SALE PRICE—

The maker is one of the largest and most respected in the industry. His daylighted plant covers a city block.

He came to us during the black days in March—willing to take it on the chin. He was concerned only with keeping his forces intact. He proposed to make up to his highest standards 2,500 Suits—at a price that represented a staggering reduction.

There was no chiseling, we paid his price, the workers received their full wages.

And then while these Suits were still in work—the upturn set in, prices soared.

In the light of changed conditions and in a spirit of fairness we suggested to the maker that he could be released from his agreement—But he stuck to his bargain decently and sportingly—and we are sticking to ours and letting the suits go at this "all-time low" price—

The Suits are in now! After examining them—carefully and coldly—we do not hesitate in saying—"that they are about the best values we have ever seen in our long career as merchants—and we doubt if their equals will ever again be known."

The conditions that created them are, happily past!

The values are yours to enjoy for fall.

There Are 2,500 Suits—We'd Rather You Wouldn't Buy More Than 2 Suits—We'd Like to Distribute These Historic Values to as Many Men as Possible.
