FORD TO SPEND HUGE SUM FOR 1930 EXPANSION

New Buildings, Equipment for Plant Embraced by \$30,000,000 Program.

DETROIT, Dec. 30.—The Ford Motor Company has placed a \$30,000,000 a. k. on its 1930 expansion program.

In a statement expressing confidence in the continuance of good business, Edsel Ford, president, announced the company would spend some \$20,000,000 for new buildings in the next twelve months and \$10,000,000 for new plant equipment. The total will not include expenditures for factories in foreign countries, he said.

The huge expansion program was announced the day after the public was informed production of new Ford body models had begun and followed a wage increase for all employees announced a month ago.

"The highest state of development in the history of the Ford Motor Company was reached in 1929," the statement said, "and still further development is contemplated during 1930. Ford production for the first eleven months of 1929 totaled 1,914,842 cars, more than one-third of all the automobiles manufactured in the United States."

Expansion of plants on the Atlantic and Pacific coasts is in line with the "Ford policy of developing and utilizing water transportation wherever feasible and economical," it was stated.

The expansion program was seen as a move to justify the increased returns, the \$20,000,000 annually required by the increased wages demanded upon as an answer to President Hoover's suggestion that industry boom prosperity during the coming year.

TARDIEU WILL DEFINE STAND

Pre-Naval Parley Talk to MacDonald Slated.

By United Press
PARIS, Dec. 30.—Premier Andre Tardieu of France will meet J. Ramsay MacDonald, premier of Great Britain, in London on Jan. 19, in an endeavor to remove any fear of France's defensive attitude at the coming naval conference.

Although French officials feel that the reception accorded the government's declaration of naval principles by Great Britain and the United States was unfavorable in tone, the French leader is confident of reaching a clear understanding in a series of conversations with Ambassador Walter E. Edge and his preference interview with MacDonald.

Tardieu believes that France's attitude may be misunderstood "because of lack of personal contact which has characterized the Anglo-American preliminary negotiations." Ambassador Edge and the French premier held two conferences during the past week and the meetings will be continued until the eve of the London parley.

CANADA FLIERS READY TO JOIN EIELSON HUNT

Aviators Await Improved Aerial Conditions for Dash Into Arctic.

By United Press
NOME, Alaska, Dec. 30.—Three Canadian airmen will join two pilots searching for Carl Ben Eielson in the Arctic wastes near North Cape.

An expedition of three Fairchild cabin planes, in charge of Captain (Pat) Reid, and with B. W. Broatch and Gifford Swartman as co-pilots, is ready to assist in the search for Eielson and his mechanic, Earl Borland, missing seven weeks.

The Canadians, whose planes were brought from Seattle on a coast guard cutter, have assembled their planes, tested them in the air, and will fly to Nome or Teller to begin their search as soon as flying conditions improve.

Pilots Joe Crosson and Harold Gillman, now at their base at the ice-bound trading vessel Nanuk, have been unsuccessful in their search.

Only brief radio messages from the Nanuk serve to break the Arctic silences with news of progress of the search, and these become fewer as the vessel's fuel supply diminishes.

At least a week is expected to pass before Soviet planes can arrive to assist in the search, in response to semi-official requests from Washington.

The one month's food supply of the missing aviators must by this time be exhausted, and unless they have found assistance from Eskimos, officials in charge of the search despair of finding them alive.

WHITE HOUSE TO BE SCENE OF GAY EVENT

Washington Society Will Celebrate With Young Hoover Tonight.

WASHINGTON, Dec. 30.—The sedate east room of the White House will sparkle with youthful merriment tonight for the first time since Alice Roosevelt gave famous parties a quarter of a century ago. Young Allan Hoover is giving a dance.

The President's 22-year-old son, home from Harvard for Christmas, has arranged for a private jazz orchestra which will supplement the marine band, and the dance promises to be one of the highlights of the Christmas social season for Washington's younger set. About 100 guests have been invited.

Washingtonians recalled today Allan Hoover's dance will mark the first "younger set" festivity at the White House since the parties given around "the turn of the century" by Alice Roosevelt, now wife of Speaker Nicholas Longworth of the House.

White House entertaining during the Wilson, Harding and Coolidge administrations was confined to formal receptions and dinner parties, attended by older persons. John Coolidge participated hardly at all in Washington society.

Although the party tonight is expected to be gay, it will not last long. It was planned only a few days ago and many guests already had accepted invitations to other affairs. Hence, it will end early so guests may go, not home, but to other and later dances.

FATHER KILLS 5 CHILDREN, SELF; POVERTY CAUSE

Farmer Shoots Brood to Death, After Cheerless Christmas.

By United Press
VERNON, Tex., Dec. 30.—Poverty that knew no "merry Christmas" was blamed by authorities today for the tragedy that wiped out a family of six, farmer Haggard and his five motherless children.

The father, J. H. Haggard, apparently had shot his brood to death with a shotgun and then turned the weapon on himself. The gun was lying across his body and there were seven shells scattered about the lonely farm house.

A note in the farmer's scrawl told a terse story of pathos: "All

dead. I had rather be dead. Look in the cellar."

Lewis Rivers, a neighbor, who came to call Sunday, found the bodies of Haggard and his three daughters, Alma and Alma, twins, 15, and Dorothy, 6, in a bedroom. In a cellar behind the house were the bodies of two sons, Simon, 18, and John, 10.

Neighbors said Haggard was a kindly man, who had mothered the children since his wife died several years ago.

Coroner H. C. Justin of Vernon said a verdict of suicide probably would be returned in the death of the farmer.

More Mothers

each year treat COLDS without "DOSING"

When Vicks VapoRub was originated, mothers especially were quick to appreciate it because there is nothing to swallow, and, of course, nothing to upset children's delicate stomachs, as "dosing" is so apt to do.

Just rubbed on throat and chest, Vicks acts through the skin like a plaster; and, at the same time, its medicated vapors, released by the body heat, are inhaled direct to the inflamed air-passages.

Today, the whole trend of medical practice is away from needless "dosing," and Vicks is the standby for colds—adults' as well as children's—in over 60 countries.

To keep step with this ever-increasing demand, the famous Vicks slogan has again been changed. There are now "Over 26 Million Jars Used Yearly" in the United States alone.
