

## WILL GET 'MONEY' BILL NEXT WEEK

### Appropriations Are Being Slashed to Bone.

The State Legislature will get the Administration appropriation bill next week, probably on Friday, according to Life Frazier, State budget clerk.

The Budget Advisory Committee named by former Governor Branch to assist the budget clerk has been working on the mass of figures for the past two weeks and the complete budget will be handed to Governor Jackson Monday or Tuesday.

According to a committee member today the appropriations asked, which totaled approximately \$28,000,000, will be slashed so that "there won't be enough to go around."

Little consideration is being given report of the State survey commission in framing the budget, the committee taking the position it cannot anticipate what the Legislature will do. Should offices be combined or new boards be created the board will meet and provide for necessary appropriations.

## Assembly Sidelights

Albert Snyder, representative of the W. B. Burford Company, is one of the busiest men about the Legislature. "Al" takes care of the printing of all bills, calendars and any other printing which may be required by the Assembly.

Senator Dickerman, Indianapolis, is father of a legislative measure ready for introduction next Tuesday. It was learned today.

Final draft of the bill will be made Monday and it will pass into the hands of Governor Jackson immediately, to receive the stamp "administration measure."

Both the highway commission and the railroad are said to be backing the measure, because of its specific provisions toward safeguarding human lives. Equal division of costs attending grade separation work, instead of the general rule whereby the railroads pay three-fourths, it is said enlisted cooperation of railroads. On State highways and in Indianapolis costs now are equally divided, but elsewhere railroads pay three-fourths.

The highway commission favors such a law because it is a definite step toward safety, although it would materially increase costs of road work. Grade elimination is another step in the program favored by the railroads because of the large number of recent crossing accidents.

## Through Smog

ALVIN C. REESE, watchman in the fire tower on the Merchants Bank building, exhibited the eclipse to a group of visitors with great pride, bustling about opening windows for photographers and telling about the thirty-five mile view to be had from his perch.

"It's pretty clear today," he said, peering into the smog for possible fires. "Been bad for a few days. The other day I couldn't see twenty feet."

A sea of smoke rolled northward, punctuated here and there by white clouds of steam from engines. It somewhat resembled the burning of Rome.

How the watchman could ever discover the puny smoke from a mere building burning down is a question. One could see at least four blocks without much difficulty.
