

AUTO TURNS OVER, INJURING TWO MEN, WOMAN AND GIRL

Car Owned by Clyde Oliver
Plunges Into Ditch on
Rockville Road.

Two men, a woman and a 12-year-old girl today were suffering from injuries received when an automobile owned by Clyde Oliver, 28, of 12 Fredhema Terrace, 728 N. East St. turned over and plunged into a ditch on the Rockville road at 9:30 p. m. Thursday. The accident occurred three-fourths of a mile west of the county line.

The car was badly damaged. Passing motorists offered aid. They were told to send a wrecking car to the scene. The injured refused to give names. Oliver was in bed at his home today. He said the car skidded off of the road and rolled over on its side. He said he was driving from Rockville.

Miss Virginia Rose, colored, 932 Superior St., is recovering from injuries received when she was struck by an automobile truck driven by James McCord, colored, 222 W. Twelfth St., at Illinois and Pratt Sts. McCord was arrested on charges of assault and battery and speeding.

A big red automobile crashed into a car owned by George E. Brown, 221 E. Vermont St. Brown's automobile was parked in front of his home. It was badly damaged. The driver of the red automobile drove away without giving a name.

CITY HAMMERS AT WATER PROFITS

(Continued From Page 1)

now is no charge. The city has agreed to pay for this water. The history of the company has been one of big profits and large stock and bond dividends, figures previously submitted by Park show.

Here are some of the city's contentions as revealed by its exhibits presented to the commission Thursday.

The actual net cash investment in the physical property March 31, 1923 was \$7,907,741.74.

Average annual cash dividends on the original \$500,000 of common stock to 1922 was 34.17 per cent.

High Dividends in 1922
Cash dividends in 1922 totaled \$400,000, the highest since 1913. The company has issued a total of \$3,000,000 in bond dividends, \$4,500,000 in stock dividends and \$4,185,333.50 in cash dividends since its organization in 1881.

The company has paid a total of \$2,931,250 interest on bonds issued to stockholders as dividends.

The net income of the company in 1922 was \$550,808.63, the highest in its history.

The company has made a profit every year except its first year. The net income last year would equal 96.2 per cent of the original common stock.

Overhead Charge Varies
The actual structural overhead charge shown on the company's books from April 15, 1881, to March 31, 1909 amounted to 5 per cent, and from Jan. 1, 1913, to Dec. 31, 1922, it amounted to 8 per cent. The company is claiming 15 per cent.

The commission has ordered an eight-tenths of a cent depreciation charge on all the property, including \$2,949,167 worth of land and other non-depreciable property. The charge on actual depreciable property would therefore be 1.16 per cent.

If the company should lay aside \$160,000 a year for depreciation, as it hopes to do, at the end of seventy-eight and one-half years, the estimated life of the property, it would have a reserve of \$2,948,207 at 4 per cent compound interest.

The company is using one method of depreciation to show high per cent condition of the plant and another to obtain a high depreciation allowance.

ANTHRACITE COAL STRIKE IS FEARED

Hope of Agreement Between
Miners and Operators
Seems Slight.

By United Press
ATLANTIC CITY, N. J., July 27.—A hope of agreement between miners and operators seemed slight when the final meeting of the joint subcommittee of both sides opened here today.

An agreement is contingent on a demand for full recognition of the United Mine Workers of America.

The present wage agreement between miners and operators expires Sept. 1 and it appeared today that unless the miners' union was recognized by the operators a strike in the anthracite fields might result.

BOOMING CANNON KEEPS CAMP KNOX LIVELY THIS WEEK

Gov. McCray Visits Indiana
Troops at Artillery
Practice.

By DOROTHY STANHOPE,
Times Staff Correspondent
CAMP KNOX, Ky., July 27.—The howitzers of the 150th Indiana Artillery are booming. All week they have been at target practice on the artillery range and the constant firing is not only heard in the center of the camp, but also in Louisville, thirty miles away.

The artillerymen live in camp and march out to the target range every day. Part of the infantry live in tents on the rifle range; the rest march out each morning. It is only a few miles, so it is easily done.

No Danger From Guns
There is no danger of any one being hurt by either the big or little guns, unless he deliberately gets in the way. The hills among which they are fired are uninhabited, the roads are closed and guards are posted, to see that no one wanders into the danger zone.

The Old Dixie Highway between the North and South, used by the armies during the Civil War, goes right through the path of the firing. So when the Government bought up this big tract of 33,000 acres to establish Camp Knox and built the ranges, making the highway dangerous, the New Dixie came into existence.

The Governor of Indiana came over this New Dixie on Wednesday, as did all of the Indiana Guardsmen who motored down.

Visits Indiana Regiments
Besides visiting all of the Indiana regiments, the Governor and adjutant guard had lunch with General Tyndall at his headquarters in the Polo Club. Here the commanding general of the 38th Division and his staff are established in what was once a beautiful Kentucky plantation home. It is now the Camp Knox Polo Club, where, every Sunday afternoon, the officers and ladies of the camp assemble after the polo game for a cup of tea.

The Indiana regiments have only a day or so left before they fold their tents and hasten away to make room for the next unit.

Other Indiana troops, including the 139th Field Artillery, Col. John C. Fishback, Indianapolis, commanding, is not expected until August. Ohio regiments will arrive this coming Tuesday.

The C. M. T. C. is now coming in. One thousand of the 4,000 expected arrived by special train at 5:30 Thursday afternoon.
