Girl Scouts

Many changes have been made in camp routine during the first period of camping, at Camp Dellwood, the Girl Scout resort.

A new name, unit song and a new set of unit customs and traditions have been adopted by each of the seven units.

Aside from the changes that have taken place in the names and traditions of the units, several changes have been made in the camp program. The morning program, which formerly permitted the Scouts to attend classes in handicraft, archery, nature, swimming and follow their pet hobbies along these lines, has been replaced by a unit program of games and songs, out-of-door hiking and cooking, unit swimming periods and nature walks.

This program is intended not only to provide interest and entertainment for the girls but to build up a feeling of unit companionship and unit loyalty which has been woven into the traditions and customs, games, songs and legends built up by the girls in the unit.

Interest in the camp as a whole has not been neglected.

A broadcast from Station JOY, Camp Dellwood, presented by Miss Ruth Otto, dramatic counsellor, Saturday night at a general campfire, was attended by many parents of the Girl Scouts. Those taking part were:

Self-Watering Plants

No need to arrange for someone to come in to water the plants when you go away on vacation. Not, at any rate, if you have the new self-watering ones. They're enclosed in glass globes which supply the plant with its own oxygen and a uniform moisture. Even the effect of rain is accomplished in the globe by condensation. They need actual watering only two or three times a year.

New Electric Clocks

Newest electric clocks are equipped with works which keep operating two hours after the electric power has been shut off. If a fuse blows out or a storm tears down the electric wires, the clock goes on just the same.

Musical Tops

Children (and grown-ups, too), will love the new musical tops. Their operation is simple and as the top spins, a melodious tune is played. This tune is varied by the arrangement of the handle.

Window Cleaning Aid

A little vinegar placed in hot water will make windows easier to clean, as the vinegar cuts the grease. Alcohol added to water for window-washing gives a glossy shine to the glass.

Another precaution to keep in mind is that of scalding the milk before combining it with the other ingredients. This insures a smooth texture and also aids in preventing curdling.

The following rule is for a custard baked in one large mold.

Custard Is
Healthful
as Dessert

BY SISTER MARY
NEA Service Writer

Perhaps one of the best desserts to serve with a vegetable dinner is a custard of some sort. The chief ingredients of every custard are eggs and milk, two excellent sources of protein.

So when this factor has been lacking in the main part of the meal, the dessert may well supply it.

While the fundamentals of nearly all custards are the same, they may be varied in their seasonings and may be served in a variety of ways. Fresh fruit may be sliced and used as a border or it may be crushed and used as a sauce.

A perfect custard is not difficult to make and is sure to be liked by every member of the family. Children who do not like to drink milk can be given it in this form.

Avoid "Weepy" Custard

However, be sure that the custard is not overcooked and "weepy," for this will make it unattractive and may cause it to be refused.

The number of eggs used in proportion to the amount of milk determines the consistency of the custard. The eggs act as a thickening agent for the milk.

Less than one egg to one cup of milk will not thicken the milk enough to make a firm baked custard. Individual custards do very well with this proportion, but large puddings that are to be unmolded will need more eggs.

Soft custards, commonly called "boiled" and actually steamed, are made with one egg to one cup of milk. Large puddings should have at least six eggs
