

## WARM VALLEY SEEN IN ARCTIC

Airplane Explorer Finds  
Mysterious Land.

*By United Press*  
PRINCE RUPERT, B. C., Oct. 16.—More tales of a sub-tropical valley near the Arctic circle in the upper regions of British Columbia were told here by Col. J. Scott Williams of Montreal, who has completed a three months' airplane expedition in the district.

The valley lies north of Liard and the northernmost white settlements. There grass and verdure are found in amazing luxuriance. Flowers are enormous and much of the vegetation resembles that of tropical regions.

This strange valley gets its individuality from hot springs. Although the surrounding mountains are covered with snow and ice, the springs keep the valley warm.

As wonderful as the valley seemed to Scott and his mechanic, the airplane was equally as wonderful to the natives in various northern settlements.

They regarded with awe two of their number who were given rides in the airplane.

ANCIENT CORN GROWS

*By United Press*  
VERNAL, Utah, Oct. 16.—Seed from corn that grew in Utah long before the advent of the white man, is yielding from two to five ears to the stalk, on the farm of Jefferson Hall near here.

The seed was found in an ancient cave of the cliff dwellers. Twelve hills of the corn was planted, but only two hills grew.

Some of the stalks have attained a height of seven feet, while others are maturing at a height of four. A peculiarity of the ancient corn is that the leaves are much wider than the ordinary corn, some of them reaching a width of five inches. It also yields a greater number of ears, about five growing to the stalk.

## ENERGY FOUND IN BIG STORMS

### Power in Lightning Flash Is Stupendous.

*By NEA Service*

LONDON, Oct. 16.—There is not a single second in a year without at least 100 lightning flashes. The Blue Book, issued by the Meteorological Office says the world experiences 16,000,000 thunderstorms a year, or an average of 44,000 a day.

The amount of energy released is too stupendous for the mind to grasp, but the water power the world has harnessed is 25,000,000 horsepower.

Double that amount is represented by one flash, consequently in any given second there is released from the clouds more energy than the world's water power yields in six months.

### Intense Headaches

"FOR several years I suffered with very intense pains in my head," says Mrs. Julian Warren, of Batesburg, S. C., whose picture is printed here.

"These would come on periodically and would last for days. I would nearly go crazy; the pain was something awful. Nobody except a woman who has gone through with such suffering can understand it."

"I fell away until I was just a shadow. I could not eat. I had no appetite at all. Nothing tempted me, no matter how much I had liked it before. I was steadily losing flesh and seemed to be on the downhill, always getting worse."

"I was very nervous and the children bothered me dreadfully. I know now I was as cross as two sticks, but at that time I was so ill I did not realize my condition, or how irritable I was."

"Some years before I had taken Cardui for womanly troubles, so I told my husband to get me a bottle and I would try it. It really surprised me how fast I began to recover. After I had been taking Cardui a short time my appetite picked up. I began to eat and to sleep better and then I began to pick up in weight. I saw I was regaining the ground I had lost and was delighted. I kept up the medicine for some months until I was a well woman."

"Now I can do a good day's work and it does not bother me at all. I am equal to my tasks as a farmer's wife and I give all the credit to Cardui. I recommend it to all suffering women."

Cardui is on sale at all druggists'.

# RICHMAN'S CLOTHES—All All Wool

The Great Richman Factory at 1600 E. 55th St., Cleveland,
