

RECORD NAVAL CONSTRUCTION U. S. PROGRAM

Tense Far East Situation
Prompts Building to
1922 Treaty.

By United Press
WASHINGTON, Jan. 25.—Relations of the United States with Japan were brought to the fore today after passage by the house of the naval appropriation bill which paved the way for the greatest peace time naval construction program in American history.

This bill, carrying an appropriation of \$284,747,244, provides for bringing the United States navy to full treaty strength, to serve as a spring board for negotiations which will take place in 1935 when the next naval limitation conference is called to discuss revision of the Washington naval treaty of 1922.

The Vinson bill, providing for construction of 101 additional ships between now and 1939 which was to have been tacked on to the appropriation bill as a rider, was not brought up, but Representative Fred N. Vinson (Dem., Ky.), chairman of the house naval affairs committee, served notice that he will bring the measure up for passage later. It was understood to have administration support.

Japanese Increase Opposed

The explosive situation in the far east and Japan's desire for a larger navy than the 5-5-3 ratio provided in the Washington treaty, were important factors behind the huge construction program.

American naval officials oppose any increase in Japanese naval strength, and the spurt in American naval construction is generally considered as an effort to give this country a navy of near-treaty strength by the time the treaty expires.

This would place the United States in a favorable bargaining position for the forthcoming conference. It also would place the United States in position to compete in any naval building race which might ensue if the Washington treaty is scrapped and a general naval race starts.

22 Vessels Building

The United States now has building twenty-two vessels under its regular naval construction program, and an additional thirty-two vessels authorized under the program made possible out of public works funds.

The appropriation bill passed yesterday provides \$1,600,000 with which to start construction on one additional eight-inch gun cruiser and three six-inch gun cruisers. This construction would bring the American navy practically to treaty strength.

The Vinson bill would provide ten replacement vessels, principally destroyers and submarines, the majority of which are obsolete or rapidly approaching that condition.

Program Considered Necessary
The present building program is considered by administration leaders here as absolutely necessary to

TERPSICHOREAN

Miss Ruth Hendricks

A solo toe dance by Miss Ruth Hendricks, 29 South Addison street, will feature the program to be given by the Order of De Molay at the Scottish Rite cathedral Feb. 9. The program will include several other dances from the Lipp school. The De Molays will hold a dance following the program.

DRY AGENT ON TRIAL

Officer Accused of Slaying Youth for Four Ounces of Wine.

By United Press
DENVER, Col., Jan. 25.—The question of whether Henry Diers, 45, former federal prohibition agent, is guilty of murdering Melford Smith, 19, two years ago, in seizing four ounces of wine, probably will be in the hands of a jury in United States District court here today. He pleaded not guilty.

The explosive situation in the far east and Japan's desire for a larger navy than the 5-5-3 ratio provided in the Washington treaty, were important factors behind the huge construction program.

American naval officials oppose any increase in Japanese naval strength, and the spurt in American naval construction is generally considered as an effort to give this country a navy of near-treaty strength by the time the treaty expires.

"I keep fit-

in these days

of recovery —

"—if I don't someone else will have my job"

HOW? Well, I learned years ago that work . . . wear and tear . . . takes something out of men and women—particularly those who work indoors.

Good food and fresh air at night are most valuable, but I found that the so-called simple tired feeling—let down' some call it—comes from overtaxing one's strength.

"I tore down those precious red-blood-cells faster than my good body could rebuild. A friend told me the story of that grand medicine S.S.S. Now at 4 P. M. I am fit to still 'carry on'."

One of the really sad things in life is the pushing aside or "shelving" of the weak . . . someone is always ready for your job. Why not reason sensibly that when you begin to "let-down" then it is time . . . before it is too late . . . to build back your vitality?

Of course, if you suspect an organic trouble, consult a physician or surgeon. But if you feel weak . . . lack a keen appetite . . . or if your skin is pale . . . try S.S.S. as a part of your regular daily diet. Take it just before meals. Unless your case is exceptional, you should soon notice a pick-up in your appetite . . . your color and skin should improve with increased strength and energy.

S.S.S. is not just a so-called tonic but a tonic specially designed to stimulate gastric secretions, and also having the mineral elements so very, very necessary in rebuilding the oxygen-carrying hemoglobin of the blood to enable you to "carry on" without exhaustion as you should naturally.

If your condition suggests a tonic of this kind, we recommend S.S.S. because its value has been proven by generations, as well as by modern scientific appraisal.

S.S.S. is truly a blood and body tonic. It is sold by all drug stores in two convenient sizes . . . the larger is more economical.

There is no substitute for S.S.S.

Secure S.S.S. from your own druggist . . . with few exceptions drugists are ethical and conscientious, and will not suggest a substitute. No medicine has the same formula as this time-tested Blood Tonic . . . nor does any other concern gather the same roots with their own trained collectors and extract the active medicinal principles, unchanged, in their original fresh state—this is the secret of S.S.S. . . . there is no substitute. Thousands of people have a low red-blood-cell count and don't recognize it. S.S.S. is useful in promoting a keen appetite and restoring deficient red-blood-cells and their hemoglobin content which are so necessary for sound health.
