"Vampire Complexion" Is Natural, She Says

"They say of a certain well-known dancer that she has a 'vampire complexion.' It is so bewitchingly beautiful. Yet to intimate friends she has confessed the abhorrence she has for her complexion is really natural. Her secret is—ordinary mercerized wax. She spreads a thin coat of the wax over her face at night, and washes it off upon arising. This simple application actually dissolves the dead particles of skin which daily appear, and a fair, soft, fresh, girlish skin is always in evidence. The complexion is kept perpetually young by preventing the accumulation of the aging cuticle. As mercerized wax is obtainable at any drug store (an ounce is sufficient), anyone may enjoy the benefits of this remarkable beauty secret.—Advertisement.

Girls' Late Hours at 15 Bring Heartaches at 19

Mary Jane does not want to be left out, when the other girls of her crowd start to have "company," at about 14 or 15 years. Neither does Mary Jane's mother want her to miss any good times. So, against her better judgment, she lets Mary Jane start to have "dates," too.

As a result, she finds her daughter growing up far too fast, and losing sleep which she needs to store up vitality for future years.

By the time she is 18 or 19, Mary Jane either is an "excitement eater," who must be on the go constantly, is married and sorry, or is blasé and cynical.

Then, when the birds have flown, Mary Jane's mother and the mothers of her friends realize what has happened.

What is to be done? It all goes back to the home. That's where the sub-deb belongs, instead of in public dance halls and parks. She can have just as good a time there, if her parents will take the trouble to provide it.

Speaking of Ages
Dear Martha Lee: At about what age do you think a girl should start going with boys?

2. At about what age do you think a girl should have "dates"?

3. At about what age do you think a girl should get married?

1. About 17 is young enough for a girl to begin having "dates," although few girls appreciate that fact. It's not worth while to start younger than that, and then grow tired of boys just when you should begin to like them best.

2. A girl's first "steady" should be the man she has promised to marry. Some girls are as mature at 18 as others are at 23. However, speaking generally, I should say that from 20 to 25 is the normal marrying period for a girl.

We Disagree
Dear Miss Lee: I am 15 and work. You say a girl should not know what love is, but I don't agree. I think a girl 12 or 13 can have that feeling called love, but doesn't know what it is. Don't you think I am a little bit right?

2. Why does a girl always close her eyes when a boy kisses her?

3. Is it proper for a girl to kiss her older sister's cheek, if he wants her to and her sister does not object?

4. Do you think love will be in style next summer? DON'T AGREE.

1. Your exception to my opinion is, a natural, but nevertheless erroneous, one. True love can come only to those of more mature age and understanding, as you will realize in a few years. It is more spiritual than physical. When you finally experience true love, you will know what I mean.

2. My first answer also answers this question in my opinion. In kissing seems to be far beyond what it should be, my dear.

3. Although I realize that these are only "friendship" kisses to you, I suggest that you show your friendship in other ways. It is better to hoard your kisses than to throw them away.

4. I am not conversant enough with future styles to answer your question.

Theater Party
Dear Miss Lee: We are three young girls who wish to give a theater party, but do not know just how to go about it. Who should pay the admissions—the hostess? Please advise us.

Invite your guests soon enough to be sure you can get tickets after you know how many are coming. Then buy your seats before the party. If the party is at a moving picture show, the hostesses may get the tickets after they get to the theater on the day of the party.

CULLEN LANDIS—You do not give me a very favorable impression of this girl. I should think you would do just as well to let her drift away. However, if you really have not strength of character to leave her alone, you might wait a while and then call her again. Do you really think she is worth all the thought you are giving her? I doubt it.

False Accusation
Dear Miss Lee: Why should a girl keep accusing a fellow of different things when I am not even acquainted with her? Still she accuses me of doing her of her happiness. What can I do to get out of this situation, and what authority has she to do that?

People don't always wait for "authority" in such matters. I suggest that you find a mutual acquaintance, get an introduction to the girl and then put the question up to her.

Sticky Pans
Instead of spending several precious minutes rubbing and scraping cooking dishes and pans, turn them upside down on the draining shelf or table after rinsing out with water. In a few minutes, while washing those that don't stick, the sticky cream sauce or whatever it is causing the trouble will wash off easily. Spiders should always be filled with water as soon as the meat and gravy are taken up.

Among the fruits and berries, oranges, lemons and apples, while not distinctive proteins, contain enough to be of real value in this group. Strawberries, raspberries and blackberries lead the berries in protein.

Bear in mind that your protein foods are most essential. Also that too much is better than too little. The body will waste away and die if denied its proper supply of protein.

Among the vegetables the most valuable in protein are tomatoes, asparagus, canned peas, radishes and spinach. Celery and cauliflower should be freely eaten for their protein-building value.

Oatmeal has just an average value. Mixed with milk or cream, it is a valuable blood food, although rich in fats and carbohydrates as well as protein.

LETTER FROM LESLIE PRESCOTT TO LESLIE PRESCOTT, CARE OF THE SECRET DRAWER

I expect if you are really interested in my affairs, little Marquise, that you have been wondering why I have not written a letter before this to put away in your little secret drawer.

The truth of the matter is, I have been away. You cannot imagine how terribly I felt when I found out that dad was ill and Jack made the matter worse by insisting that I should go to mother and get the money from her.

At last I decided that I would pretend to get the money from mother, but I would sell one or two of those pearls instead. When the string came from the jeweler's carefully hidden in a small grip carried by one man accompanied by another as a bodyguard, I tell you I was impressed and very glad that Jack was not at home.

They counted the beads very carefully before me several different times and found that because of the tiny knots the string was much longer and I could take off a good many without its being really noticed.

Both men suggested that I should put them immediately in a safe deposit vault. I thanked them and told them that I would.

After they were gone I sewed them carefully into a pocket which I had securely fastened to my chemise. Isn't it strange, little Marquise, what knowledge will do? When I did not know the pearls were real I never worried about them. They lay around my dresser table and even hung over my electric fixture over my dressing table with my other beads. But now that I know they are worth over \$200,000 I am simply worried to death to have them about.

Jack was determined that I should take the train to mother's that night and not knowing how to make an excuse for not going, I let him buy the tickets, wondering what I should do with them. For once I was glad that he let some trivial thing keep him from going to the station with me for when I got there alone I exchanged the tickets for New York.

I sat up in my stateroom during

the whole journey and when I got into New York it seemed to me that every one who looked at me knew I was carrying such a valuable package about me.

After I had arrived in New York I didn't know exactly what to do. My whole family was well known at Tiffany's and the other big jewel marts. Finally I decided to take the bull by the horns and I went to see old Mr. Cocoran, who had been my father's attorney as long as I could remember.

He was delighted to see me. Called me "little girl" just like he used to

and was so concerned when I told him about my father that I could hardly bring him back to what I wanted to say to him. Finally I got the matter out.
