

## LACK OF DATA HAMPERS U. S. JOBLESS RELIEF

Scant Faith Is Placed in  
Estimate of 3,500,000  
Unemployed in Nation.

WASHINGTON, Oct. 31.—Federal efforts to cope with winter time unemployment are being severely hampered by lack of accurate data on the number of jobless.

Action to obtain this information is being undertaken by officials.

Inquiry at the labor and commerce departments indicates scant faith is placed there on the estimate of 3,500,000 unemployed.

That estimate is based on census figures as of April 1 and upon the belief that 1,000,000 persons in the United States always are unemployed either from changing jobs, temporary layoffs or voluntary vacations.

President Hoover stated that was the source of the figures last week when he offered it as an estimate of American unemployment.

Officials do not care to discuss the matter for publication. But the 3,500,000 estimate is described by several experts here as "merely a guess."

It is recalled in this connection that the final official estimate of unemployment during 1921-22 emergency was from 3,000,000 to about 4,500,000.

Secretary of Labor Davis recently stated there were 6,000,000 unemployed in the United States when he took office in 1921. He compared this figure with 3,500,000 estimated now to be jobless.

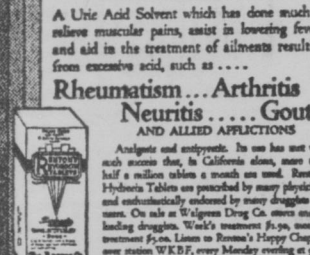

The American Federation of Labor's statement that 5,000,000 would be out of work by February was not echoed in official quarters.

## RELIEF THAT KONJOLA GAVE IS LASTING

Indianapolis Lady, Relieved  
Three Years Ago By New  
Medicine Rejoicing  
in Health.

Designed to afford prompt and lasting relief from ailments of the stomach, liver, kidneys and bowels, and rheumatism, neuritis and nervousness, Konjola marches on to triumph after triumph.

Another notable case to be found in and about this section is that of Mrs. Dessie Burke, 5206 West Fourteenth street, Indianapolis. In a talk with the Konjola Man at the Hook Dependable drug store, Illinois and Washington street, Indianapolis, Mrs. Burke said:

"For ten years I was in a sick and rundown condition. My stomach was weak and did not retain food. Gas formed after meals and I bloated until my heart action became affected. My liver was sluggish and I was subject to frequent attacks of dizziness followed by severe headaches. Constipation caused me much worry and my color became sallow. Sent to a hospital, I refused to permit an operation until I had tried Konjola. This medicine restored my health completely. I have taken no medicine for three years, since my recovery through the use of Konjola, and I am still in excellent health. I can never say enough in praise of this great medicine."

Given a real test over a six to eight-week period Konjola is doing as much for thousands.

The Konjola Man is at the Hook Dependable drug store, Illinois and Washington streets, Indianapolis, where he is meeting the public daily.
