FLYING

With MAJ. AL WILLIAMS
Chief of Air Service
Script-Howard Junior Aviator

It is generally conceded that the British have obtained more real benefit from their intensive efforts in Schneider Cup racing than any other nation. Both England and Italy are far ahead of any other country when it comes down to producing fast planes.

The drive for speed in both countries has influenced the development of their fighting airplanes. . . . and the modern 250-mile-an-hour British fighter is modeled on the same trim lines as their racing planes. This is nothing new in the Royal Air Force, as a matter of fact, the latest British ships have a comfortable edge on 250 miles an hour. This speed is looked upon as an ordinary development, as is evidenced by the selling of whole squadrons of British ships to Holland, Belgium, Spain, Norway and Sweden.

The results of this concentrated drive for speed has made itself felt in every quarter of the world, in every fighting air service and in every department of aircraft design. Engineers have delved deeply into the field of reduced air resistance, streamlined shapes and lightweight construction. They have stripped racing planes of every unnecessary ounce of weight and have still maintained the factors of safety.

In spite of all these marvelous accomplishments, the real aeronautical experts of the world admit that only the surface has been scratched. However, the effects of these developments have been felt throughout the world and have influenced aeronautical engineers of every country.

You see, when an engineer knows how to build a superior racing engine he can readily tune that engine down in power development and put back a little weight into the structure for purposes of addition.

WASHINGTON, Oct. 24.—The Administration today poured employment money into states at the rate of more than \$8,000,000 an hour as the \$4,000,000,000 work-relief program entered the final week before its Nov. 1 deadline.

SKINNY, WEAK NERVOUS, RUNDOWN?

Science Says Feed Iodine Starved Glands to Add 5 Lbs. in 1 Week—Gain New Strength & Energy!

THIS TINY HIDDEN WEIGHT AND STRENGTH BUILDING GLAND NEEDS A REGULAR RATION OF IODINE OR YOU STAY WEAK AND SKINNY!

As the result of tests covering thousands of weakened, run-down, nervous, skinny folks, science now claims that it is GLANDS STARVING FOR IODINE that keep you pale, tired-out, underweight and ailing. When these glands don't work properly, all the food in the world can't help you. It just isn't turned into "new strength" but, new strength and energy.

The most important gland—the one which actually controls body weight—needs a definite ration of iodine all the time—NATURAL AS-SIMILABLE IODINE—must be combined with chemical iodides which often prove toxic. Only when the system gets an adequate supply of iodine can you regulate metabolism—the body's process of converting digested food into rich, red blood and cell tissue.

To get this vital mineral in convenient, concentrated and assimilable form, take Kelpamalt, now recognized as the world's richest source of this precious substance. It contains 1,300 times more iodine than oysters, once considered the best source. 4 tablets alone contain more NATURAL IODINE than 485 lbs. of spinach or 1,387 lbs. of lettuce.

Try Kelpamalt for a single week and notice the difference. See flatterings extra pounds appear in place of scrawny hollows. At once you get a splendid appetite, night-long sleep, you will feel better, and have new strength and energy. If you don't gain at least 5 lbs. in one week the trial is free. 100 jumbo tablets are 4 to 5 times the size of ordinary tablets and cost but a few cents a day to use. Try it today. Sold at all Hook's Dependable Drug Stores.
