We advise an early selection.

We Say it With Values!

scale a wall at the Indiana State Woman's Prison, Sunday, Oct. 10, and escape. Mrs. Carl today told a Times reporter that she had no other motives and that she intended to return to the prison after she saw her sister and serve the life sentence imposed on her by a jury in Greenfield, Ind., in 1922, when she was charged with poisoning her husband and father-in-law, to collect insurance.

"I know I was nervous and easy to detect," she said, "and I walked until the blood ran from my toes when I took my shoes off. I was afraid to come in at night and I was afraid to stay out. I stood it as long as I could and Friday night I wrote letters, one to Mrs. Elliott, the prison superintendent, in which I told her not to look for me any more that I was coming back after I saw my sister. Another was mailed to my attorney.

Ambition Thwarted

"After all, my one ambition was thwarted, I have never yet seen my sister whom I understand suffered a relapse when she heard about me. I can see nothing in the future," said Mrs. Carl, with tears in her eyes, as she walked back to her cell.

Detectives here worked on a theory that a man met Mrs. Carl at the prison, supplied transportation, and gave her money. Mrs. Carl would not talk on this subject. Officials guarded against her threat to take her life.

Mrs. Carl will be deprived of all luxuries at the Woman's Prison, according to Miss Margaret Elliott, superintendent. She will no longer be a trustee and will be deprived of communication with other prisoners and visits from friends for three months.

MOVIE WILL BE SHOWN
"A Day at Sunnyside," the new motion picture devoted to an exposition of Marion County's tuberculosis sanatorium at Oaklawn, will be shown as part of the program of a meeting of the B'nai B'rith at the new Beth-el Temple, Thirty-Fourth and Ruckle Sts., at 8 p. m. today.

WRINGER—Four-position wringer. Positive safety release for releasing pressure on rolls. Control levers for operation of wringer within easy reach of operator at all times. Wringer holds automatic roll in four different positions. One of the safest wringers made.

DRIVING MECH-
ANISM—A simple cut gear transmission. Flat belt drive with automatic belt tightener.

WRINGER—Four-position wringer. Positive safety release for releasing pressure on rolls. Control levers for operation of wringer within easy reach of operator at all times. Wringer holds automatic roll in four different positions. One of the safest wringers made.
