"Eight hours vanished forever from my life"

Says Christopher Morley

The distinguished philosopher of "The Bowling Green" confesses that he doesn't sleep much on railroad trains, but on his first journey over the New York Central Lines he fell asleep in Pennsylvania and awoke in eastern New York, with "eight hours vanished forever from his life"—"hours of complete nothing, a capsule of eternity."

From the Mississippi Valley to the Atlantic Coast the New York Central Lines follow a natural water level route, striking through the Appalachian Mountain barrier at the only low-level pass in the entire range.

Men and women of affairs, who place a high value on restful sleep, say that travelling on the New York Central line is "like riding on velvet."
