

NEW HEARINGS TO BE HELD ON TROLLEY OFFER

Loop Location, Rental Rate
Subjects for Further
Debate.

A special hearing has been called in the Indianapolis Railways proposal for a downtown loop involving Pennsylvania, 37th-st and Penway, for Wednesday by the Works Board.

A hearing began yesterday before the board over the rental to be paid by the company for streets used by trackless trolleys was continued until a week from tomorrow.

Next Wednesday, the board is to hear the case of residents affected by the proposed loop. Residents oppose its establishment on the ground that it would prove detrimental to their properties.

Charles W. Chase, railway company president, withdrew a clause in a proposed contract providing for a similar loop affecting Pennsylvania, Delaware, 56th and 57th-sts, but wishes to construct the one closer to the center of the city.

Demand \$500 Per Mile

Mr. Chase read the company's proposal before the board yesterday in the presence of a committee representing the Federation of Community Civic Clubs headed by John F. White, state legislator. The committee opposed acceptance of the contract by contending that the \$275-a-mile-a-year rental was insufficient to maintain the streets. Members of the committee said that the rental should be \$500 a year for each mile of street used by the trolleys.

Mr. White also objected to a graduated system of making semi-annual payments as proffered by the company, which provides that the city is to receive \$137 a mile the first year up to \$380 a mile for the seventh year, after which all payments are to be \$275 a mile a year. Another objection to the proposal was that approximately four miles of streets on which both street cars and trackless trolleys operate were not provided for in the contract.

In asking the board to accept the company's proposal, Mr. Chase declared that the firm was "just as close to the financial buzz-saw now as it was three years ago," and expected to be in the same position for the next five to seven years because of expenditures for new equipment, payments required on a PWA loan and increases in wages and operation costs.

According to Mr. Chase, the company is to spend \$7,000,000 of an \$11,845,000 investment in the system by the close of the year. He also declared that the earnings of the company for 1935 totaled 4.87 per cent, as compared with 8 per cent earnings of systems in other cities.

VETERANS OF FUTURE WARS SEEK MEMBERS

Ball State Students Invited to Join New Organization.

Times Special
MUNCIE, Ind., April 9.—Ball State Teachers' College students today were considering an invitation to join in the Veterans of Future Wars. The invitation was tendered by Louis J. Gorin Jr., national commander.

Members of the organization, who consider themselves future war participants, demand immediate payment of the bonus plus 3 per cent interest compounded annually from June 1, 1934, to June 1, 1985.

Conceived at Princeton University, the organization has established chapters at more than 60 colleges and universities, according to Gorin, who denies that any satire or disrespect is intended by the group.

STATE SHIPPERS BACK BILL, PETTENGILL SAYS

Congressman Lists 10 Firms Supporting Measure.

Times Special
WASHINGTON, April 9.—Ten shipper organizations from Indiana were listed by Rep. Samuel B. Pettengill as supporting his bill for repeal of the long and short-haul clause of the railroad act.

The bill passed the House and awaits action by the Senate.

It will permit railroads to charge less for a long haul than a short one, with permission from the Interstate Commerce Commission, and thus compete with water and truck lines, Mr. Pettengill says.

RULING ON BOND ISSUE WAITED AT NEWCASTLE

\$5000 Needed to Equip Proposed Guard Armory.

Times Special
NEWCASTLE, Ind., April 9.—City officials today awaited a ruling from the State Tax Board on a proposed \$5,000 bond issue to raise funds for equipment of the National Guard Armory here.

Construction of the Armory virtually is assured with adoption by the City Council, under suspended rules, of an ordinance authorizing deeding of a site in Murphey Park.

Blessed Relief From Nerves for Women Over 40

When a woman passes the 40-year mark, great physical changes begin. These are often so pronounced that her nervous system is completely upset, bringing on frequent attacks of nerves, worry, sleeplessness, emotional upsets, irritability and needless fear. Some women become so high-strung and so completely upset that they often turn to their doctor friend or closest relative, usually about nothing at all. Many such women can obtain marvelous relief with TREMS. You simply take one TREM tablet and drink glass full of water. By relieving the capillary pressure on thousands of tiny nerve ends throughout the body, TREMS relax you completely so that the blues and tension are chased right out of your system and you can forget about that jumpy, nervous, upsetting feeling. Don't suffer another hour with clonic nerves!

Back Yard Gardening Foundation Plantings, Used to Hide Sharp Angles, Add to Home's Beauty

This is the fourth of six articles on decorative gardening, in line with the preceding series on vegetable gardening.

By DR. C. H. CONNORS
Head, Department of Ornamental Horticulture, New Jersey College of Agriculture and Experiment Station, Rutgers University.

FOUNDATION plantings, which should be used for definite reasons, add to the attractiveness of any home. They are used to hide the sharp angles at the corners of buildings, to disguise the angle formed where the house and the land join, to hide unsightly foundations, to frame entrances.

The foundation, however, should not be completely screened, but should show through the planting in spots, so that the house may seem to be resting upon solid ground rather than on a cushion of shrubs.

First step in getting the best effect is selection of plants suitable to architecture of the house. If the building is relatively low, with mainly horizontal lines, as is the case with most buildings of the mission type or of colonial influence, then rounded masses are appropriate.

