

NAVY PROGRAM IS UNCHANGED, SAYS COOLIDGE

President and Wilbur Confer and Indicate Expansion May Be in Aviation.

By United Press
RAPID CITY, S. D., Aug. 9.—President Coolidge conferred with Secretary of the Navy Wilbur today about the future naval building program as a result of the breakdown of the Geneva disarmament conference. Both announced afterward that no immediate changes in plans is contemplated. In Mr. Coolidge's behalf it was announced that the naval program would go on as usual. Now that the agreement has failed, the United States remains in the same position that she was before.

Turn to Airplanes
Mr. Coolidge implied that there might be expansion of the air building program. The only amplification of that statement which Wilbur would make was an explanation that the "usual manner" meant the recommendations of the general board would be submitted to the budget, bureau and the President as required by law before presentation to Congress. While both statements breathed extreme caution, they left a clear impression that some plan might be presented to Congress next session to enlarge the Navy.

Troubles Over Zeppelin
Wilbur also made known that difficulties have arisen between the government and the Goodyear Zeppelin Co., which may prevent building of a new dirigible three times the size of the Los Angeles. The company, said Wilbur, has refused to enter a contract on a cost plus fixed fee basis. It has insisted that in an experimental enterprise it should be permitted more financial leeway. Wilbur intends to give the matter to Congress and let it determine whether the government should drop the plan. The dirigible would be able to carry three fighting air planes and would cost about \$4,500,000. Wilbur also indicated that the contemplated expansion in the air service would be carried forward on larger scale. He estimated that under present arrangements the department would be equipped in five years with 1,000 first class fighting planes.

DISCUSS RADIO SHOW

Most of Space in Manufacturers' Building Reserved.
Plans for the radio show Sept. 3-10, the week of the Indiana State fair diamond jubilee, were discussed by the Indianapolis Radio Distributors Association Monday night at the Chamber of Commerce. Adolph Wagner, president, said it is expected that the date this year will boost attendance. C. C. Mathews reported most of the space of the manufacturers' building already reserved.

ROBBER PLEADS HUNGER

Went Without Food to Buy Tools and Attempt Theft.
NEW YORK, Aug. 9.—After going without food to buy burglar's tools, Martin Honig, 47, Hoboken, was arrested, charged with attempting to rob a jewelry store. Special Officer Frank Richard chased him for several blocks after intercepting his attempt to cut the wire cage of the jeweler's window with a heavy pair of wire-cutters, he said. At police headquarters Honig said he had not eaten for two days. He said he begged money from pedestrians to buy a flashlight, and that he had borrowed his wire-cutters from an electrician.

DOOMED MEN WAIT CALMLY FOR DEATH

Brilliant Lights in Cells of Charlestown Prison Reveal Only Phlegmatic Thought of Fate.

By HENRY MINOTT
United Press Staff Correspondent
BOSTON, Aug. 9.—Three brilliantly lighted cells in the low-walled death house of Charlestown State prison today hold three strangely different men, united by the ties of a common cause. In cell No. 1 (nearest the electric chair in which all three are scheduled to die early Thursday) is Celestino Madeiros, youthful Portuguese, whose fate has long been sealed.

In cell No. 2 is Bartolomeo Vanzetti, philosopher and fish peddler, a big, silent, thoughtful man, proud and defiantly anarchistic. The third cell holds Nicola Sacco, a mild-mannered little man who long ago decided that death as a "martyr" to the cause he represents was preferable to vindication. Seated at a small table in front of the row of cells are two guards, watching day and night the last-hour movements of the doomed men. They will not watch much longer. Three times during the minutes after midnight Thursday Warden William Hendry's hand will fall. Three times an unseen hand will respond, and in less than half an hour the seven-year-old case of the Commonwealth vs. Sacco and Vanzetti will at last have been closed. But though they must have realized today that only a legal miracle could lengthen their span of life beyond forty short hours, all three seemed to regard their plight with phlegmatic calm. Sacco, weakened by twenty-three day without food, reads and writes but little, spending most of his time on his prison cot with an occasional word to his comrade, Barto. The condemned men cannot see each other, but by speaking loudly they are able to converse.

Vanzetti More Active
More active is Vanzetti, who is spending what may be the final hours of his life reading philosophical works and writing letters to his elderly father and other relatives in Italy. He has just finished reading "The Rise of American Civilization" by Charles A. Beard and Mary Beard. He told a member of the defense committee that he found the book very enjoyable, despite the circumstances under which it was read. Madeiros reads, too, but he prefers magazines with action stories, tales of the West, stories of the sea. He has long since resigned to his fate and the depressing atmosphere of the death house has seemingly had no effect upon his mind. Death prisoners have one advantage over other men confined to the grim, gray building in the shadow of Bunker Hill. They may order almost anything in the way of food, choice viands that never are served elsewhere in the prison.

