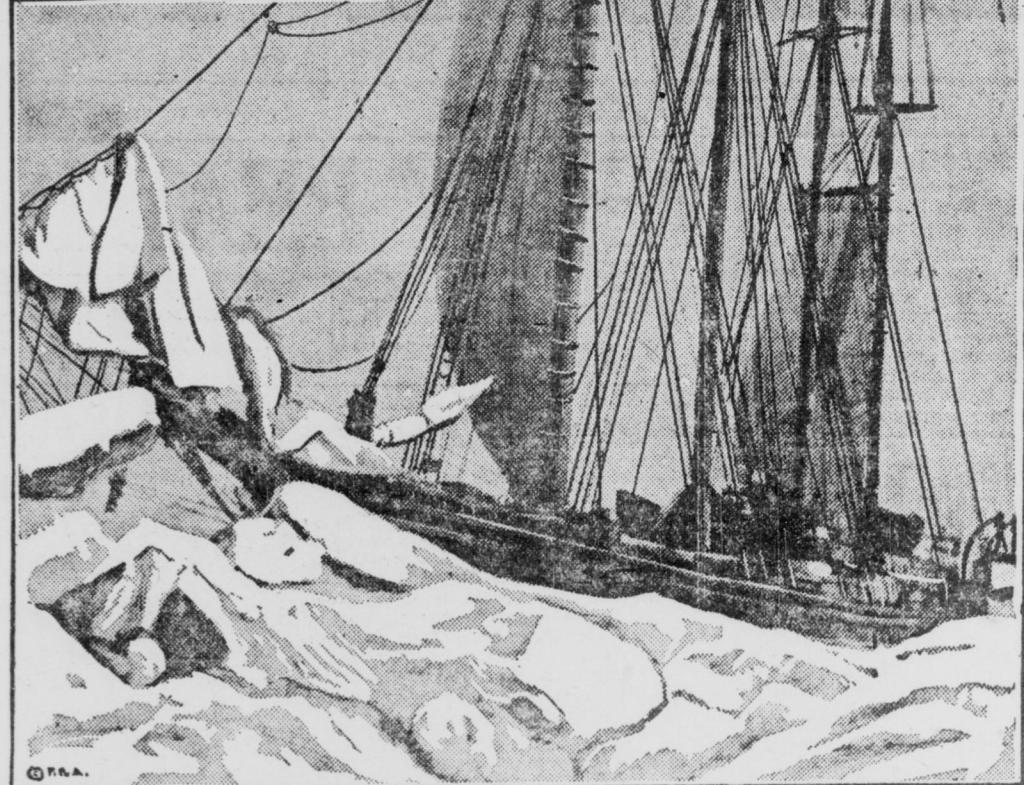

LONDON, Oct. 24.—Despite the veil of secrecy that is invariably thrown around the development of new engines of destruction, the United Press learns from reliable sources of a monster tank, capable of carrying fifty troops, which has just been constructed for the war office.

One who participated in several of the recent trials stated "it was as comfortable as riding along a well-paved street in a taxi." These tests have been carried out in an isolated spot not far from London and every detail of construction has been jealously guarded by the military officials.

The new tank is designed along the same lines as those used against the Germans, but there have been numerous improvements. For instance, it is capable of a speed of twenty miles an hour, whereas the noisy, clumsy tanks of the last war could scarcely do eight miles at top speed.

In addition, greater attention has been given to interior comfort. The

AMUNDSEN'S SCHOONER STUCK FAST IN ARCTIC SEAS

The schooner C. S. Holmes, a sailing vessel which carried supplies to Captain Amundsen, Arctic explorer, stuck fast in the frozen waters of the Arctic Ocean. Amundsen today is living in a hut on the icy banks of the Arctic Ocean awaiting his opportunity for a dash to the Pole.

SHOCKING Boys Masquerade

WINCHESTER, Ky., Oct. 24.—Late pedestrains were shocked last night at the sight of two fashionably dressed females shooting pool in a Main St billiard parlor.

A complaint phoned into police headquarters brought Patrolman Mal Tarpay, who gave the offenders the once over and quickly decided they handled their cues too familiarly to be genuine flappers.

Closer inspection proved them to be college boys out for a lark. They were loaded in a taxi, chased back to school and told to get into their civies when they come in for the evening.

WILL CELEBRATE MARCEL'S BIRTH

Hair Dressers to Do Honor to Inventor of Popular Wave in Women's Hair.

By United News

PARIS, Oct. 24.—Right in the midst of this year of French centenaries, centenarians and everything, there promises to be a fiftieth anniversary of a hair-curling variety—that of the Marcel wave!

For the hairdressers of France have decided to band together and do honor to "Le Pere Marcel," that courageous coiffeur who in the early days of the third Republic had the audacity to use his curling irons wrong side to, thereby producing the undulation which bears his name. The hair dressers are duly grateful for the boost he gave to their business and will soon announce the date of the anniversary celebration when they will pay tribute to their great benefactor.

Marcel is now 70 years old. He was a millionaire as far back as 1897, when he bought the Chateau du Theil, where he still lives. Strangely, he began life as a stonecutter instead of a hair-cutter, as might naturally be supposed. It is said that he first got the idea for his invention from his mother, who had naturally wavy locks.

"What wouldn't most women give to have hair like that," he mused. He took out his mother's curling irons and then his big idea of turning the irons upside down came to him. The result is history.

Success came almost instantly. Every "grand dame" every actress at all solicitous of publicity, stood in line before his shop to await the magic transformation. In the first days of the novelty he used to draw \$50 each from his fair customers. Then the vogue spread to London. Ladies of fashion besieched him to give them the new wave.

