

Let's Go Fishing—
THROGS ENJOY
CONSERVATION
SHOW AT FAIR

Buffalo Are Magnet; Stream
Pollution Evils Are
Demonstrated.

BY LEFTY LEE
Times Fishing Editor

Anglers, hunters, and all other nature lovers should be sure to schedule a day at the state fair, and visit the display of the department of conservation. The officials of this department certainly have done their part to make the exhibit complete, and the service accorded visitors leaves nothing to be desired.

In addition to a complete exhibit of animal life found in the state, other animals are on display. The buffalo from Pokagon state park are one of the attractions that seem to interest visitors more than any other animal, tame or wild. In addition to this display, the stream pollution educational series, under the direction of Dr. V. K. Harvey, state health board secretary, who is taking an active part in the reduction of pollution in the state's streams, is interesting the fishermen.

Samples of polluted water, and models and pictures of disposal plants, and settling basins are included in the display. The present administration is trying an educational, rather than forceful, method of removing this menace, and the complete exhibit at the fair should be viewed by all.

We do not know the bait he used, but Game Warden Fleming of Ft. Wayne is the hero around the conservation department exhibit since he landed a pickpocket Monday.

George Ruth, Herman Zeyen, Charles Bevan, and his son Jack returned from Cicott lake, ten miles west of Logansport, with one of the season's greatest catches. Their live box showed the limit of large crappie, that ran from three-quarters to one and one-half pounds and forty-one catfish. These anglers did not fish for bass, but say that the bass were hitting, and mention seeing one angler with five good-sized ones.

The fish at Stafer lake are due for another workout, as Cliff Ross and Ed Clark are planning a trip to this spot Saturday and Sunday, and their promise is fish for all.

John Warner, a landscape gardener at Crown Hill, proved he also was there at a fisherman, when he visited Lew Henderson's hangout on the Tippecanoe river, near Pulaski, and took a total of thirty-five pounds of channel catfish over Saturday and Sunday. The bait used by Warner was salted crawfish.

If all the people who call requesting information how to get to Asbury Park lake went fishing there over Labor day, we claim the place must have been crowded. The route to this favorite resort is State Road 52 to Morrisville, and then follow the signs.

We were on our way home Monday night and noticed something on the sidewalk. Looking closer, we saw it was about seven pounds of turtle, making for Eagle creek. His course was changed slightly, and it won't be long until fried turtle is on the menu.

Butch Mitchell and his party enjoyed an old-fashioned fish fry along the banks of Big Walnut Creek Monday. The boys pooled the fish caught, and tried them for breakfast. The skillet was filled six times, but the outdoor appetite took care of that.

"The party that recently visited Captain Smith, and tried for the big ones in his lake at Worthington, again are ready to see if the monsters that the captain had imported from Reelfoot lake will bite. Bass weighing from five to seven pounds are supposed to come and take any bait offered, but the last time out the report was no keepers.

A BOOK
A DAY
BY BRUCE CATTON

If you have ever wondered what a French chef thinks of his job, how he got his training, what his work is like and what sort of private thoughts he has, you will find a good deal to interest you in "Kitchen Prelude," by Pierre Hamp, a well known chef who has here set down the story of his life.

Here is a very celebrated and successful chef who objected bitterly when, as a boy, he was apprenticed to a cook, because he wanted to enter almost any sort of job rather than that one. As he grew older, he worked in exclusive and expensive restaurants and meditated on the teachings of anarchists and Communists.

He rose to the top in his profession—and then, because he disliked cooking, quit his job and went to a school to study, in the vague hope that he might do something for humanity.

He seems, in short, to have been an unusual sort of chef, and his story is an interesting one. Incidentally, it gives a sidelight on some of the odd notions about sanitation and cleanliness which high-class French restaurants entertained a few years ago.

His first job was in a kitchen where apprentices and helpers were herded nightly into a foul, vermin-infested cellar to sleep, and from which they emerged, each morning, unattended, to work in the kitchen.