Madeiros has taken advantage of this privilege. He has ordered fruits and other dainties and has dined on them to his heart's content. But Sacco has not had nourishment in any form since July 17, and Vanzetti has eaten only spasmodically of the simple prison fare. Sacco has not even opened the aluminum box in which meals are served since he started his hunger strike.

Spurn Spiritual Comfort
The three men now occupying the fateful cells have virtually established a death house precedent. Almost never before in Massachusetts has a condemned man failed to welcome the solace of religion during his last days on earth. Sacco, Vanzetti and Madeiros have spurned this spiritual comfort while counting the waning hours now separating them from their doom, though they have been friendly to Father Michael J. Murphy, and the Rev. William Whitney, prison chaplains, who have visited them.

HE Saved—He Won!

The ability to save money was one of the controlling factors that made Lindbergh's great achievement possible. Lindbergh had courage, skill, foresight, persistence, and a spirit of high adventure. But in addition, he had \$2,000, which he had slowly saved from his hard earned wages as a mail pilot.

It was that \$2,000 which he contributed that made it possible to secure the backing which made his epoch making flight possible. Once again, the controlling factor in a conspicuous success was a savings account.

INDIANA MINE WILL REOPEN

No. 29 at Linton Signs—Parley Refused.

By Times Special
TERRE HAUTE, Ind., Aug. 9.—Despite refusal of the Indiana Coal Operators' Association here to accept the invitation of Governor Vic Donahey of Ohio for a joint wage conference for the central competitive field, one of the largest mines in the Linton (Ind.) field, is to reopen under the Jacksonville agreement.

Announcement has been made at Linton by the Vigo Coal Company that it will open Mine No. 29. Rumors say that three other mines in this field owned by the same company will resume operations. The four employ 2,000 men. Phil H. Penna, secretary of the operators' association, declining Governor Donahey's invitation, wrote: "We do not know of any possible way to reconvene the Miami joint conference or of any good that possibly could result from its reassembling." The McClellan Mine, near Terre Haute, employing 180 men, is being put in shape for resumption of operations.

Death Car Driver Held
By Times Special
HAMMOND, Ind., Aug. 9.—John Babik, 19, East Chicago, is dead, and Stanley Madejczyk, driver of the automobile which fatally injured him, faces a charge of manslaughter today. Babik was hurled through the windshield of the auto after it struck a pole. The driver, whom police say was drunk, fled from the scene of the crash.

FIND DISEASES TO KILL BORER

Purdue Director Reports Scientists' Success.

By United Press
LAFAYETTE, Ind., Aug. 9.—Discovery of two parasitical diseases which kill the European corn borer was announced today by Dr. Edward C. Elliott, president of Purdue University. Dr. Elliott received word of the discovery from Dr. G. I. Christie, director of the Purdue agricultural experiment station, who is now in Europe with an international committee, studying the pest as it occurs in continental countries, and enlisting the aid of European scientists in its control.

Dr. Christie's communication declares that scientists of the Pasteur Institute in France have discovered a parasite that destroys the eggs of the corn borer. It is of a different form than that developed in Berlin, called trico-gamma, and also eats the eggs.

It has been discovered, Dr. Christie writes, that if corn borer infested stalks are stacked and covered with potato stalks, the borers will leave the corn and go into the potato stalks. Dr. Christie said the American party has about completed its observations and planned to sail from Europe in time to reach the United States about Oct. 1.

