

TREES USED UP FOUR TIMES AS FAST AS GROWN

Chief of Forest Service Cites
Serious U. S. Domestic
Problems.

Washington Bureau.
WASHINGTON, Oct. 30.—The American people today are using lumber four times as fast as it can grow.

Immediate conservation measures. W. B. Greeley, chief of the United States Forest Service, issued this warning following announcement by the Census Bureau that the United States consumed thirty-six billion board feet of lumber during 1924.

"The fact that nearly all important industrial and agricultural regions are consuming billions of feet of virgin timber from the South and West and growing but little on forest lands within their own boundaries is far from reassuring to those interested in forest conservation," said Greeley.

In 1923, when lumber production reached its highest point, twenty-six states produced less lumber than they consumed.

"In the northern and eastern sections of the country more than 30,000,000 acres, once heavily timbered, now contribute but little to the nation's lumber cut.

"California, one of the State pos-

sessing the greatest virgin forests, in 1923 consumed more than twice as much lumber as she produced.

New York, Illinois, Michigan, Ohio and Pennsylvania, all of which, except Illinois, were once leading lumber producing states, imported between one and two billion feet each.

"The solution of the problem is plain. All forest land must grow timber crops, and further inroads upon the country's virgin timber should not result in increasing the present vast acreage of idle forest land."

HEARTBEATS COUNTED

LIVERPOOL, Oct. 30.—The human heart as a machine is the most

industrious part of the human body. It has been figured out on an average basis of seventy beats to the

minute that the heart beats 4,000 times an hour, 100,000 a day and

more than 30,000,000 times a year.

FOREIGN POSTAL RATE ANNOUNCE

Postmaster Bryson Gives
Out Schedules.

The public insists on setting its own stamp rate on letters and post cards.

Despite the fact that time and time again postage rates have been published, it seems that about 20 per cent of the private mail matter is sent under the wrong stamp denomination, postal officials say.

In order to prevent additional mistakes, especially in the mail sent to foreign countries, Postmaster Robert H. Bryson today announced

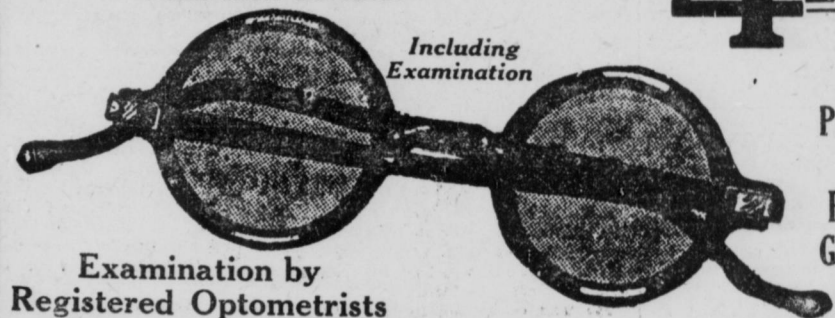

the new foreign rates, effective this month. The 2-cent post card rate applies in the following countries: Argentina, Bolivia, Brazil, Canada, Chile, Colombia, Costa Rica, Cuba, Dominican Republic, Ecuador, Guatemala, Honduras, Mexico, Peru, Nicaragua, Panama, Paraguay, Peru, Salvador, Spain and its colonies and Uruguay.

In all other countries the rate is 3 cents. The 3-cent rate includes Great Britain and all other foreign countries and foreign colonies.

The letter rate to these countries is 2-cent an ounce.

Dinner with daddy at White Cafeteria is a pleasant change for mother and the kiddies "On the Circle."

EYE STRAIN DIMINISHES YOUR MENTAL POWER

Eyestrain is responsible for more troubles than people imagine. Many of the bodily defects that are usually ascribed to poor digestion or over-worked nerves are in reality due to defective eyes. Headaches, neuralgia and other ailments are frequently traced to eyestrain.

STOVE VALUES

40 Years of Service!

For 40 years the Indianapolis Stove Company has been supplying careful Hoosiers with their heating and cooking stoves. Perhaps not the cheapest to be obtained, but the best.

SAVE COAL—RUGS—CURTAINS

Surely it is a boon to the stove owner to be able to heat his home comfortably in the coldest weather without having a house full of smoke and soot to dirty curtains and soil rugs as well as endanger health. The stove pictured here will heat your home comfortably in the coldest weather; will burn any kind of soft coal and will hold fire thirty-six hours. It will heat the floor as well as any base burner using \$15 per ton hard coal.

\$5.00

FOR YOUR OLD STOVE

As a convenience in disposing of your old heater we will allow you \$5 credit for it, providing it is in burning condition.

SMALL DOWN PAYMENT

1925 INDIANAPOLIS RADIO HEATERS

The most modern heating element in existence. A beautiful parlor furnace in mahogany "Non-Chip" enamel. Does not have to be blacked or polished. The Radio heats four rooms perfectly without the least bit of odor or dirt. Uses less coal than any stove for the amount of space heated.

We have just completed a test of the heating quality of a Radio heater. Four thermometers were placed in four different rooms at a point in the rooms farthest from the stove.

It was found that the temperature did not vary 5 degrees in any of the four rooms, including the one containing the stove.

\$79.50

Investigate this heater before you buy. Our salesmen will explain it to you carefully.
