**Diamond Miners Carry Stones Away In Flesh.**

By Times Special  
KIMBERLY, South Africa, Oct. 16.—As a precaution diamond mine officials closely examine every scar on workmen's bodies before they are permitted to leave the mines. An aged Kafir workman recently carried out two diamonds as large as beans. He slit the flesh between his fingers, imbedded the diamonds and let the flesh heal over the wound. When on the outside he reopened the wounds and took out his diamonds.

**Lack of Hallmark Ruins Business of Authentic Jewelers.**

By United Press  
LONDON, Oct. 16.—Lack of an official hallmark for platinum has led to the flooding of the English

market with fraudulent imitations under such names as "white gold" and "dental alloy."

In consequence the exclusive West End jewelers are finding themselves at a disadvantage in competing with foreign rivals having definite hallmarks. They plan to ask the government for the passage of a bill officially designating a platinum hallmark soon after Parliament convenes in November.

**ARE YOU VERY DRUNK?**

**Intoxicated Persons Can't Handle a Cigaret, Says Doctor.**

By United Press  
BELFAST, Ireland, Oct. 16.—The "cigaret test" is the latest of the schemes for determining the state of a man's sobriety—or lack of it. A Belfast saloon keeper was arraigned charged with permitting drunkenness in his saloon. The police stated that the man supplied with liquor was dazed and staggering. Where upon the saloon keeper

called as witness for his defense a physician who was in the saloon at the time. The doctor testified, "I gave the man a cigarette to smoke, which he did with deliberation and neatness. This would have been impossible in the case of a drunken man."

The jury returned a verdict of "Not guilty."

**BABY CARRIAGE WANES**

**Decreased Demand Attributable to the Automobile.**

By United Press  
TOLEDO, Ohio, Oct. 16.—Despite the fact that babies are being born in the United States at the rate of

one every third seconds, the use of baby carriages is falling off.

This bit of sociological phenomena was divulged by J. Weir Coover, secretary of the Gendron Wheel Company, one of the oldest baby carriage concerns in the country.

Coover attributed the decreased

demand to the automobile, to the danger of crossing the streets and to increasing apartment houses ex-

istence.