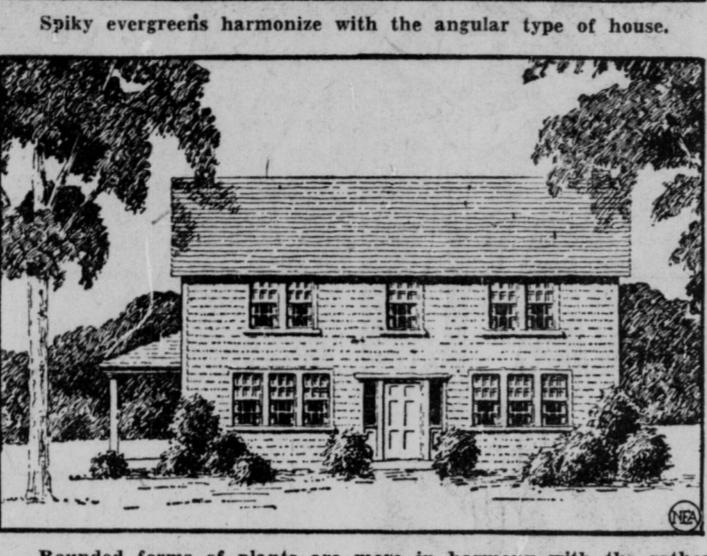

Buildings of the Norman or Queen Ann cottage type, with mainly vertical lines or sharp-pointed roofs and dormers, are best set off by the more upright and spiky forms of plants.

MANY home owners do not like evergreen plants for foundation plantings, because they are always the same green year in and year out. The so-called broad-leaved evergreens, such as rhododendrons and azaleas, are in season relieved by flowers. Deciduous shrubs show almost daily variation in color or form.

For the low type of building, most of the deciduous shrubs are suitable. Among the evergreens, the preferable types are rhododendrons, azaleas, leucothoe, pieris, boxwood, and similar plants for northern conditions, and certain of the azaleas and rhododendrons, evergreen privet and Pittosporum for the south.

A VERY few coniferous evergreens are suitable for such planting, among them Pfister's juniper, the yew and a few rounded forms of arbor vitae and retinosa.

For the sharp-pointed or vertical type of building many of the coniferous evergreens are suitable, but care must be exercised not to choose those which are really forest trees

Spiky evergreens harmonize with the angular type of house.

and which in a few years will out-grow the location.

NEXT—How to control plant diseases.

**RAY FOX IS ELECTED
I. U. UNION LEADER**

Indiana Student Governing Board

Plans Installation.

BLOOMINGTON, April 9.—Ray

Fox, Jeffersonville, is to be installed May 7 as president of the Indiana Union, student governing board at Indiana University. He is to succeed Milton J. Fineberg, Indianapolis.

Other newly elected officers are Vernon Huffman, Newcastle, vice president and Edwin Hain, Markleville, secretary.

Going to Convention

Times Special

GREENCASTLE, Ind., April 9.—

Prof. Dade B. Shearer, De Pauw

University instructor and vice president of the Midwest Classical Association, is to leave tonight for Cleveland, O., where he is to attend the organization's annual meeting.

Want to Look Young?

The secret of keeping young—to feel young—to do this you must get at the cause—there's no need of having a sallow complexion—dark rings under your eyes—pimples—a bilious look in your face—dull eyes with no sparkle. Your doctor will tell you 90 per cent of all sickness comes from inactive bowels.

Dr. Edwards, a well-known physician in Ohio, perfected a vegetable compound as a substitute for calomel to act on the intestines, which he gave to his patients for years.

Dr. Edwards' Olive Tablets are gentle in their action yet always effective. They help bring about that natural buoyancy which all should enjoy by clearing the system of impurities.

Dr. Edwards' Olive Tablets are known by their olive color. 15c, 30c, 60c.—Advertisement.

WOMAN TO ACT AS LAKE WELFARE HEAD

Guardian's Board Secretary
in Office Until June.

Times Special
HAMMOND, Ind., April 9.—Miss Dorothy Nierengarten, secretary of

Lake County Board of Children's Guardians, is to act as director of the county welfare board until June 1, when Russell Ballard, Riley Elementary School principal, Indiana Harbor, is to take over duties of the office.

Mr. Ballard recently was granted a year's leave of absence by the East Chicago Board of Education in order that he can serve as director at a salary of \$4000 a year.

Other officers of the welfare board are Frank O'Rourke, Ham-

mond, president, and Miss Grace Conroy, Hammond, vice president.

MOISTURE CONTROL

The most important single attribute of cigarettes, other than the tobacco itself, is moisture content. To its influence we owe the ability to make uniform cigarettes, to control combustion, and to govern quality of smoke. Excessive moisture interferes with proper combustion, and makes cigarette smoke unpalatable. Insufficient moisture permits dry, dusty cigarette smoke to impinge upon the delicate mucous membrane of the smoker.

LUCKIES ARE LESS ACID!
Recent chemical tests show* that other popular brands have an excess of acidity over Lucky Strike of from 53% to 100%.

*RESULTS VERIFIED BY INDEPENDENT CHEMICAL LABORATORIES AND RESEARCH GROUPS
