U.S. ANNOUNCES AUGUST BANNER MONTH FOR AUTOS

Factory Pay Rolls Higher, Says Federal Reserve Board's Summary.

By United Press
WASHINGTON, Sept. 28.—While business generally continued to prosper during August, production in some basic industries declined, the Federal Reserve Board's monthly business summary, published today, revealed.

Textile mill industry and production of steel ingots, zinc and petroleum increased, while the output of pig iron, lumber, coal, copper, cement and sugar was smaller than the month before.

Boom in Auto

Automobile production, however, increased considerably in August, and was larger than any month since April.

Factory pay rolls, after declining in July, increased in August.

Middle Western States during the month increased building activities, but in eastern and southeastern States the volume of building was smaller than a year ago. Contracts for constructing residential structures were smaller than in August, 1925, while work for industrial buildings increased.

Prices Decline

Wholesale commodity prices declined more than one per cent during August, reflecting largely price decreases for grains, livestock and meat products. Prices of clothing materials, fuel and metals increased while cotton, wool, sugar, baking material and rubber prices showed little change in the month.

Meantime the volume of wholesale trade and of sales at department stores increased as compared with the same period a year ago. Stock of dry goods and shoes carried by wholesale firms were smaller at the end of August than last year while those of groceries and hardware were larger.

Department stores, the board stated, showed increased inventories in preparation for autumn trade, but stocks in general were smaller than a year ago.

"As the result of an operation for appendicitis and one for mastoids, I was in terribly rundown condition and just could not get back any weight. I felt worn out all the time and it made me so nervous. I would try to do my housework but would feel that I couldn't walk another step by the time that I had it anyways near finished. Believe me, if you ever feel like I did and you know what I went through—but Todd's Tonic did the work and I am never going to be without a bottle of it in the house. I have gained over five pounds in weight and can now sleep soundly at night and enjoy my food and work daily. Todd's Tonic alone is responsible for my remarkable improvement."—MRS. FRANK A. MINNERS, 814 Chestnut St., Terre Haute, Indiana.

Todd's Tonic, with its wine like flavor, is most pleasant to take. Todd's Tonic is sold at Haas Drug Stores and other good drug stores in Indianapolis and throughout this section.

ASBURY PARK, N. J., Sept. 28.—Jersey has a law which forbids anyone to litter paper or other trash in public places. This law is Police Chief Harry Beatty's hobby. He enforces it to the limit.

Recently he met his nemesis temporarily. An aviator scattered advertising circulars from his plane. Beatty pursued him in an auto. But it was like chasing a butterfly. The aviator would land and the chief would dash up in his auto only to see the plane fly away.

Such was not to be endured. The chief is ready now. He has found a citizen who owns a plane. If that aviator appears again Beatty will go up in the air after him.

Burns points out that under the present law interest of 3.5 per cent a month, or 42 per cent a year, can be charged on loans of \$300 or less in Indiana.

The lender can take a mortgage upon the borrower's property as security, Burns said. And when the loan companies bring about court proceedings they saddle further expense upon unfortunate citizens.

Burns cited the success of one company which charges only 8 per cent a year on small loans as proving that loan companies need not charge the high rate to do business on small loans.

Burns suggested amendment of the present loan law to set the maximum legal rate of interest at 2 per cent a month.

Court records prove, he said, that many companies after making \$60 loans to wage earners have sought to obtain a judgment for \$125, the \$5 being the interest charged at their exorbitant rate.

Capitalists from outside Indianapolis are operating most of the loan shark companies here, he declared.

He asked any persons who have had dealings with loan sharks to furnish him with information to aid in his plan to push through legislation curbing their activities.

Prosecutor William H. Remy has been conducting an investigation of loan sharks, who he charges have been "buying wages" at exorbitant rates.
