

STUDIO Gossip

The Voice From WEAF

ORGAN recitals by Arthur Hays are being broadcast by WOAW, direct from the World Theater at Omaha every Saturday, starting at 11:30 p. m. Seven microphones are being used to pick up the music of this huge organ, which is said to be one of the largest organs in the middle west.

Indiana high school and college basketball scores are being broadcast by WDAF every Friday and Saturday evening.

Setting-up exercises by R. J. Horton, physical director of the Detroit Y. M. C. A., are being broadcast by WWJ, the Detroit News station, every day at 7 a. m.

Frank La Forge, the concert pianist, who was heard on the last Brunswick hour of music program, will broadcast a special program of piano numbers from WOR, Newark, Saturday evening, starting at 7:45 central time. This program will also include several soprano solos by Grace Demans and Madeleine Hulziger. For those who enjoy the better class of music this program should prove very attractive.

The Philharmonic Orchestra, consisting of 103 pieces, will be broadcast direct from Carnegie Hall, New York City, Wednesday evening, Jan. 28, by WEAF and several of the large Eastern stations. This program will start at 7:15 central time and last about two hours.

The second of a series of short thrift talks will be given over KOA Wednesday evening, Jan. 28, by Clarke Mitchell, vice president of the Denver National Bank. His subject will be "Does Your Banker Know You?" Other features on the program consist of a one-act comedy, "Modesty," by the University of Denver players and popular and semi-classical numbers by a host of artists.

The program incidental to the semi-annual meeting of the business organization of the United States Government will be broadcast direct from Continental Memorial Hall by station WCAP, Washington, Monday evening, Jan. 26, starting at 6:30 central time. Addresses will be made by President Coolidge and Gen. H. H. Lord, director of the budget. Music will be furnished by the United States Marine Band, directed by Capt. Wm. H. Santemann, first leader.

MIDNIGHT FROLICS by Ted Miller's Crazy Hotel Orchestra, playing at Mineral Wells, Texas, are broadcast by remote control by station WBAP every Sunday evening from 11 to 12. This orchestra is under the direction of Eddie Kerner, a well-known Indiana boy, who has many friends in Indianapolis.

"Ten Nights in a Bar-room," the well-known old English play, will be put on the air from WOC, Davenport, on Monday evening, Jan. 26, at 10 o'clock central time.

The comedy "Billy," by George Cameron, in three acts, will be presented by the WGY Players this evening, starting at 7:30. The action of the story takes place on the upper deck of a steamship and is said to

In Radio Editor's Mail

Communications are solicited from Radio Fans in regard to Interference, Programs and Information.

Times Radio Editor

Can you tell me what was the matter with WTAM Saturday evening? I enjoy the dance programs broadcast by this station on Saturday evenings very much, but failed to find them last Saturday. Were they on the air? A RADIO FAN.

WTAM was on the air Saturday evening with their regular dance program, but they are using a new wave length of 361 meters in place of the old wave of 390. They have not as yet officially changed their wave length, but are using this new wave for test purposes.

Thank You

Times Radio Editor.

I have been following the radio programs published in the Indianapolis Times for the past several weeks and have found them to be the best and most accurate of any radio programs published anywhere.

E. E. Hendricks

835 N. Garfield Ave.

Times Radio Editor.

As an enthusiastic radio fan I desire to suggest that some measures be taken to eliminate interference. I want to say that it's enough to make a man swear when he is receiving a beautiful, artistic program from some powerful station to have it all cluttered up with a loud buzzing, crackling, crashing noise. Particularly is this the case in the northeast and eastern sections of the city. I really believe that the folks who have been creating the objectionable interferences are quite unaware of the effects. I mean those who have oil furnaces in their homes, battery charging outfits not properly grounded, etc.

Of course there are many other things to cause interference with good radio reception as well as those mentioned. To my mind, if there is one thing on earth that hinders the sale of good receiving sets and parts it is the knowledge of the prospective buyer that he cannot get around these interferences. So in behalf of the radio fans, I suggest that your splendid department inaugurate a special department on interference causes and how to eliminate the same. In doing this you will deserve the gratitude of thousands of Indianapolis radio fans. It's a sure thing if radio is to achieve its proper niche, something must be done.

Sincerely yours,
ROY L. FRAZIER,
1515 N. Olney St.

As stated in Mr. Frazier's letter, interference is spoiling many excellent radio programs in Indianapolis. A Broadcast Listeners Association is badly needed in Indianapolis to stamp out this interference. With the proper cooperation of radio listeners a great deal of this interference can be eliminated. The Radio Editor of The Indianapolis Times would like to hear from radio listeners who are in favor of such an organization. Address your letters to the Radio Editor, Indianapolis Times.

KFRU, the new station at Bristow, Okla., which came on the air last week, has much to commend it to the listener in. Its programs are well directed and the quality of the transmission is all that could be desired. I listened critically to the piano, to find that instrument beautifully recorded from deep base to high treble, with the tone perfectly preserved.

Doctor Donald B. MacMillan, F. R. G. S., the famous Arctic Explorer, just returned from his eighth expedition into the frozen north, will talk at midnight Central Standard Time, Saturday, Jan. 24, from Station WEBH, the Edgewater Beach Hotel, Chicago, 376.7 meters.

Sailors injured while at sea on Great Lake vessels will be treated by wireless directions from physicians of the United States Marine Hospital in Cleveland, Ohio.
