

HOG MARKET REMAINS FULLY STEADY

RAILS CONTINUE FORWARD MOVE; MOTORS SLUMP

New York Central Feature of Strength in Carriers.

Average Stock Prices

Average price of twenty industrial stocks for Thursday, Dec. 17, 1925, was 112.38 (previous high, up .86).

United Press Dec. 17.—Opening transactions followed the line of yesterday's trading with the rails continuing their forward movement and the motors still under pressure. New York Central was the principal feature of strength in the carriers moving up to around its best level since 1909 at 131 1/4. All of the other active rails showed fractional advances on fairly active trading.

Industrial shares were buoyant around noon due to expectations that announcement of American car readjustment would be used as the basis for a good rise.

Another factor in the improved tone of the general list was the renewal of call money at 4 1/2 per cent. for the first time since Nov. 27, the date which also marked the rise in the rate to the 5 per cent level which has obtained during the past eighteen days.

Produce Markets
