FARMER-LABOR GROUP SURVEY WORLD OUTLOOK

War Nearness Outstanding Impression of Year, Says Director.

Advance toward catastrophe with the imminence of war in Europe is the outstanding impression in the 1935 political picture, said Howard Y. Williams, executive director of the Farmer-Labor Political Federation, in a survey released today.

At home, President Roosevelt has lost popularity by trying to carry water on both shoulders until now he is attacked by both business and liberal groups, Mr. Williams said.

Internationally, the outlook is dark, with Europe in despair over the Italian-Ethiopian struggle and the greatest armament race in history under way, he said, adding that the League of Nations seems to have come to an impasse and Japan is pushing its imperialistic policies in China.

These Are Bright Spots
At home the bright spots include the pickup in business conditions, the improvement of farm incomes through the AAA, the beginning of a great social security program, the passage of neutrality legislation and the success of progressive political movements in many states, Mr. Williams said.

On the negative side of the ledger are the 12,000,000 idle workers, increase in child labor, the rift in the ranks of organized labor, increase in automobile deaths and growth of Fascist tendencies as expressed by passage of legislation requiring teachers' oaths of loyalty, the survey pointed out.

On the credit side abroad is the progress of the British Labor Party, the freedom the Philippines, the new high levels of economic progress reached by Russia and the debacle of the Hoare Laval program for partitioning Ethiopia, Mr. Williams concluded.
