REVEALS EASY WAY TO CATCH FISHING WORM

Recipe Given in East.

By United Press
NEW BEDFORD, Mass., May 4.—The fishing season is here, but what about the bait? The following recipe of an Orleans resident for getting worms without digging is passed on to posterity by Don Trayer:

"Drive a stick of wood an inch in diameter into the ground, leaving one end exposed.

"Cut notches in another stick and rub it along that in the ground.

"Vibration disrupts and annoys the worms and they wriggle to the surface to find what the earthquake is about."

Girl Who Tried Suicide Will Get New Shoes

Vergie Toney

Vergie Toney, 14, of 723 South Drexel avenue, the school girl who swallowed poison because a schoolmate taunted her for wearing shoes found on a dump, is going to have new shoes.

Touched by the story of Vergie's attempted suicide in Wednesday's issue of The Times, two women telephoned before 6 a. m. today.

Both asked that their names not be revealed. One, a welfare worker, said that she intended to spend some of her own money for shoes for Vergie.

The other said she had made arrangements with a downtown store for Vergie and three of the other eight children who live in the ramshackle home of Mr. and Mrs. George Toney to be outfitted with footwear.

WARS TO END WAR FALLACY, BUTLER TOLD

Oberlin College Head Gives
Address at Honor Day
Exercises.

War to end war is fallacy toward attaining world peace, Dr. Ernest Hatch Wilkins, president of Oberlin college, Oberlin, O., declared today in an address at the annual Honor day exercises of Butler university. His topic was "The Scholar and Peace."

"We were told that the World war

was a war to end war. We believed it. It is to be hoped that no future generation will prove so gullible," Dr. Wilkins said.

Enumerating the causes of war, Dr. Wilkins listed first "the extreme inequality of economic distribution." Discussing the consequences of war, the speaker quoted Talcott Powell, editor of The Times, as to cost in veterans' relief alone, which he at one time estimated to be a billion dollars annually in the United States.

"Add to this," the speaker continued, "the immense cost of maintenance of armies and navies; think of what these sums might do if devoted to constructive works of peace; and you have some measure of the gigantic waste of war."

After discussion of the various proposed methods for world peace extant, Dr. Wilkins advanced his theory which he termed "frankly fantastic."

He proposes an intensive study

of the peace problem in universities and colleges, with elementary work in all departments to continue to more advanced levels as with other subjects.

He set forth phases of war to be studied by the different departments of educational institutions, and suggested that warfare with bacteria as weapons, which he termed "all too possible," should be a topic for departments of biology.

More than 100 students were presented honor awards for scholastic achievement.

WOMAN BADLY HURT IN SUICIDE EFFORT

Inhaled Gas After Arrest of
Lover, Say Police.

Miss Cynthia Norton, 33, is in a serious condition at city hospital following what police state was an attempt at suicide by inhaling gas

early today in a rooming house at 715 North Alabama street.

At the same address Wednesday night police, arrested Edgar E. Bowen, on instructions of federal agents who said they wanted him on a warrant charging narcotics act violation.

She made no statement as to the cause of the suicide attempt, but there are indications that she was remorseful over the arrest of Bowen. Police found a list of all expenditures for food and other articles

in the last two weeks, during which the couple had lived at the rooming house as man and wife.

Police state Miss Norton has been arrested eleven times since June, 1932, usually on vagrancy or disorderly conduct charges.

On her last appearance in court a week ago, before Judge Paul Rochford, municipal judge pro tem., a fine was suspended after the court had been advised she was aiding federal officers by giving evidence in drug cases.
