

## —Let's Go Hunting— FISH HOGS ARE ATTACKED FOR TACTICS IN ICE

Many Anglers Taking More  
Than Limit: Law  
Is Urged.

BY LEFTY LEE  
Times Hunting Editor

The fox hunter and the sportsmen who are against the fox being given the protection of the conservation department, are continually at war and some interesting arguments are being waged between the factions. In his article on conservation that appeared in The Times Saturday, William F. Collins quoting Henry Sipe and Mr. and Mrs. Lon Weddle, tells that the fox certainly is a wonderful animal, and that a fox would not think of eating a chicken, quail, pheasant or, in fact, anything larger than a field mouse. Of course they did state that if the fox were starving and could not obtain any field mice. He probably would take on a plump hen that you had picked out for your Sunday dinner, but only under those conditions. The hunter and fisherman from Knightstown, whose letter appeared in Monday's Times, is equally sure that the diet of a fox is chicken, quail or pheasant and that the field mice merely are playmates of Mr. Fox. Fables and children's story books always have credited the fox with being the most wily of all of the furred animals and the arguments seem to prove that he is, for he certainly has made some staunch friends, as well as bitter enemies.

The ice fishermen are having their innings in the lake region now. Reports that have reached us tell of many fish hogs being on the lakes and taking more than their limits of blue gill that bite extremely well this time of the year. The reports we received stated that the angler would get his limit of twenty-five, return to the shore, put them away and then go out again and repeat the performance. If this report is true, the anglers who are trying to have a law passed prohibiting fishing through the ice are justified. As well as the writer enjoys this type of fishing, a law of this kind is needed if the fish hog predominates among this class of fishermen. The size of the blue gill taken at this time of the year is large and any person who would want more than his limit to be content, does not deserve the privilege of the sport.

The hunting and trapping season will come to a close Jan. 15. To date the trapper has been enjoying one of his best seasons, but the hunter has had the misfortune of too much dry weather. The rain and snow of the last few days have helped this condition, however, and the final two weeks should prove to be the best.

The Hurt family of champion shooters certainly has held the spotlight for enough years to place them in the front rank as riflemen par excellence. An odd feature was the winning of the state title by Jimmie Hurt Jr., 21. He had copied his first title at this age. Both members of this family have attended the national matches and always have made the other entrants perform in record-breaking style to keep them away from the top of the heap. Jimmie Hurt Jr. is the present title holder with the high-powered rifle. At one of the national meets at Camp Perry, the Hurt team won the father and son national championship. The Hurts also copied runnerup honors the following year.

The drive for members is proving successful and the Marion County Fish and Game Association bids fair again to take its place as one of the outstanding conservation clubs in the state. The membership dues in this organization have been reduced to \$1 a year, which means that all sportsmen should enroll now. Let's go for 3,000 members in 1934.

Some of our Indiana cities and towns can declare a happy New Year for they have taken advantage of the federal government's offer of a loan to provide new sewage disposal plants that will eliminate the pollution of many of our streams. Aside from the standpoint of the angler, the cleaning up of the streams will mean that the city or town that has shown the proper spirit and declared itself in favor of this move soon can have clean waters as proof that the community is a good place in which to live.

## The Theatrical World Billie Burke Takes Top Honors, Says Hickman

—BY WALTER D. HICKMAN—

Marie Dressler

Billie Burke

Movie fans here are picking their favorites in the big star cast of "Dinner at Eight."

The argument among the women seem to be whether Marie Dressler, Billie Burke, or Jean Harlow gives the "best performance."

One husband, in a letter, tells me that he has not been the same in his own home since he declared that Miss Harlow walked away with the acting honors while his wife insisted that the "blessed Marie Dressler" put them all in the shade.

I, for one, do not relish the job of getting into the fight. In my review of the movie version of "Dinner at Eight," I gave the male acting honors to John Barrymore, because of his characterization of Larry Renault, the pitiful has-been movie actor.

Barrymore "Wows" 'Em

The finest work this member of the Barrymore family has given the screen came when Larry Renault ended his life before a gas fire-place.

The other evening, I dropped into the Palace again and got a chance to study the reaction on the audience. For a while the audience was dead-still as the unlighted gas burner of the fireplace took Larry's life.

Then suddenly people began to laugh because the acting and the effect was so realistic. Jack Flex, manager of the Palace, where this picture is playing to capacity business, and that means standing room only, tells me that the effect of Renault's suicide is the same at every performance.