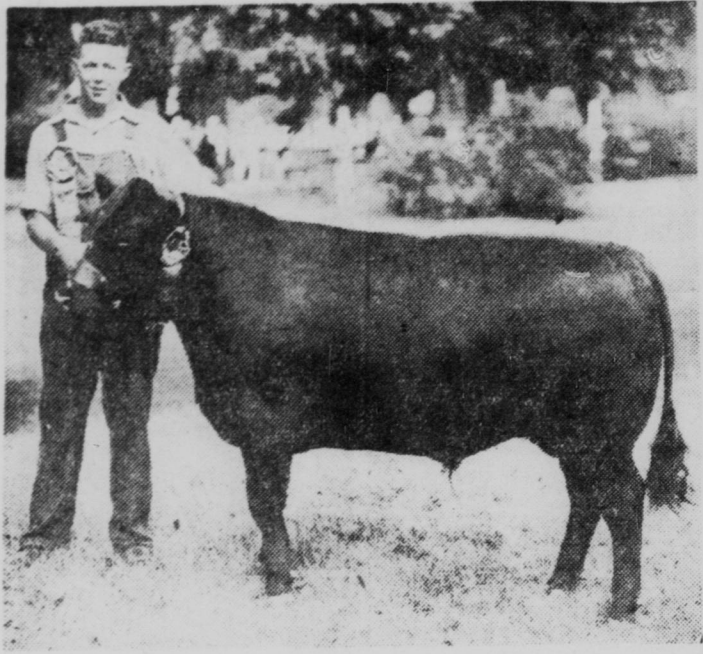

And in the famous Restaurant Marguery the cooks slept nightly in the dining room, removing their bedding each morning just before the first patrons arrived. All of this makes a book which is a good deal more entertaining than I thought it would be when I first opened it.

Published by Dutton, it is priced at \$2.50.

Motorman Is Robbed

A changer containing an undetermined amount of money was the loot two Negro bandits obtained Tuesday night from C. H. Overman, 545 North Goodie avenue, operator of a street car. Police found the empty changer and a knife at West and New York streets, near the robbery scene.

WEARS RIBBON WON BY STEER

Although the ribbon belongs to the steer, William Dickinson, Delphi, Ind., wears the blue ribbon won by his grand champion Angus steer over all breeds in the 4-H Club class at the State Fair.

Flex Predicts Fine Film
Season as to Product

United Artists' Production of 'The Masquerader,' With
Ronald Colman, Opens Friday at Loew's Palace.

BY WALTER D. HICKMAN
Basing his opinion on the new product of Metro-Goldwyn-Mayer and United Artists, which he has pre-viewed, Jac Flex, manager of Loew's Palace, is most enthusiastic over the movies he will show during the new season which is just underway.

Still a flutter over the fact that Marie Dressler and Wallace Beery in "Tugboat Annie" brought more people into his theater than ever before, Flex predicts ever greater business for some of the new product he will exhibit.

It is true that Flex has a world of fine movies to draw from and his pictures will be cast with some of the mightiest names in movieland. Mr. Flex in discussing the situation, told me:

"Our schedule of pictures for the next few months is exceptional. We have closed contracts this season to show the stars and pictures of Metro-Goldwyn-Mayer and United Artists.

"Among the interesting features booked for early release is 'Show World'—a new type of musical picture, in which the music is incidental and the story is emphasized. Advice from the coast indicates that M-G-M has another hit picture; I have never heard such pre-release noises. It will be recalled that M-G-M made a picture called 'March of Time' a year ago. It was not released because musicals went out of style; it had cost nearly a million dollars.

"In 'Show World' are the big scenes and numbers from 'March of Time,' but the whole story has been revised and enlarged. It is interesting to note that M-G-M has surprised the movie world by making a smash hit out of what was supposed to be a million dollar loss.

Lee Tracy Stars

"Another picture that promises to be a success is Lee Tracy's starring vehicle 'Turn Back the Clock,' written by Edgar Selwyn and Ben Hecht. Mae Clarke, Peggy Shannon, C. Henry Gordon and Otto Kruger are in the cast.

"Of course, 'Dinner at Eight,' will be the coming season's sensation. It has a bigger name cast than even 'Grand Hotel' had and is said to be even finer moving picture entertainment. In the cast are Marie Dressler, Wallace Beery, Jean Harlow, John and Lionel Barrymore, Edmund Lowe, Billie Burke, Madge Evans, Lee Tracy and Phillips Holmes. This picture is finished, it is to be the last word in talking picture entertainment.

