Ties the Score

Because her husband insisted on her being a "homebody," even to the extent of locking all the doors and trying to tie her in bed when she wanted to attend her sister's birthday party, Mrs. Eva L. Gwin, above, of San Francisco, was granted a divorce. Score: One tie, one victory.

UP TO BISHOP IN DAY

Nonmember Mounts to Highest Office in Twenty-Four Hours.

By United Press
INDEPENDENCE, Mo., May 3.—From a nonchurch member to a bishop in a day is the rise of Dr. H. B. Curtis, Kansas City. Dr. Curtis, long an unaffiliated worker, was voted for membership, chosen an elder, and then a member of the general bishopric, the processes necessary for holding the highest office in the Church of Christ.

1,920,000 WIVES ARE EMPLOYED

Husband's Pay Inadequate;
Great Increase Shown.

By Times Special
WASHINGTON, May 3.—Of the 8,346,796 women wage-earners in the United States 1,920,281, or one out of every four, are married, the National Home Study Council, Washington, D. C., reveals, adding that many of them are compelled to neglect their homes and children

and work for wages because their husbands are engaged in unskilled employment, which, in many cases, offers a pay scale lower than the costs of a modest living standard. Furthermore, the council states, while the number of women wage-earners in this country has increased approximately 21 per cent since 1890, the proportion of those who are married has risen nearly 100 per cent in the same period. Besides inadequate salaries of young married men, other vital reasons given for the marked increase in the number of wives now working for wages are the spread of industrialism, high rents, increasing costs of living expenses and the desire to elevate the status of domestic existence.
