

BOLIVIA SOUNDS NEW PLEA TO OBTAIN ARMS

Inland Nation Wants Neutral Nations to Be Forced to Permit Shipment.

By United Press
HABANA, Feb. 2.—A demand that neutral nations, in time of war, be forced to permit shipments through their territory of war munitions for belligerent countries, was before the Pan-American conference today.

Dr. Costa Durel of Bolivia made the demand before the international law committee.

Its reason was that Bolivia is an inland country without an outlet to the sea, and Durel warned that unless guarantee were furnished that Bolivia could get munitions in event of possible war, she would be forced to maintain a perpetual "armed peace."

The Bolivian demand was a direct follow-up of an announcement earlier in the week that sooner or later the question must be considered of giving Bolivia a direct outlet to the sea. The only outlet practicable would be across the Taca-Arica area, whose possession for years has been disputed heatedly by Chile and Peru.

A concession to United States' views on intervention by one nation in another's affairs was made in the official report submitted to the international law committee by Victor Maurtua of Peru.

A Rio De Janeiro meeting of jurists had recommended that in a proposed international law code the declaration should be made that:

"No State may intervene in the internal affairs of another."

Senor Maurtua's official report recommended that the following section be substituted:

"Every State is independent in the sense that it has the right to

SIDE GLANCES By George Clark

"Darn funny I can't keep a few cigarettes around this house!"

maintain its own welfare and develop itself freely without intervention or control from other States; but in the exercise of this right it must not affect nor violate the rights of other States."

Senor Maurtua's report was interpreted as favoring the United States because of its recognition of a nation's obligation not to violate the rights of other States, while simultaneously asserting the right of a nation to develop peacefully and in security against intervention.

Summing up, the situation at the conference is this:

Mexico is seeking to "rediplomize" the Pan-American Union, but has attempted it in a very friendly and parliamentary way.

Panama is silent about the treaty with the United States.

Nicaraguan delegates have nothing to announce but their confidence in Uncle Sam.

Cuba hasn't aired her aspiration for a bigger preference on sugar under the reciprocity treaty.

None of the many countries which

WINKLER GETS WIDER POWER

Regrouping Gives Dry Chief Full Sway Here.

Increased authority for George L. Winkler, deputy dry administrator for Indiana, has resulted from the regrouping of States which placed Indiana in the Ohio enforcement district, effective Feb. 1.

Under the new arrangement the permit system and financial matters of the Indiana sub-district will be handled by Administrator W. H. Walker at Columbus.

Four additional prohibition agents from Chicago were assigned to Winkler today. The new agents, for a time, will be used only for undercover work in the State, Winkler said.

Enforcement records will be kept both at Columbus and Chicago. In the past all records have been kept at Chicago.

A request that Winkler have virtually complete authority over Indiana enforcement is contained in a letter from J. M. Doran, prohibition commissioner, to Administrator

Liver Doesn't Hurt but Watch Out

The dangerous thing about liver trouble is that it may be present and not recognized as such. No pain probably in the vicinity of the liver, but mysterious sick headaches, dizzy spells, kidney disturbances and probably heart palpitation and high blood pressure.

No organ will bear closer watching than the liver. It's the liver's important job to keep the blood clean of the poisons formed in food waste. Let the liver become sluggish, as it frequently does under the strain of modern living, and the whole system becomes toxic, which weakens stomach, kidneys and heart.

The liver occasionally needs a little help, and there's nothing better for this, as medical men know, than a little ox gall. Ox gall is a remarkable natural stimulant for the human liver, promoting its normal, active functioning. Dioxol tablets are genuine ox gall in dainty and tasteless form, each tablet representing 10 drops of pure ox gall.

To be sure of getting the genuine ox gall, be sure of getting Dioxol. They cost less than 2c each at good druggists.

Free Test Take this ad to the druggist named below and he will give you a free sample of Dioxol tablets. Try them yourself. See the splendid, quick results. One trial of Dioxol and you will want a full package! Special Agent: Haag Drug Co.

ORDERED TO PAY WIFE

Harry Galher, 39, of Chicago, was ordered to pay his wife, Mrs. Grace Galher \$10 a week and deed local real estate to her by Criminal Judge James A. Collins Wednesday.

Mrs. Galher, 3208 Bellefontaine St., charged that Galher deserted her March 1, 1927.

Paul Baker, 22, of Mars Hill was sentenced one to ten years in Indiana State Prison for forgery. He is alleged to have given William Fowley, 628 Fletcher Ave., a fraudulent \$30 check.

DOCTORS SHOW HOW TO END COLDS IN FEW HOURS AT HOME

Many Here Quickly Relieve Head Colds, Coughs and Chest Colds by Home Use of Unique Hospital-Tested Method

Endorsed by Health Authorities as Best Way to End Menace of Colds During This Pneumonia Weather

A pleasant tasting swallow—a night of refreshing sleep—the joy of waking up with a welcome feeling of relief from the misery and threatening danger of a head cold, cough or chest cold.

This, briefly, is the substance of reports showing what has been accomplished in hospital tests and in home use among hundreds of people here through use of Ayer's Cherry Pectoral—a concentrated mixture of wild cherry, terpin hydrate and other ingredients which have relieved even the most extreme hospital cases.

Test cases of the hospital physicians (shown elsewhere on this page) prove the fact that Ayer's Cherry Pectoral has a unique double action which is responsible for the quickness of relief. You feel its comforting, healing warmth as it penetrates through and over the irritated linings of the throat, chest and bronchial tubes. Then it is quickly absorbed by the system, reaching every part of the cold congested area.

This stops coughing almost instantly! In a few hours it checks phlegm, heals irritation, helps allay the feverish, "grippy" feeling and drives out the cold from the nose passages, throat and bronchial tubes.

Mr. Adams had neglected his cold, hoping each day it would "cure itself." Instead it got worse, spreading from his nose passages down towards his chest. Then he called the clinic, where doctors gave him double doses of Ayer's Cherry Pectoral. In a few hours he could breathe freely through both nostrils and coughed very little. The next morning he felt like a different person—rid of the cold.

Just a few pleasant spoonfuls of Ayer's Cherry Pectoral now and you'll feel like a different person tomorrow. Simply follow the hospital directions that come with each bottle.

WOKE UP TO FIND HEAD COLD GONE

By choosing a method that not only removes congestion but actually restores the breathing passages to a strong healthy condition, P. C. Adams found the quickest and surest way to get rid of a disagreeable head cold.

Mr. Adams had neglected his cold, hoping each day it would "cure itself."

Instead it got worse, spreading from his nose passages down towards his chest.

Then he called the clinic, where doctors gave him double doses of Ayer's Cherry Pectoral. In a few hours he could breathe freely through both nostrils and coughed very little. The next morning he felt like a different person—rid of the cold.

Realizing that every common cold may be the forerunner of pneumonia—unless treated properly in time—hospital physicians have chosen a remedy that is ideal for use at home. And numbers of Indianapolis people find, as Miss Ruth Holmes did, that it brings quick, sure relief—often in even the most extreme hospital cases.

Miss Holmes' case is typical. She had neglected her cold, hoping each day it would "cure itself." Instead, it got worse, spreading from her nose passages down towards her lungs. Fearing pneumonia then she called the clinic, where doctors gave her double doses of Ayer's Cherry Pectoral—a concentrated mixture of wild cherry, terpin hydrate and other ingredients used in treating even the most extreme hospital cases.

Relief began with the first pleasant swallow. She felt its comforting, healing warmth—from her nose passages deep down into her chest. That night she could breathe freely through both nostrils and coughed very little. The next morning she felt like a different person—rid of the cold.
