

WHEAT HIGHER ON OPENING OF FUTURE MARKET

Early Gains in Liverpool
Have Strengthening
Effect Here.

By United Press
CHICAGO, Nov. 1.—Wheat scored moderate gains on the Board of Trade today, following an early gain at Liverpool. Snow storms in Iowa and Nebraska sent corn higher. Oats were little changed in a dull market.

At the opening wheat was 4 cent higher, corn was up 1/4 to 3 cent and oats ranged from 1/4 cent off to 1/4 cent up. Provisions were slightly lower.

Uncertainty and nervousness pervade the wheat market. Traders are watching Winnipeg as a check on pre-election members in the market here. The northwest has been doing some hedging, but this is normal at this season. Although export business is fairly large, it consists almost entirely of low grade Manitoba.

Readjustment of cash corn prices down to the level of the futures is under way, but a good decline will have to be made before the speculative trade will be affected. Reports of private experts due today are expected to point the corn crop at 2,920,000,000 bushels. New corn arrivals are being absorbed rapidly.

Oats continue quiet, as trading interest is centered in the other grains. Hedging offerings from the northwest have been taken by commission houses.

Chicago Grain Table
