"Mind" is the subject of the lesson-sermon in all Churches of Christ, Scientist, on Sunday, Aug. 19.

The Golden Text is from Proverbs 2:4, "The Lord giveth wisdom: Out of his mouth cometh knowledge and understanding."

Among the citations which comprise the lesson-sermon is the following from the Bible: "This book of the law shall not depart out of thy mouth; but thou shalt meditate therein day and night, that thou mayest observe to do according to all that is written therein: For then thou shalt make thy way prosperous, and then thou shalt have good success."

The lesson-sermon also includes the following passages from the Christian Science textbook, "Science and Health With Key to the Scrip-

tures," by Mary Baker Eddy: "We must form perfect models in thought and look at them continually, or we shall never carve them out in grand and noble lives. Let unselfishness, goodness, mercy, justice, health, holiness, love—the kingdom of heaven—reign within us, and sin, disease, and death will diminish until they finally disappear."

The mid-summer Evangelical revival meetings now going on at the Indianapolis Gospel Tabernacle, North and Alabama Sts., were well attended all of this week and the interest in the meetings is growing night after night. INSULL GRAB OF SCENIC SPOT IS CONFLICT GERM

Cumberland Falls, Place of Great Beauty, May Be Ruined.

BY DEXTER M. KEEZER
Times Staff Correspondent
WASHINGTON, Aug. 18.—Samuel Insull of Chicago, power magnate, shortly will become a sort of public park proprietor if his company accepts the terms of a license for a hydro-electric power development at Cumberland Falls, Ky., recommended to the Federal Power Commission today by its executive secretary, O. C. Merrill.

Merrill recommends that the Cumberland Hydro-Electric Company, controlled by Insull's Midwest Utilities Company, be allowed to dam the Cumberland River above the falls for power development, provided the company agrees not to dry up the falls entirely, and to carry out plans to convert the lake which will be formed into a public boating, fishing and swimming resort.

Issuance of a license has been the

subject of sharp controversy, on the ground that it would destroy scenic beauty at Cumberland Falls. If the Insull company and the Kentucky State authorities approve the license terms recommended by Merrill, Interior Secretary Roy West, formerly close business associate of Insull, will be one of three members of the Federal Power Commission to give final authorization for the power development.

Under terms of the license recommended by Merrill today, which is said to have preliminary approval of Kentucky State authorities, the Insull interests are required to allow enough water to continue to run over the Cumberland Falls to make a decent showing, and to beautify their development and make it accessible to tourists.

Cost of the park development, it was stated at the commission, is to be defrayed from revenues derived from the sale of power.

This plan, according to public utility experts here, brings into sharp focus one of the knottiest problems with which the Federal commission is faced in endeavoring to facilitate hydro-electric development, and at the same time protect navigation and scenic beauty.
