

## LOYALTY, ILLS OF WORLD ARE SERMON TOPICS

Bishop Francis, Rev. Trinkle  
Speak at Noonday  
Services.

"Loyal or Disloyal," was the subject of sermon by Bishop Joseph Marshall Francis, of the Indianapolis Episcopal diocese, today at the noon services in Christ Church.

Using as his text Luke 22:3-4, concerning the betrayal of Christ by Judas, Bishop Francis said:

"No one is more despised than a traitor. The name Judas has become a synonym for the expression of our feelings of disgust and abhorrence with disloyalty. Christ called Judas as He did the other disciples. He entrusted him with the common purse of his intimate followers. He admitted him into the closest fellowship that existed between Him and His chosen companion."

"And for all this, Judas betrayed his Master and friend. He was not wholly bad. In fact no one is. Christ saw in him something that was capable of high development. But Judas had a besetting sin, avarice."

Service at English's

Noonday services also were conducted at English's Theater, where the Rev. O. A. Trinkle, pastor of Englewood Christian Church, used as his text "The Remedy for a Bewildered World."

In his sermon the Rev. Trinkle said, "We are celebrating the events of the last days of our Lord preceding His death. While 1900 years removed in time, yet those events have a potency for life today."

"Jesus looked upon a bewildered world, a world that was lost in a very real sense."

World Still Bewildered

"Today we are living in a bewildered world. Men and women are trying every panacea for our ills. The world is unsettled and just as unstable. The peace of the world is in jeopardy. With all the talk of social security human society is still insecure."

"Man has tried salvation by his own efforts. Education, culture, environment, refinement and social prestige have not saved us. The Gospel of our Lord Jesus Christ is the only thing that will."

CLASSICAL HONORARY  
SORORITY INITIATES 13

Indianapolis Girl Among Latin and  
Greek Students Elected.

Times Special  
BLOOMINGTON, April 8.—Names of 13 Indiana University co-eds initiated into Eta Sigma Phi, classical honorary sorority for Latin and Greek students, were announced here today.

The group included Misses Frances McCallan, Indianapolis; Mary Eunice Hodges, Martinsville; Frances Harding, Ellettsville; Frances Howe and Pauline Sever, Waldron; Waneta Helms, Centerville; Louise Rich, Edwardsport, and Mary Eleanor Schell, Bloomington.

STATE TAX BOARD SUED

Telephone Corporation Seeks Injunction Against Body.

Suit for a declaratory judgment and injunction against the State Board of Tax Commissioners, Public Service Commission and the State Department of the Treasury is on file today in Superior Court.

The action brought by the Indiana Associated Telephone Corp. alleges that the state is attempting to collect illegally \$7500 in intangibles tax on a \$3,000,000 bond issue sold by the corporation and that the state is not entitled to collect the tax.

HEARST OPENS ATTACK

Charges 'Secretive' Methods to  
Lobby Probers in Suit.

WASHINGTON, April 8.—Attorneys for William Randolph Hearst charged in the District of Columbia Supreme Court today that the Senate lobby committee proceeded in "stealthy and secretive ways" to seize private messages and papers of hundreds of citizens.

### Back Yard Gardening

## Proper Attention and Correct Food Will Produce Thriving, Lovely Lawn

This is the third of six articles on decorative gardening, in line with the preceding series on vegetable gardening.

BY PROF. H. R. COX

Extension Service Agronomist, New Jersey College of Agriculture and Experiment Station, Rutgers University.

UNLESS your ground is excavated soil or subsoil, it should, with care, support a thriving lawn.

Plant systems sicken on a too acid soil, and if lime has not been applied for some years, soil acidity may be at the bottom of your lawn troubles. Application of from 25 to 50 pounds of a liming material to 1000 square feet of lawn once every four years is good practice. Such application, even made, should correct unfavorable soil condition.

Early spring and late summer applications of fertilizer assure a plentiful supply of plant food. A mixed or complete fertilizer having a 6-6-5, 5-10-5, or 5-8-7 analysis, when applied evenly and at the rate of 15 to 20 pounds to 1000 square feet, should make an average lawn good and a good lawn better.

IF the sod has a fair stand of the desirable lawn grasses and clovers, there is no need for reseeding. With proper lime and fertilizer treatment and with proper mowing and watering during the growing season, the grass should thicken and eventually produce a solid turf.

However, it is well to reseed any bare patches in a lawn. Loosening the soil with a grub hoe, breaking up the clods and then raking the surface, will produce a firm and fine seedbed. Scatter the seed, rake in very lightly, and then roll or tamp to make firm the surface.

Sometimes the cultivated grasses are so thin that general resowing is desirable. The simplest procedure then is to scatter the seed, rake the surface lightly with a fine-toothed garden rake, and roll.

Better results usually may be had, however, by first scattering a top dressing of good soil to a depth of a quarter inch, and then working it down by raking or by dragging a metal doormat or similar tool over the surface.

On this excellent seedbed, grass seed is then sown, raked in lightly, and rolled. While the young seedlings are becoming established, water them lightly during dry periods with a fine, mist-like spray.

"FERTILIZING and reseeding are

done to best advantage in very early spring, about the time the lawn starts turning green. Late spring fertilizing is apt to stimulate crabgrass and other lawn weeds more than it does the cultivated grasses.

Postpone the first spring mowing until the grass is at least two inches long, to stimulate vigorous root growth. After that the lawn may be mowed as frequently as desired, provided the height of cut is one inch or longer.

During dry periods you need not water often, but do it thoroughly. An occasional thorough soaking of the soil to a depth of three or four inches will tend to make the grass roots grow deeply.

NEXT—Foundation planting.

BACK HOME AGAIN

Stolen automobiles recovered by police before:

Driver, Britt, 1162 English-av., Dodge truck, found at 1200 Spann-av.

Thirtieth and Central-Sales Co., Chevrolet roaster, found at 509 Patterson-av.

J. L. Slutsky, 401 Harvard-st., Chevrolet coach, found at 100 N. Talbot-av.

Robert McRobert, Graham Hotel, Bloomington, Ind., Chevrolet coupe, found at Noblesville, Ind.

Cell T. Rice, 53 N. Anderson-nd, Pleasanton, Ind., Run-bld.