"Another multi-star picture will be 'The Hollywood Party' with such players as Marie Dressler, Joan Crawford, Jean Harlow, Jimmy Durante, Lupe Velez, Jack Pearl, Lee Tracy and others.

Another Fine Picture

"Night Flight" has been hailed by previewers as one of the most important productions to come out of Hollywood. David O. Selznick is the producer of 'Night Flight,' which has an all-star cast including John and Lionel Barrymore, Helen Hayes, Clark Gable and Robert Montgomery, under direction of Clarence Brown.

"Sixteen films, at various stages of production at the Metro-Goldwyn-Mayer studios, take their place in the Loew lineup of fall hits.

"Eskimo," filmed by the Metro-Goldwyn-Mayer polar expedition to the Arctic, with a native cast, is to take audiences to the land of the Midnight Sun. Colonel W. S. Van Dyke directed this picture, with Captain Peter Freuchen, who authored the book upon which it is based, supervising production and acting in it, as well.

"Beauty for Sale" brings a cast of M-G-M favorites in a film version of Faith Baldwin's novel. 'Beauty,' Madge Evans and Uta Merkel shares the feminine leads. Otto Kruger heads the male contingent while others in the cast include Alice Brady, May Robson, Eddie Nugent, John Roche, Phillips Holmes and Henry Travers. Richard Boleslavsky, who directed 'Rasputin,' is in charge of production.

"Bombshell" the story of a Hollywood beauty and her dynamic press agent co-stars Jean Harlow and Lee Tracy under Victor Fleming's direction. Uta Merkel, Frank Morgan, Ted Healy, Pat O'Brien and Ivan Lebedeff head the supporting cast.

"Joan Crawford's new hit 'Dancing Lady' presents the star in a film version of James Warner Bellah's Saturday Evening Post serial, with Robert Z. Leonard as director. Clark Gable, Lightnizer, Jean Malin, Ted Healy and Fred Astaire are in the cast.

"Another Broadway stage hit comes to the screen in 'The Late Christopher Bean' scheduled among our fall hits, with Marie Dressler and Lionel Barrymore as co-stars. As in 'Another Language,' so in 'The Late Christopher Bean' many of the roles will be played by members of the original Broadway cast, notably Beniah Bondi and George Coulouris. Sam Wood is director.

"History Thriller

"'Bride of the Bayou,' a vivid mystery of the Cajuns, descendants of the Acadians of 'Evangeline' fame is being filmed by Tod Browning in the Louisiana Bayous. Lionel Barrymore is star. 'Penthouse,' based on the Arthur Sommers Roche serial features Mae Clarke, Myrna Loy, Warner Baxter, C.

PLANET PLUTO
NEAR 'RELATIVE'
OF ASTEROIDS

New Theory Grows Out of
Study of Origin of
Solar System.

BY DAVID DIETZ
Scripps-Howard Science Editor

Sharp distinctions between planets, asteroids and comets appear to be breaking down in the face of recent astronomical discoveries. These new discoveries, incidentally, may have considerable bearing upon theories of the origin of the solar system and related problems.

Prior to the discovery of the planet Pluto and the very recent discoveries of asteroids of peculiar behavior, the distinctions between planets, asteroids and comets easily were stated.

The planets, then eight in number, revolved around the sun in orbits which were nearly circular. The asteroids or "little planets," 1,000 or more in number, revolved in orbits a little more flattened than those of the planets in the gap between Mars and Jupiter. The comets were more erratic objects, moving in orbits of great eccentricity.

Then on March 13, 1930, the Lowell observatory at Flagstaff, Ariz., announced the discovery of the planet Pluto. The late Professor Percival Lowell had predicted the existence of a trans-Neptunian planet and had founded the observatory at Flagstaff with the search for the planet as one of its major objectives.

First Thought Comet

But Professor Lowell had anticipated a planet much like Uranus or Neptune, in fact he based his belief in the planet's existence on certain irregularities in the orbit of Uranus which such a planet would cause.

But study of the orbit of Pluto led to a variety of opinions. It became apparent at once that Pluto was not the sort of planet that Lowell had anticipated and that it could not be responsible for the irregularities in the orbit of Uranus.

At first, some astronomers even insisted that it was no planet at all but a comet or asteroid.

It now is generally agreed that it must be a planet since its size, though much smaller than that of Uranus or Neptune, is somewhere between that of Mars and the earth. That is, its diameter is between 4,000 and 8,000 miles.