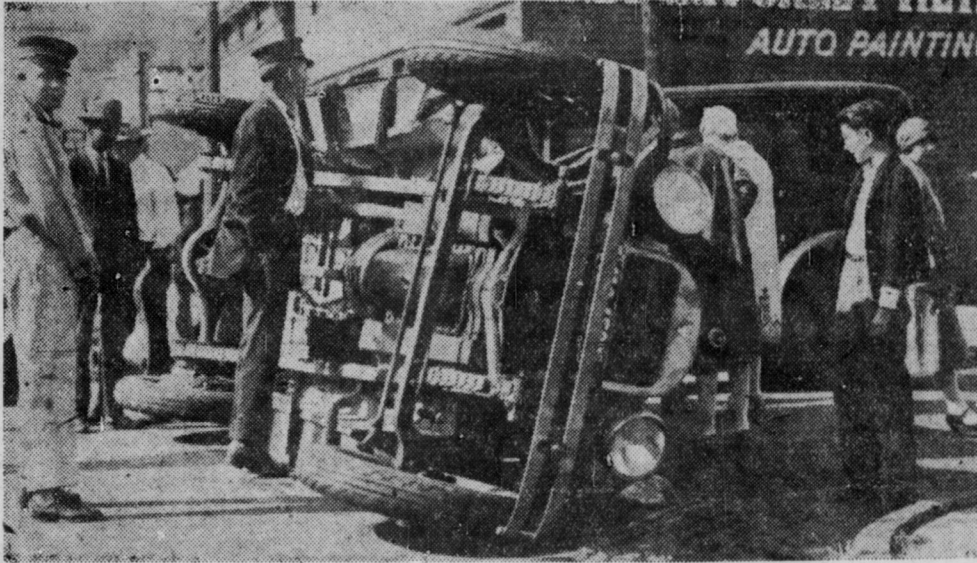

Boy Paralyzed in Movie Theater
By United Press
LAWRENCE, Mass., Aug. 9.—A movie had such an effect on the emotions of Rudolph Pennault, 16, that he was unable to leave his seat after the show. Hospital physicians who treated him said he had suffered a mild touch of paralysis.

Auto Wrecked in Fire Run Crash

The auto David O. Kennedy, 2305 Kenwood Ave., overturned after a collision with a fire truck at Capitol Ave. and Fifteenth St., this morning. Kennedy was severely cut and bruised. The wreck is shown here.

TUNA FISH INVADE WATERS NEAR MAINE

Second Time in History in Locality. Some Weigh 1,000 Pounds.

YORK HARBOR, Maine, Aug. 9.—Several large schools of tuna fish, for the second time in history, have invaded the waters near Boone Island. Andrew Kenny, an assistant lighthouse keeper, reported that some of the fish weigh more than 1,000 pounds, according to Capt. H. I. Hutchins of Boone Island, which is located nine miles off shore. "Members of the summer colony here plan to go after the tunas,

some with harpoons and others will use rod and line. Captain Hutchins said that a small whale had joined one of the schools and was sporting around with the tuna fish near the lighthouse.

Plant to Be Improved

LIBRARY GIVEN LETTER

Dr. Butler Brought Jefferson Document From Europe

NEW YORK, Aug. 9.—President Nicholas Murray Butler has announced that he brought from Italy a hitherto unpublished letter written by Thomas Jefferson, as a gift to the Library of Columbia University from his Excellency the Marchese Misiatelli of Siena.

The letter, ordering a packet of books for Jefferson's private library, was dated Monticello, April 19, 1821, and was addressed to Messrs. De Bures Freres, Rue Serpente, Paris.

MINNESOTA TO WAR ON CRIME

Huge Machine Created for Battling Crooks.

ST. PAUL, Aug. 9.—Minnesota is starting out to fight banditry with every weapon of modern criminal science, coordinated into a closely welded whole. W. F. Rhinow, former State adjutant general, has been made head of a new Bureau of Criminal Identification.

The plan embraces:
1. A staff of expert detectives and criminologists to be stationed at the capitol and to be quickly available at the scene of any big crime.

2. A "School for Sheriffs" where officers will be taught modern methods, including the Bertillon system and police photography.

3. A clearing house for police records, including a bureau of identification which will have records and photographs of every criminal sentenced in the United States.

4. Possible establishment of a central broadcasting bureau in Minneapolis. In addition, each county is to be urged to buy a high-speed armored auto, with a machine gun, and manned by three deputies.

Prisoner Tries Suicide

By Times Special
LOGANSPORT, Ind., Aug. 9.—Albert Thorntson, 22, is in a serious condition at the county jail here after swallowing half an ounce of poison bought for him by a newsboy selling papers to prisoners. Thorntson was arrested at Rochester on a charge of passing a worthless check.

Repeated Filtration Purifies Tiolene

TIOLENE is purified by the costly but safe method of filtering, time and again, through Fuller's Earth. This removes the free carbon and other impurities. And the wholesome color of Tiolene is natural. It is made from Cabin Creek crude which, unlike other crudes, is a clear amber color just as it flows from the ground. Tiolene, therefore, does not have to be "bleached" by acid treatment, so there is no chance of it containing any metal-corroding acid.

The most expert refining, preserves in Tiolene all of the supreme lubricating qualities of Cabin Creek, Super-Pennsylvania crude. Cabin Creek crude is the highest grade petroleum found on this continent and regularly commands a premium over other Pennsylvania grade crudes.

The finished Tiolene is 100% Super-Pennsylvania Motor Oil. Because of its remarkable resistance to heat, wear and dilution, it will give you more miles of safe lubrication per fill.

Tiolene Motor Oil is sold at Pure Oil Company Service Stations and by Authorized Dealers.
