WILL ROGERS HELD OVER SECOND WEEK

"Connecticut Yankee" Is Such a Hit at the Apollo that It Is Necessary to Extend the Run.

WILL ROGERS will be continued for the second week at the Apollo theater, starting in the modernized version of Mark Twain's famous satire, "A Connecticut Yankee."

As evidenced by the throng of patrons filing at the Apollo, Will has lost none of his drawing power as an entertainer.

In the modern screen adaptation of the classic, Rogers is seen as a small town radio dealer.

He is called to deliver a battery to a mysterious house and finds the owner to be a radio fanatic, trying to pick up sound waves that have been floating around in ether since the beginning of time.

They tune in on what appears to be King Arthur's court. A flash of lightning, a terrific bump on the head by falling relics and Rogers wakes up in the middle of the sixth century, right in the middle of the round table.

What happens after that is food for many a hilarious laugh.

The cast includes William Farnum, Myrna Loy, Maureen O'Sullivan and Frank Albertson. Short subjects including Vitaphone Varieties and Fox Movietone News round out the program.

Other Indianapolis theaters today offer: "Dance Pools, Dance," at the Palace; "Dracula" at the Ohio; "Charlie Chan Carries On" at the Lyric; "Man of the World" at the Indiana; movies at the Colonial; and burlesque at the Mutual.

LAZY GLANDS

Don't fool yourself! DANDRUFF is the sign of a FOULED SCALP. You can't brush away or wash away PORE FILTH or SCALP SCALE. There is only one remedy—stimulate the lazy glands.

Dandruff is our national shame because people ignore the truth about their hair. Dandruff is a scalp disorder. Soap and water can't cure a sick scalp.

Forget surface treatments and get down to the glands.

All hair is nourished by tiny glands, deep in the scalp. When they don't open, your hair starves, gets dry and brittle, and in time falls out. What hair is left loses color.

But instead of "touching up" hair that's streaked or off-color, try gland stimulation. Faded locks will come back like magic! Pigmentation will revive the natural color of your hair not completely, permanently gray. Start stimulation of those

lazy glands tonight. The only way to wake them is by massage. Use the finger-tips, dipped in Danderine, to cut through gummed pores and hardened secretions. The first treatment ends dandruff. The very first week will loosen the tightest scalp. Two weeks will give the hair new life and promote vigorous coloring and growth. If you don't believe Danderine makes the hair grow, measure a lock before you begin treatment!

If your hair is so dead it will scarcely hold a wave, or your scalp is granular and greasy from wasted secretions, stimulate the lazy glands with Danderine and see what happens before you have used up one thirty-five cent bottle!
