

## MAN ADRIFF IN BOAT FOR DAYS FINALLY SAVED

Suffers Agony From Hunger and Thirst During Trip.

*By Times Special*  
PLYMOUTH, England, Nov. 13.—Adrift in an open boat in the English Channel, most of the time without sight of the lights of Plymouth, William Boasden spent four days enduring tortures of hunger and thirst.

Boasden went fishing in his motor boat early one morning. Going out to sea, he had made a good catch when at noon the roughening water decided him to turn homeward.

When Boasden started the engine, the driving chain snapped. He repaired it and started again. The chain snapped in two more places.

At first Boasden contented himself with shouting and waving to passing boats. But they, not contemplating the possibility of a shipwreck so close inshore, thought he was having a good afternoon and waved and shouted back.

Thereafter for four nights Boasden stayed at the tiller, keeping the boat's head into the wind, and for four days tried with an emergency sail and a pair of oars to reach shore against a steady adverse wind.

On the morning of the fifth day a motorboat approached near enough to read Boasden's signals and to hear his shouts of distress.

### HUGE CHURCH PLANNED

Richmond Congregation to Spend \$100,000 on Building.

*By Times Special*  
RICHMOND, Ind., Nov. 13.—A new church to cost \$100,000 is planned by the First Friends Church here, according to Dr. H. C. Bedford. The church is the consolidation of the East Main and South Eighth St. churches.

## Talk From Witness Stand—Eats From Lunch Stand

Mrs. Elizabeth Whitlock (left) and Mrs. Ella Gatewood (right) in charge of Women's Relief Corps lunch stand in Noblesville courthouse corridor.

Hot lunch in the courtroom! At the Stephenson murder trial in Noblesville, scores of persons who came early to get seats refused to leave them, even at noon recess.

### NEW INVENTION SAVES MILLIONS

A Lamp that Burns 94% Air

A new oil lamp that gives an amazingly brilliant, soft, white light, even better than gas or electricity, has been tested by the U. S. Government and 35 leading universities and found to be superior to 10 ordinary oil lamps. It burns without odor, smoke or noise—no pumping up, is simple, clean, safe. Burns 94 per cent air and 6 per cent common kerosene (coal oil).

The inventor, J. N. Johnson, 609 W. Lake St., Chicago, Ill., is offering to send a lamp on 10 days' FREE trial, or even to give one FREE to the first user in each locality who will help him introduce it. Write him for full particulars. Also ask him to explain how you can get the agency, and without expense or money made \$250 to \$500 per month—Advertisement.

"What was the fashion in 1924?" he asked Mrs. Louisa Annie Ida Giddings, a leading dress designer. "Straight and narrow dresses," she replied.

"Why was that?" "Fashions alter. Some years skirts are worn loose and some years tight. We wouldn't do any business if we didn't alter the style," Mrs. Giddings confessed.

"Then the object of fashions is to promote business?" asked McCordle.

"Yes."

"And health is a secondary consideration?"

"Yes, we try to alter the styles every season to make women leave off their old clothes and buy new ones."

And effort was made later in the trial to determine whether, and why, styles originate in Paris. Some British designers denied that Paris was the fashion center, and declared that in many cases French dressmakers get their clothes here, take them to Paris, label them, and sell them as French creations.
