

OPPOSITION CHIEF SLASH IN AGAINST VALUE OF HAULING

Tax on Unpaved Roads, Made Soft
by Rains, in Danger of
Serious Damage.

Damage amounting to several thousands of dollars may be inflicted on unpaved roads of Indiana, which are in a softened condition due to mild weather and frequent rains, if heavy loads are hauled, according to a bulletin issued today by John J. Brown, state highway director.

Brown urges co-operation of the motor public, especially truck operators, explaining that lightly loaded trucks will aid materially in reducing the chance of damage and will result in the roads being in better condition for spring use.

Length and surface condition of detours in the state system are described as follows by the bulletin:

Road 6—Detour from three miles west of the junction with Road 15 to Napoleon, is five miles; good gravel.

Road 28—Detour at three miles north-west of Logansport, is one-half mile; good gravel.

U. S. Road 31—Detour at 31-W north of New Albany, is two miles; good gravel. Drive slow past grading canal south of Kokomo.

Road 35—Detour from Bean Blossom to Nashville via Hillsburg is ten miles; fair gravel.

U. S. Road 41—Detour at junction with Road 12, is one and one-half miles; good gravel and pavement.

Road 48—Detour from Hagerstown to Hagerstown, is three miles; both detours narrow, stone roads, with several narrow bridges. Through traffic at junction of Roads 45 and 44 take Road 45 to Bloomington, thence Road 37 to Bedford.

Road 61—Detour from Vincennes to Monroe City is sixteen miles (twelve miles over U. S. 30).
