

PROSPERITY OF ROADS ON RISE

Records Being Smashed
Every Week.

Times Washington Bureau.
WASHINGTON, Oct. 9.—Railroads continue toward unprecedented prosperity. Present conditions continuing, the roads are in position to earn more revenue from freight in 1925 than any previous year. At the end of July, freight revenue was more than \$52,000,000 behind the 1923 figure for the corresponding period. Since then, however, the roads have been crashing records as fast as they encounter them. For eight consecutive weeks freight loadings exceeded the million-car mark. During the week ending Aug. 29 a total of 1,124,436 cars were loaded, the greatest freight week ever recorded. And the very next week the roads reported almost as great a figure. The result of this sudden boom is that the railroads at the end of September had loaded 35,627,852 cars since the beginning of the year, exceeding the 1923 record by 482,917 cars. While revenues are soaring, railroad operating expenses are declining. Top operating figure was \$5,954,393,793 in 1920. In 1923 it had declined to \$4,999,383,388 and is expected to go still lower this year.

CITY LOSING AIR ROUTE

Indianapolis Must Petition for Re-
advertisement of Bids.

By Times Special.
WASHINGTON, Oct. 9.—Indianapolis business men should submit a petition at once for the readvertisement of the Chicago to Birmingham air mail route, through Indianapolis, officials of the postoffice department said today, following announcement of Postmaster General Harry S. New that no award would be made on the one bid submitted. If Cleveland submits a petition first for a route from Cleveland to Birmingham it probably will be accepted and later opened for bids, it was said. Indianapolis has been asking for the air route, but unless immediate action is taken, the new route may not include Indianapolis.

Propose Your Own Terms

This handsome heater embodies the same principle employed in a furnace, that of heating by distributing currents of warm air. In addition it throws into the room an intense added heat due to the radiation of its metal jacket which surrounds the perforated air chamber. By making the fuel do double duty in this manner, it becomes a wonderful coal saver. Your reduced fuel bills will pay for it.
