

## PUBLICITY MEN IN TWO PARTIES SET FOR DRIVE

Democrats and Republicans  
Organize Staffs of  
Newspaper Men.

BY ROSCOE B. FLEMING  
WASHINGTON, July 17.—The two greatest political publicity machines in United States history are getting ready to grind behind the stage-sets of both parties.

The Republicans have a start on the Democrats. Under Henry J. Allen, former publisher of the Wichita Beacon, as director-general, they have assembled a strong staff whose executives are mainly former Washington correspondents.

Radio to Help  
Democratic plans have not been announced. But they have the large publicity staff which functioned for Governor Smith in the pre-convention campaign, and it is being kept intact and ready to go in New York, directed by the same board of advisers which has served Smith so well in State campaigns.

It is probable that Smith's main publicity work will be done from New York, unless the issue turns on Republican corruption, in which case the Washington office of the national Democratic committee, which has a full-time publicity force, will be active.

The Democrats are in the pleasant position of anticipating a publicity war chest which will come nearer matching that of the G. O. P. than in many years past. They also expect to be helped by the personality of their candidate.

Added to the countless columns of newspaper and magazine matter to be sent out, the biggest radio hookups in history will carry the voices of Hoover and Smith delivering their major speeches, into millions of homes.

**Bureaus in Cities**  
Among the Washington former newspapermen engaged in the Hoover publicity headquarters are A. H. Kirchhoffer, managing editor of the Buffalo News; Harry J. Brown, president of the Gridiron Club of Washington; George Akerson, former Washington correspondent of the Minneapolis Tribune, now Hoover's secretary and a dozen more.

Kirchhoffer will have the job of organizing Hoover press bureaus in Chicago, New York, the border States, the Northwest and other points where the fight is expected to be hottest. Brown is liaison agent between Hoover Work, Republican national chairman, and the press.

## Rules the Elks

Grand Exalted Ruler of the Elks is Murray Hulbert, unanimously elected by the 1,400 delegates at the national convention in Miami, Fla. Hulbert, long prominent in the order, also is a former president of New York City's board of aldermen.

## JUDGE GETS HIS NUMBER

Reckless Driver Plunges Through Traffic, But Is Haled to Court.

CHICAGO, July 17.—William Callahan, 33, a contractor, will be more careful in the future when he is driving.

Callahan, driving in heavy traffic, bumped one car, brushed several others, passed a stop light and sped away, but Judge Freeman L. Fairbank, of the municipal bench, took his license number.

Now Callahan faces charges of speeding, passing a stop-light, leaving the scene of an accident, malicious mischief and damaging property.

## YOUTH IS ON DECLINE

Younger Generation Declines 18 Per Cent Since 1870.

NEW YORK, July 17.—Numerically the younger generation is on the decline, Dr. Ira S. Wile found after completing a Federal census.

In 1870 there were 7,700,000 persons between the ages of 15 and 25 while there were 2,000,000 persons between 50 and 59.

In 1920 there were 18,600,000 persons in the former group and 2,200,000 in the latter group, showing an 18 per cent decline in the younger generation.

## Once There Was a Steer

that went all over the world. But not until after the meat was prepared for market.

The fine hair in its ears went to Paris to be used in an artist's "camel's hair" brush.

The shin bones went to Sheffield, England, where they became knife handles that were carried in men's pockets to South Africa and London.

The sinews and tendons went to Canada and Mexico—first boiled down into glue used in the manufacture of furniture.

Every part of this steer went somewhere and was used—even tiny glands no bigger than peas went to pharmaceutical houses to be made into medicine.

The farmer who raised this steer was glad to sell it to Swift & Company for a good cash price. If he had prepared it for market himself, it would not have been worth so much. Besides the meat, he could have saved only the hide and fats. All the rest of the steer would have been lost.

Swift & Company handles thousands of animals daily and uses every part of them. Economy results.

You benefit by it. Swift & Company's profit from all sources amounts to only a fraction of a cent per pound