Its orbit, however, is much more like that of an asteroid than that of any of the other planets. The orbit possesses so great an eccentricity that the planet's distance from the sun varies by 1,800,000 miles.

Orbit Is Inclined

When Pluto is nearest the sun, it is closer than Neptune. But due to the fact that Pluto's orbit is inclined at a considerable angle to the general plane of the orbits of the other planets, the orbits of Neptune and Pluto do not cross each other.

Many astronomers think that Pluto must be related to the asteroids and that it may prove the first of a series of trans-Neptunian planets with asteroid-like qualities.

This would seem to indicate that any theory to account for the asteroids and their behavior must also take some note of Pluto and the possibility of other planets like Pluto.

The situation with respect to the asteroids was still further complicated by the discovery of the two newest members of the solar system, now recognized as asteroids but regarded with so much bewilderment at the time of their discovery that they were referred to mysteriously as "objects."

Exist in Wide Gap

The two new asteroids are the "Delport object," discovered by Professor Delport of Brussels, and the "Reinmuth object," discovered by Professor Reinmuth of Heidelberg.

At first, it was also supposed that these two objects might be comets. While astronomers have officially decided that they are asteroids, they have also come to the conclusion that the difference between asteroids and comets is not so great as was once believed and that in some cases it may be possible to regard an object as either.

The asteroids in general exist within the gap between Mars and Jupiter. One, however, crosses within the orbit of Mars, several are about as far off as Jupiter, and one even has an orbit which extends out to that of Saturn.

The chief mark of the orbits of the asteroids in general is their great irregularity. The orbits are neither concentric nor evenly spaced. There are zones or gaps, however, in which no asteroids occur.

Path Is Nearer Earth

Until the discovery of the two new asteroids, the one which approached closest to the earth was Eros, an asteroid which came within 14,000,000 miles of the earth at certain times.

It now appears that both the Delport object and the Reinmuth object will make closer approaches to the earth, the Reinmuth object also being unusual in that one end of its orbit appears to cross that of Venus.

According to present calculations, the Delport object may approach to within 12,000,000 miles of the earth, while the Reinmuth object will approach to within 3,000,000 miles of the earth.

DEMAND FOR FOREST
RANGERS IS ON RISE

Opening of New Jobs Credited to
Success of President's Drive.

Results of President Roosevelt's reforestation program are shown in the demand for foresters and rangers, civil service bureau aids revealed today.

At the present time there is a demand for persons versed in forest economics, forest and range management and range botany, Frank J. Boatman, head of the local bureau, stated.

The forest service under the department of agriculture has open the positions of junior forester and forester examiner to pay between \$2,000 and \$2,600 a year.

Applicants for the position must be between 21 and 35. Applications must be on file with the United States civil service commission at Washington not later than Sept. 21, 1933.

DRIVER HELD AS DRUNK

Arrest Made After Accident on
Wrong Side of Street.

Ivo Freels, 26, of 1241 South Pershing avenue, is under arrest today, charged with drunkenness, operating an automobile under the influence of liquor, and driving on the left side of the street, following a minor accident late Tuesday night in the 1200 block, West Morris street.

Freels' car was struck by one driven by Daniel Godan, 42, of 1039 West Morris street. Neither driver was injured.

TRIBUTE TO BE PAID
GERM'S DISCOVERER

Health Group Will Honor
Memory of Doctor.

Tribute to the late Dr. Walter Reed, discoverer of the yellow fever germ, will be paid in Indianapolis on Oct. 9 to 11, during the annual session of the American Public Health Association.

Wednesday, Oct. 11, has been set

by the association as Yellow Fever day and the honors to Dr. Reed's memory and to his co-workers will be paid after a dinner at the Claypool.

Among noted guests at the affair will be the famed John R. Kissinger of Huntington, the Spanish-American war private, who was the first man to offer his body for scientific experiments with yellow fever.

Surgeon General Robert U. Patterson of the United States Army, and F. F. Russell of the Rockefeller Foundation will be among the guests during the event.

Dr. William F. King, convention committee head, estimates that the

association and subsidiary organizations will bring at least 1,500 persons to Indianapolis for the sessions.

Weather conditions being favorable this year, Florida citrus growers expect the fruit to be larger than last year and of good quality.
