

ENGINEERS FOR TWO SCHOOLS ARE SELECTED

Special Meeting Likely on New Shortridge Location.

First forward steps of the Indianapolis school board in carrying out the school building program were taken Tuesday night, when all board members approved seeking a larger site for Shortridge High School and architects and engineers were selected for two grade school buildings.

Minority members approved the action taken several nights ago by the building and grounds committee, which decided to select a location of about twelve acres, farther north and east, than the one at North Fourth and Meridian Sts.

Several sites are being viewed. The present site will be reappraised. A special meeting probably will be held to consider sites.

Minority member Fred Bates

Watch Your Frail Pony Child Grow Strong Take on Weight—Quick

Take Cod Liver Oil the New Tasteless Way—in Sugar Coated Tablets.

In just a few days—quicker than you ever dreamt of—these wonderful fish making tablets called McCoy's Cod Liver Oil Compound Tablets will start to help any weak, thin, under-nourished little one.

After sickness and where rickets are suspected they are especially valuable. No need to give them any more nasty Cod Liver Oil—these tablets are made to take the place of that good but evil smelling, stomach upsetting medicine and they surely do it. They do put on flesh.

Ask Hook, Goldsmith Bros. or any druggist for McCoy's Cod Liver Oil Compound Tablets—as easy to take as candy and not at all expensive—60 tablets 60 cents.

Be sure and get McCoy's, the original and genuine and give the child a chance for 30 days. If you aren't delighted with results your druggist is authorized to give you your money back. Millions of boxes sold yearly—so beware of imitations.—Advertisement.

Gosh! Suppose It Had Been Soup

By Times Special

ST. LOUIS, Mo., Feb. 10.—Table etiquette wasn't part of the education taught John Reynor, so he's in jail today.

Patrolmen walking near a restaurant heard an unusual noise coming from the darkened building. It was a steady clicking accompanied by loud sighs.

Entering the building they found Reynor stolidly tearing a piece of beef with his teeth—and making a horrible din about it. He admitted burglarizing the place.

Johnson said it was "a fine thing to look for a better location, if it didn't take too long." Charles R. Yoke reminded majority faction members the new structure must be ready for occupancy Jan. 1, 1929. At that time the old Shortridge property owned by the State Life Insurance Company, will be razed for a modern office building.

McGuire and Shook were rechosen as architects for School 9 and D. A. Bohlen & Son for School 33. Engineers are Snider and Ratz and Charles R. Ammerman.

Architects and engineers were chosen under a new contract form calling for the board to select the architects and engineers separately.

Business Director Ure M. Fraser was authorized to advertise for bids on heating and ventilating, electric wiring and plumbing for School 78. Despite opposition by the minority faction, the revised plans accommodating the D-I heating and ventilating system manufactured by Clarence C. Shipp were approved.

Johnson asked if Shipp manufactured the system.

"Why do you always throw that man's name at us?" Vonnegut asked. "He seems to be some kind of a boy-man you're trying to scare us with. Well, you can't scare me with his or any other man's name."

The majority faction cancelled the contract with Bass, Knowlton & Co., architects, for drawing plans for School 14.

The board has spent \$10,000 more than allowed in the budget for purchasing school grounds. Members discussed buying a site for School 37.

CUT THIS OUT—IT IS WORTH MONEY

Send this ad and ten cents to Foley & Co., 2335 Sheffield Ave., Chicago, Ill., writing your name and address clearly. You will receive a ten-cent bottle of FOLEY'S HONEY AND TAR COMPOUND for coughs, colds and hoarseness, also free sample package of FOLEY PILLS, a diuretic stimulant for the kidneys, and FOLEY CATHARTIC TABLETS for Constipation and Biliousness. These wonderful remedies have helped millions of people. Try them!—Advertisement.

GOVERNOR FOR WORLD COURT

Jackson Indorses It in Washington Speech.

By Times Special

WASHINGTON, Ind., Feb. 10.—Governor Jackson surprised the Men's Club of the Christian Church here Tuesday night when he endorsed the World Court, in a speech.

"If America is permitted to participate in the court with the reservations adopted by the Senate, it will afford our nation a contact and participation with what should be the greatest instrumentality in the world for registering the pulse beats of the earth and an opportunity to aid in the settlement of international differences in the interest of permanent peace. Any such instrumentality should be welcomed by all peace loving nations," he said.

Senator Arthur R. Robinson, whom Jackson appointed to the Senate voted against American adherence to the court, as well as Senator Watson.

TEAR GAS FOR MINE RIOTERS

Scranton Takes Precautions Against New Trouble.

By United Press

SCRANTON, Pa., Feb. 10.—Tear gas bombs will be ordered by Scranton police to prevent violence in this district, following the attempt of a mob of 1,000 strikers, to compel the diamond washeries to suspend operations during the anthracite strike, public safety officials announced today.

