

# DEADLOCK HIT BY STIMSON IN PEACE EFFORT

China and Japan Accuse Each Other in Notes to Washington.

BY JOSEPH H. BARD.  
United Press Staff Correspondent  
WASHINGTON, Sept. 29.—Conflicting reports from China and Japan regarding happenings in Manchuria were before Secretary of State Stimson today as he studied means to maintain peace.

In reply to identical notes to both powers, urging cessation of hostilities in Manchuria and peaceful settlement of their dispute, the secretary received these statements:

From Japan: "Every care has been taken, and will continue to be exercised by the Japanese forces to observe all requirements of international law and international agreements, and to avoid any action calculated to prejudice an amicable settlement of the differences between Japan and China."

From China: "... While the Japanese government declares that it has taken all measures to prevent the aggravation of the situation, and that the troops will be withdrawn forthwith from the occupied areas... free acts of war still are being committed by Japanese troops."

## Notes Given Stimson

The notes containing these statements were delivered to Stimson last night by Ambassador Katsujir Dohuchi of Japan and Charge D'Affaires Yung Wai of China, respectively.

Japan thanked the United States for its "fairness of views" toward the Manchurian situation and said it was "confident" that tension in Manchuria could be ended by frank and unimpassioned discussion with China. It was recalled here that China already had declined to treat directly with Tokyo. The Japanese note made no reference to Stimson's mention of existing treaties bearing on the Manchurian situation, but China called attention to the "sanctity" of treaties, particularly the Kellogg pact, forbidding recourse to war. China expressed the "earnest hope" that "most effective means" will be taken to maintain international agreements.

**Japan Is Blamed**  
"The Chinese government," the note from Peking stated, "can conceive no other way to satisfy requirements of international law and international agreements, when international law and international agreements already have been trampled under foot, than for Japan to withdraw her troops immediately and completely from the occupied areas and to give full redress to the aggrieved party, the Chinese government, and the Chinese people."

China attached to its note a "bill of particulars" citing four instances in which it was alleged the Japanese had fired on trains or detained them, killing both Chinese or foreigners. Japan previously had denied press reports of these alleged incidents.

## TO BURIED IN COLLAPSE OF TENEMENT BUILDING

One Believed Dead as Structure Crumbles in New York.

By United Press  
NEW YORK, Sept. 29.—Ten workmen were buried when a five-story tenement building being reconstructed at 327 East Eighteenth street collapsed today.

Police and fire department rescue squads dug out nine of them and the one still missing was believed to be dead.

An emergency first-aid station was laid out on the sidewalk and physicians from three hospitals worked over the rescued men with inhalators.

The rear wall of the building was said to have been the first to crumble, taking the floors with it. The roar of the falling debris caused tremendous excitement in the thickly populated neighborhood.

## DRAFT BILL TO END POORHOUSE

A. F. of L. Pension Proposal for Legislatures.

By Scripps-Howard Newspaper Alliance  
WASHINGTON, Sept. 29.—A model old-age pension law through which the states may abate the "poorhouse terror" has been prepared by the American Federation of Labor's executive committee for submission to the state legislatures.

The model bill follows the Delaware law more closely than any of the other sixteen old-age pension laws now operating, but it is unlike any of them in its details. It provides for a pension for indigent citizens at sixty-five years of age, whose annual incomes do not exceed \$400 and who have no property in excess of \$3,000.

It fixes the maximum pension at \$9 a week and provides that the fund shall be supplied by the state in lieu of the costly upkeep of "poor farms." Whereas many of the existing laws provide that the counties may adopt pensions, this law provides that they must.

The A. F. of L. model bill, carefully drawn by the federation's economic and legal advisors, has the approval of the American Association for Old Age Security. A vigorous drive for its universal adoption will be begun at the coming federation convention in Vancouver next month, when affiliated bodies will be called on to push the measure in the states.

While backing the state law, the federation also is supporting federal aid to states for old-age pensions.

## Overstuffed

By United Press  
ALEXANDRIA, Va., Sept. 29.—A square meal made George Bullen of New York a patient in Alexandria hospital today. Bullen, vagabonding it, crept into a freight car in Baltimore last Thursday. The door was locked and it was three days before he was released here, faint from hunger. A kind-hearted proprietor of a lunch room then took the hapless man in charge.

"Eat, my friend; eat all you can," said the restaurant owner. Bullen obeyed the admonition to the letter, and to that fact doctors today attributed his new plight.

leged records of pool sales. Arisel also had \$700 in his possession which was returned to him at the time of the arrest, officers claimed. A copy of the alleged pool-selling records has been retained by police. The pool books are in the possession of the court and will not be returned without a special order. Police claim Arisel is an agent of Emil Rahke, alleged lottery operator.
