

MEN TO MERGE INTO ONE BIG CHURCH BODY

Universalist Leaders Make
Plans for the New
Year.

"The plans, initiated at the recent Syracuse convention, for merging the various men's organizations in the Universalist Church with the National Laymen's Committee, have been worked out," announced Judge Robert W. Hill, national chairman of the committee today, at the Universalist headquarters in Boston, Mass.

"Members of the Laymen's committee will approach the Universalist Comrades, men's bible classes, clubs and other men's organizations in the individual churches, asking for their cooperation at the time of the annual meeting, which in many of our churches takes place in January."

Plan of Work

"Each men's organization in the churches which have accepted the five year program of the Universalist Church will have one or two members to represent them on the national Laymen's committee. These men will be nominated by the State or district chairmen of the Laymen's committee and selected in recognition of special service rendered their local church and denomination by the membership committee."

"Members of the committee who are business and professional men of high executive ability, have made a special study of church problems. A series of three booklets, the result of this research, has already been published, a financial plan for Universalist churches, a booklet on church organization and administration, and a pamphlet on church publicity. The committee is ready at all times to discuss individual parish problems and to help in solving them."

A Good Start

"We start the New Year with half the amount of the five year program raised," continued Judge Hill. "It will not be long before the other churches will accept this program; and when they do, the national Laymen's committee can work in closer unity with about the Universalist laymen throughout the country."

Dr. John Smith Lowe, national superintendent of the Universalist church said today: "The national Laymen's committee is bringing about a renaissance in the Universalist church; and everywhere laymen who never before had an interest in the church are coming forward to take up their share of this work."

Adams added that at this time of the year industry and business are making an inventory of their wares. It might be well for us to make an inventory of ourselves, he said. O. N. Sappen-
