MEMBER DRIVE BEGUN BY U. S. DAY NURSERY

Demands on Organization Are Increasing, Officer Says.

The National Federation of Day Nurseries has started a drive for new members, the local affiliate, the Day Nursery Association, 3612 E. Washington-st., announced today.

In announcing the drive, Mrs. M. J. Spencer, local president, pointed out that demands upon the day nurseries have increased greatly during the last few years.

Economic difficulties, she said, have forced many mothers to seek employment in order to aid in the support of their families. Their children are cared for by the day nurseries while they are at work.

PURDUE SURVEY FORECASTS HIKE IN STATE CROPS

11 Per Cent Gain Indicated
Due to Invalidation of
AAA Control.

Times Special
LAFAYETTE, Ind., March 24.—With the controlled-crop program of the AAA invalidated, Indiana farmers are making plans to increase acreage planting approximately 11 per cent this year, a survey by the Purdue University agricultural division indicated today. The survey revealed that Hoosier farmers expect to plant approximately 4,280,000 acres of corn, nearly 250,000 acres more than last year, officials said.

During the five-year period between 1928 and the end of 1932, the average corn acreage in Indiana was 4,546,000, but in 1934 it dropped to 3,883,999 and last year was 4,038,000.

The "intentions-to-plant" survey also showed approximately 1,470,000 acres of oats will be sown. Soybean acreage is expected to decrease from 720,000 to 640,000 acres. Tame hay acreage is expected to increase from 1,750,000 to 1,800,000.

Barley acreage is expected to increase from 26,000 to 35,000; tobacco from 8200 to 10,100, but potatoes probably will decrease from 66,000 to 61,000 acres.

**THIS
INJECTOR**

contains the blades...sealed in a bath of oil! Schick blades are actually twice as thick as most blades...able to take a sharper edge—and hold it. They are individually honed, stropped and inspected.

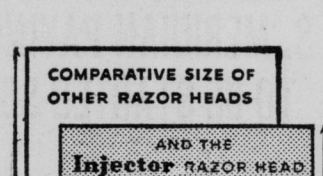

LOADS LIKE AN AUTOMATIC!

When a fresh blade is needed, you insert Injector into razor head...it shoots out the old blade, shoots in a new one...in a split second! Blade edge is never touched until it hits your whiskers. No unwrapping, twisting, screwing or reassembling.

**THIS IS THE WAY
THE GUIDE BAR**

runs ahead of the blade, smoothing and flattening the skin...not grooving it as combing "teeth" edges do. Stretches skin taut, just before blade touches it—prevents nicks and scrapes.

TRI-FI, COMPACT HEAD... half the bulk of other razor heads, yet shaves as wide an area. Gets right into those hard-to-shave spots!

IT'S LUCKY YOU LIVE IN INDIANAPOLIS!
