In printing the letter, the exact address will not be used where it might prove embarrassing to owners of property referred to.

Dear Mr. Fixit—There is a dangerous corner at English avenue and Shelby street where many accidents occur. Something should be done about it before some one is killed.

The complaint has been referred to the accident prevention bureau for investigation of conditions referred to.

Mr. Fixit—I wrote to you two or three times ago in regard to seeing if you could have the B. & O. crossings at North Belmont and Arnolda streets repaired. The railroad did do some repair work on the Belmont crossing, but not at Arnolda street, which is in very bad condition and should be fixed at once. C. O. S. city engineer A. C. Moore advised that the railroad officials have promised to repair the crossings as part of the railroad's annual spring program of repairing all crossings.

Mr. Fixit—In the Biltmore Gardens west on Washington street are some vacant lots. A creek, dry most of the time, runs through the lots. Some of the neighbors have run sewer pipe to the creek and dump their sewage in it. When the creek is dry, the smell is unbearable and flies swarm in the place.

TAXPAYER.  
City health board officers advise that the sewer is not in this case, however, the lot is outside the city limits. The matter should be taken up directly with the county health board.