To me it seems that the acting honors, among the women belong to Billie Burke because her role is such a difficult one.

Makes Future Certain

There is no doubt in my mind that the work of Miss Burke in this movie gives her a definitely glorious future on the screen.

My high regard for Miss Burke's

Jean Harlow

work in no way reflects on the splendid comedy work of Miss Dressler or of Miss Harlow.

The fact is that Miss Harlow is at her best as the selfish, shallow wife of Dan Packard. Miss Dressler is again Marie Dressler, this time all dressed up and convulsing an audience every time she opens her mouth.

The battle is going fine. Let me have your decision on this question—who is the best among the women in this cast?

\*\*\*

In City Theaters

Other theaters today offer: Madge Kennedy and Rollo Peters in "Autumn Crocus," at English's; "Mr. Skitch," at the Apollo; "Parisian Parade," on the stage and "By Candlelight," on the screen at the Lyric; "Sitting Pretty," at the Indiana; "Flying Down to Rio," at the Circle, and burlesque at the Mutual and Colonial.

## Indiana in Brief

Lively Spots in the State's Happenings Put Together 'Short and Sweet.'

By Times Special

ANDERSON, Jan. 2.—Ralph J. Clark, 33, charged with shooting and seriously wounding Miss Doris Keeler, 18, because she refused to become his bride, has been sued by Miss Keeler for \$15,000 damages as a result of the injuries.

According to Miss Keeler's complaint, she incurred paralysis of two fingers, a punctured lung and other injuries.

Train Victim Buried

By Times Special

LEBANON, Jan. 2.—Funeral services were held yesterday for Charles B. Rider, 43, crushed to death by a Big Four passenger train while walking on tracks here. Born in Clinton county, Mr. Rider had spent most of his life in Lebanon and the vicinity.

\*\*\*

Crash Trial Set

By Times Special

COLUMBUS, Jan. 2.—E. E. Cravens, Crothersville chiropractor, driver of one of two automobiles in a collision which resulted in a child receiving a broken neck and less serious injury of two other persons, will be tried tomorrow in city court here on a reckless driving charge.

The injured child is Robert Smith, 8, son of Mr. and Mrs. S. C. Smith, Indianapolis. Mrs. Cravens was injured seriously and her husband received a collar bone fracture.

AVIATORS PREPARE FOR AFRICA-TO-BRAZIL HOP

French Seaplane Landed After Making New Distance Record.

By United Press

ST. LOUIS, Senegal, Africa, Jan. 2.—Commandant De Bonnat of the French navy and his crew of four prepared their seaplane Southern Cross today for a flight within the next few days to Natal, Brazil.

The Southern Cross arrived here yesterday from Berre, Airborne, France, after a flight of 4,000 kilometers (2,500 miles) which broke the world long distance record for seaplanes. The flight was made in 23 hours 6 minutes.

The two, who met in Hollywood eight years ago, were married at the home of the Rev. Daniel Bliss of Old South church.

## —Dietz on Science— ICE HEATED AS STOVE IS FREAK OF LABORATORY

Harvard Professor Uses Molecular Theory to Attain Result.

BY DAVID DIETZ

Scraps-Howard Science Editor

Ice hot as a stove in full blast. That is one of the curiosities which Dr. P. W. Bridgman, professor of mathematics and natural philosophy at Harvard university, is able to produce in his laboratory.

High pressure is the magic which Professor Bridgman employs. He has developed apparatus by which he can obtain a pressure of 2,000 tons to the square inch. When he has obtained the pressure, he gets many strange results. Many gases, for example, turn to thick liquids and can be poured like warm molasses.

Ice kept under this high pressure can be heated to a temperature of 180 degrees without melting. Water, it will be recalled, boils at ordinary pressures at a temperature of 212 degrees.

Professor Bridgman describes his experiments in a report to the Engineering Foundation of New York City.

Molecule Theory Involved

Professor Bridgman's paradoxical experiments can be understood if we reflect for a moment upon the nature of solids, liquids and gases and the meaning of boiling and freezing.

All substances are composed of minute particles called molecules. These particles are continuously subjected to two forces. One is the force of their own vibration or motion. This force tends to separate them and drive them away from each other. The other force is the electro-magnetic attraction which exists between molecules. This force tends to draw them together.

