## ACT NOW Before Prices Go Higher!

ARE prices going up? Ask the housewife who finds that her budget for food has to be revised. Ask the manufacturers who find raw materials often 100% higher. Ask the retailers who can not begin to replace present stocks to sell at anywhere near today's prices. And finally, ask General Johnson. The N. R. A. program *MUST* be a success—and it can not succeed unless prices rise enough to boost wages. In the meantime, prices haven't yet attained the momentum which will mark them later. Smart people will BUY NOW—at prices that will seem too good to be true in a couple of months. We have prepared with the largest stocks in our history... BRAND NEW fall and winter merchandise of almost every description... much of it bought before wholesale prices reached their present level.