The riot squad of twenty-five men armed with riot guns continues on duty after dispersing the strikers late Tuesday. Their demonstration was the first expression of mob violence in the anthracite fields since the strike began on Sept. 1.

Owners of the Gibbons Coal Company washery at South Scranton today applied for police protection, claiming the striking miners had threatened to blow up the works.

Police hurried to the scene, but found no trace of any explosives.

BANKERS GO TO PURDUE

By United Press

LAFAYETTE, Ind., Feb. 10.—Indiana bankers were here today to attend the bankers' agricultural school, which gets under way today.

COLDS THAT DEVELOP INTO PNEUMONIA

Persistent coughs and colds lead to serious trouble. You can stop them now with Creomulsion, an emulsified creosote that is pleasant to take. Creomulsion is a new medical discovery with two-fold action; it soothes and heals the inflamed membranes and inhibits germ growth.

Of all known drugs, creosote is recognized by high medical authorities as one of the greatest healing agencies for persistent coughs and colds and other forms of throat troubles. Creomulsion contains, in addition to creosote, other healing elements which soothe and heal the infected membranes and stop the irritation and inflammation, while the creosote goes on to the stomach, is absorbed into the blood, attacks the seat of the trouble and checks the growth of the germs.

Creomulsion is guaranteed satisfactory in the treatment of persistent coughs and colds, bronchial asthma, bronchitis and other forms of respiratory diseases, and is excellent for building up the system after colds or flu. Money refunded if any cough or cold is not relieved after taking according to directions. Ask your druggist. Creomulsion Company, Atlanta, Ga.—Advertisement.

BOARD TO BE GUESTS

Extension of Pleasant Run Blvd. from Washington St. to English Ave. will be recommended to park board members who will be guests of the Irvington Civic and Welfare Association, Thursday noon at the home of George Johnson, 32 Layman Ave.

The Tomorrow of Gasoline

What does the future hold, in store for gasoline in its relation to man?

Will there be new uses for it? Will there be enough to go around?

What will the price be? It is interesting to contemplate its probabilities in our rapidly changing world.

Fifty years ago, oil wells were about 70 feet deep. The cost to "bring in" oil was a few hundred dollars. Today, wells are from 3,000 to 6,000 feet deep and it costs \$50,000 or more to "bring in" oil.

What will it cost in 1930?

Twenty-two per cent of all the oil wells drilled in 1920 were dry—twenty-five per cent of all the oil wells drilled in 1925 were dry.

What will be the percentage in 1930?

In the past twelve and a half years, dry wells cost approximately \$700,000,000 and in the same period producing wells which failed to return enough oil to pay their cost sustained an aggregate loss of another \$500,000,000.

Wherein do these losses affect the price of gasoline, you ask?

They have an intimate bearing, because they must be absorbed by the industry and be spread over the productive wells.

But they supply only part of the answer to the fluctuating price of gasoline.

There are scores of other hazards and factors over which no man or group of men have any control which must be considered.

A few years ago the nation was confronted with what appeared to be an unavoidable shortage of gasoline.

Then the Standard Oil Company (Indiana) by reason of commercially successful cracking processes, which it had developed, saved the situation.

This Company was able to double the yield of gasoline from a barrel of crude.

Without Standard Oil Company (Indiana) cracking processes it is conservative to state that you would be paying a corresponding double price for gasoline today.

That was constructive service of inestimable value. But what about tomorrow? Who knows?

For the week ending January 16, 1926, the daily average production of crude oil in the United States was 76,050 barrels less than it was during the same period of 1925.

For the week ending January 23, 1926, the daily average production of crude oil in the United States was 19,250 barrels less than for the week preceding.

If these decreases continue, the age-old law of supply and demand can be expected to exert itself and the price of crude oil will advance. If history repeats itself, the price of gasoline and other petroleum products can be expected to advance, unless other factors intervene.

It is with these problems that the Standard Oil Company (Indiana) must grapple, that you may have an unfailing supply of gasoline, when and where you want it, at the most reasonable price at which it is possible to supply it.

As long as the world goes on, economic conditions will change and the price of gasoline probably will fluctuate, but the Standard Oil Company (Indiana) with its research and business foresight has done much to stabilize and keep the price down.

Whether the Standard Oil Company (Indiana) will be as successful in inventing ways and means to combat the caprices of nature in the future is to be seen.

But when economic laws thrust themselves into the situation and cause fluctuations in gasoline prices, the Standard Oil Company (Indiana) asks the people of the Middle West to consider the myriad factors having a bearing and known only to those in daily intimate touch with the oil industry.

It asks them to appreciate that this Company is constantly exerting all its energies to supply gasoline at a price which will reflect only the cost of crude oil, manufacturing and distribution, plus a small and reasonable profit.

Standard Oil Company (Indiana) served you yesterday, is serving you today—it will do so tomorrow.