Whether a substance exists as a gas, liquid or solid depends upon which force has the upper hand.

In a gas, the vibration or motion so overbalances the attractive force that all the molecules are continuously flying about in all directions.

In a liquid, the two forces are more nearly equal. The attractive force is strong enough to draw molecules together but almost immediately the force of vibration causes them to separate.

Likened to Dance

The molecular condition of a liquid, therefore, might be likened to a dance in which the dancers are continuously changing partners—a sort of superlucid two-step.

In a solid, the force of attraction or cohesion has the upper hand and molecules are bolted into place. They are still in vibration but their motions are confined to a limited area—like chained dogs which run back and forth within the limits of their leashes.

Whether a substance exists as a gas, liquid or solid at ordinary temperatures and pressures depends upon how strong the two opposing forces are under those conditions.

Temperature is really a measure of molecular vibration. When we heat an object we give energy to its molecules and thus increase the rate of vibration. That is why iron turns to a liquid if it is heated enough.

When we cool an object we take energy away from it. That is why water freezes or turns to a solid as we take energy away from the molecules, their rate of vibration becomes slow and the force of cohesion gains the ascendancy. As a result, the molecules are chained to their position and the liquid, water, becomes a solid, ice.

What Professor Bridgman does is to subject the ice to tremendous pressure. This adds the cohesive force and pushes the molecules closer together than they normally exist.

Now when heat is applied, the molecules do not get enough energy to break their chains. Consequently the ice remains a solid though it is heated almost to the ordinary boiling point of water.

**DON'T NEGLECT COLDS**

RUB soothing, warming Musterole well into your chest and throat—almost instantly you feel better. Repeat the Musterole-rub once an hour for five hours. What gratifying relief!

Musterole is NOT just a salve. It's a "counter-irritant" containing good old-fashioned cold remedies—oil of mustard, menthol, camphor and other valuable ingredients.

That's why it gets such fine results—ease in 5 minutes, and relief in 5 hours, as a rule. It penetrates, stimulates, warms and soothes the congested parts, drawing out the pain and infection. Used by millions for 25 years. Recommended by many doctors and nurses. Available in three strengths: Regular Strength, Children's (mild), and Extra Strong.

HONORED BY FISHER

Paul C. Stetson

Paul C. Stetson, superintendent of Indianapolis schools, has been made a member of the newly created advisory board of the Fisher Body Craftsman's Guild. The guild has as members more than 750,000 boys. Its purpose is the promotion of interest in craftsmanship and handwork.

## CITY MAN PRAISES PLAYGROUND WORK

National Association for Recreation Lauded.

Praise of the National Recreation Association was given today in an open letter by Hugh McK. Landon, local sponsor of the association.

The letter told how ninety-nine "problem" boys and girls in one city last year were saved from becoming delinquents through efforts of the association.

"Over and over again," the letter said, "in city after city, we are learning that boys and girls are 'problems' largely because we fail to provide adequately what is essential to growing boys and girls—a chance to play."

"The National Recreation Association is doing everything in its power to help cities to continue to provide this essential opportunity."

Cosmetologists Meet Tonight

A meeting of the Indiana Association of Cosmetologists will be held at the Washington at 8 o'clock tonight.

SCHEDULED FOR TALK

Upton Close, orator and authority on Asia, will open the 1934 Town Hall lecture series at English's theater next Friday morning at 11:30. Mr. Close will speak on "Behind the News from Asia," a current events lecture on China, Russia and Japan, where Mr. Close spent the summer.

## CRACK TRAIN TO BE EXHIBITED IN CITY

'Burlington Zephyr' Visit Is Planned This Month.

The new "Burlington Zephyr," a 2-mile-a-minute train of streamline design and constructed of stainless steel, will be brought to Indianapolis the latter part of this month on an exhibition tour.

Hailed as the latest development in motorized rail transportation, the crack train will be brought here by the Chicago, Burlington & Quincy Railroad, which will introduce the train on its lines.

O. G. Hageman, Burlington agent in Indianapolis, said that the exact date of the visit to Indianapolis has not yet been fixed, but that it will be brought here soon from Philadelphia.

The train is a three-car articulated unit, powered with a 600-horse power Diesel motor. It is a product of the E. C. Budd Manufacturing Company, Philadelphia.

Great Britain imported more dairy products in 1932 than any other country.