"With the cool climate, the many places and objects of historical, artistic and romantic interest, the learning of the Spanish language and all the scientific lore offered by the erudite faculty of the university, is offered a combination of advantages for summer study and recreation that cannot be equaled anywhere."

"This summer's course has been very successful and I venture the opinion that there has been started a form of summer school training in Mexico that will become the greatest educational institutions, barring none."

NEW PAPER FOUND

NEW YORK, Oct. 24.—Many possible uses suggest themselves for a special paper recently produced and patented by a Japanese inventor. The paper, according to an illustrated article in the September Popular Mechanics Magazine, is remarkably strong and can be crumpled up and washed with soap and water, much as one would wash clothes. So durable is this paper that it can be used as a covering for umbrellas, and when soiled can be easily cleaned at home.

Buckingham palace occupies the site of the mulberry gardens laid out by James VI in his unsuccessful attempt to start a silk industry in England.

SINCLAIR SPEAKS CAUSTICALLY OF CHANGES NEARING

Author of 'Main Street' Says Whole Order of Things Will Be Revolutionized.

By United News

NEW ORLEANS, Oct. 24.—Stuclair Lewis, who achieved a reputation as a revolutionary type of novelist by faithfully describing Gopher Prairie's ash heap, believes revolution is brewing not only in literature, but in business, manufacturing, society and every line of human activity.

By revolution he means not the kind of affair which took place in Russia, but a general tendency to adopt new ways of doing things.

The big business man, Lewis said, in a speech here, is the most radical revolutionist of all.

"Look at his constant improvement of machinery. Introduction of women into highly paid positions will work a revolution."

"In the same revolution are the little East Side girl, the radical of the Rand School, the Y. W. C. A. worker and the society flapper," Lewis said.

One sanatorium is giving its patients a half hour's flight in an airplane each day as a treatment for mental depression.

ACID STOMACH!!

MEALS SOUR OR FORM GAS, GAS

Chew a Few Pleasant Tablets Indigestion Gone!

Instant stomach relief! Harmless! The moment "Pape's Diaperin" reaches the stomach all distress from acid stomach or indigestion ends. Immediate relief from flatulence, gases, heartburn, palpitation, fullness or stomach pressure.

Correct your digestion for a few cents. Millions find it handy. Drugists recommend it.—Advertisement.

OUCH! LUMBAGO PAIN! RUB BACKACHE AWAY

Kidneys cause backache? No! Listen! Your backache is caused by lumbago, sciatica, or a strain, and the quickest relief is soothng, penetrating St. Jacobs Oil. Rub it right on your painful back, and instantly the soreness, stiffness and lameness disappears. Don't stay crippled! Get a small trial bottle of St. Jacobs Oil from your druggist and limber up. A moment after it is applied the backache or lumbago pain.

It's a remedy that is astonishing the whole country, and it's just as good for gout, sciatica, lumbago and kidney misery as for rheumatism.

It's a drink the poisonous waste from the joints and sinews—that's the secret of Rheuma's success.

But we don't ask you to take one bottle after another, and if you don't get a bottle, get a small one, and if it doesn't do as we promise get your money back. It will be there waiting for you.—Advertisement.

Mrs. O. J. McMillon

Send to Nearest Druggist for a Box of Pyramid Pile Suppositories—Their Soothing Influence is Remarkable.

In the privacy of your own home Pyramid Pile Suppositories give blessed relief from piles, hemorrhoids and such.

For the Mother

Bloomington, Ind.—"I have used Dr. Pierce's Favorite Prescription during pregnancy and I found it to be a big help to a woman at that time. I have had practically no suffering and my babies have always been strong and healthy. I have recommended Dr. Pierce's medicine to many other women and it has helped them all."—Mrs. O. J. McMillon, 340 S. Lincoln St.

Why not obtain this famous Prescription now at your nearest drug store in tablets or liquid, or write Dr. Pierce, President Invalids' Hotel in Buffalo, N. Y. for free medical advice.—Advertisement.

If Ruptured Try This Free

Apply it to Any Rupture, Old or Recent, Large or Small and You are on the Road That Has Convinced Thousands.

Sent Free to Prove This

Any one ruptured, man, woman or child, should write at once to W. S. Rice, 183B Main St., Adams, N. Y., for a free trial of his "Rupture Healing Ointment." Just put it on the rupture and the muscles begin to tighten; they begin to bind together so that the opening closes naturally and the need of a support or brace or appliance is then avoided. Don't be afraid to send for this free trial. Even if your rupture doesn't bother you all the time, it is a good ointment to have on hand.

Don't try to cook this ointment. It is a special preparation. Finally I gave up going to the doctor and a friend told me of Lydia E. Pinkham's Vegetable Compound. After the first bottle I could sleep better and I have kept on improving ever since. I have taken seven bottles now and am so happy that I am all over these bad feelings."—Mrs. B. Lander, 1639 N. 3rd St., Sheboygan, Wisconsin.

For the woman entering menopause Lydia E. Pinkham's Vegetable Compound can be of much benefit. During this time of life certain changes take place which sometimes develop into serious trouble.

Melanolia, nervousness, irritability, headache and dizziness are some of the symptoms. Lydia E. Pinkham's Vegetable Compound is a natural restorative, especially adapted to assist nature in carrying you safely past this time. Why not give it a fair trial?

Free for Rupture. W. S. Rice, Inc., 183B Main St., Adams, N. Y. You may send me entirely free a sample treatment of your stimulating application for Rupture.
