APRIL SHOWERS FORECAST HERE

Armington Also Reviews Stormy Record of March.

April showers, which, according to rhyme, bring May flowers, were forecast for Friday by the weather bureau. Probably thunderstorms, too, J. H. Armington, Government meteorologist, said. Weather will be somewhat warmer, he said.

Another indication that spring has surely arrived was the announcement by Armington that no more shippers' forecasts would be issued unless freezing weather was expected.

April is starting out much better than March. March ran true to form, 50-50 between the lion and lamb, Armington said. Statistics showed average temperature was 40 degrees above zero. The warmest day was the 24th, when a temperature of 75 degrees was recorded, 9 degrees below the high mark for the month, set March 24, 1910.

March 2 the mercury dropped to 1 degree above zero, 1 degree higher than the low record of March, set March 7, 1899.

By United Press
CHICAGO, April 2.—Sixty per cent. of all cases of dislocation of the jaw are found among women, Dr. Dudley Reed, medical examiner for the University of Chicago, declared today.

"But," he added, "although women talk more than men do, that isn't the cause of the accidents. It's yawning that does it. It indicates that women are terribly bored when any one else is talking, and that they yawn frequently, which causes dislocation of the jaw."

Rev. Ollie G. Ragan of Lexington, Ky., is conducting a unique revival at the new W. Michigan St. M. E. Church. Services are being held each night this week at 7:30 o'clock.
