It is made of navy blue rubberized fabric, the coat closing with a covered slide fastener and the trousers upheld by an elastic waistband. The whole suit is extremely light weight, folding compactly into a small envelope in the same fabric.

Latest Fashions From Local Shops

LET'S suppose the worst. Johnny's commencement is just over. . . your fur coats are still to be stored. . . the country place in dire need of attention and you haven't had a minute to shop for clothes that is to take you on that momentous trip you've been planning!

You might well be in the arms of dilemma, with your yawning suit cases, if we didn't have a fact that within a few minutes notice you could find practically anything under the sun, for the sun, here in local shops.

Pause a brief moment and look over this suggested going-away outfit. It has high place for train and plane traveling. It is a revelation for wear when walking gangplanks and is precisely correct for motoring. The knobby string knit two-piece sweater suit is topped by a gallant swag coat. The dress takes its color from the oyster and fastens a twisted belt of lettuce green and British tan about the waist and buttons itself up the front with matching brown buttons.

THE zebra striped coat of brown and oyster white goes country squire with its brown velvet collar, cases, and is far too tasteful to be thrown to the lions!

Wearable suits of this type were seen aboard the Queen Mary when she docked in New York and British tan appeared to be in high favor with English and Americans alike because of its adaptability in accessories.

Good to Eat

SOME people think a soufflé is a difficult thing to prepare. But it's really not at all. The trick is to have the oven just the right temperature and to serve the dish very soon after it comes from the oven. If you wait too long to serve it, you can just bet it will fall.

This recipe for a chicken soufflé is perfectly fine, accurate and not expensive as most chicken soufflé recipes are.

CHICKEN SOUFFLE FOR 4

1 1/2 cups diced cooked chicken
3 eggs
1 teaspoon chopped parsley
2 cups milk
3 tablespoons butter
4 tablespoons flour
1-3/4 teaspoon salt
1/4 teaspoon paprika
1/4 teaspoon celery salt
1 tablespoon chopped pimiento

This makes a puffy soufflé that will be brown and crisp on top and yet has plenty of body.

Directions: Melt the butter and add the flour and when thoroughly blended add the milk slowly until creamy.

Stir and add seasonings and beaten egg yolks. Beat well.

Fold in the remaining ingredients adding the stiffly beaten whites last.

Pour into a well-buttered casserole, or ring mold and bake in a moderately slow (325) oven, setting the dish in a pan of hot water. Bake about 35 minutes or less.

You can tell when it's done. It will be firm and brown on top.

Let the soufflé stand for four minutes in the pan of hot water after removing the entire dish from the oven, then unmold carefully or if you wish serve it directly from the casserole. The idea of letting it stand for four minutes in the pan of hot water is to avoid its cooling too rapidly and falling.

I served this soufflé with rice and green peas and it made a delicious dinner.

The soufflé will be creamy inside.

Training Child to Look Beyond Pleasures Stressed by Writer

BY OLIVE ROBERTS BARTON

WHY isn't Julie home and dressed for the evening? I saw her in Jones' back yard just now, sitting on a fence and as dirty as sin.

"Keep your coat on, Charles. She's coming. I sent Sophy over and she says they are just finishing a Wild West Show."

"It's nearly 6 o'clock. And Julie's getting to be too much of a tomboy anyway. I like my women folk dressed when I get home."

"Well, you know I do have a rule, Charles. She supposed to be bathed and dressed by 5 every afternoon. Only sometimes they all get so interested in a game it seems a shame to break it up."

Charles snapped open the paper and looked over the headlines.

But he wasn't through talking. Julie had not come, and across the lawn he could hear war whoops that bore no resemblance to farewells.

"I'll go and get her," said Jessie. "No, don't. It isn't just this once, or not being dressed time after time that I mind so much. But I've noticed her right along. She stays at the movies for two shows almost every time she goes. When she's been to a party I have to go and drag her out of the kitchen after everybody else has left. At the park pool, when the other children are getting dressed I have to fairly rope her out of the water."

"Well, grumpy, what's wrong with that? She has a zest for living and she likes people. I think it shows good quality. Julie goes into everything with all her heart and she's very popular."

"I know all that. And I'm not criticizing, just trying to explain something. I think she loses herself too much in everything she does, which was all right when she was little. But sometime she has to be taught to control time and to think ahead. Every one of us has to say deep in his mind, 'I'm enjoying this, what comes next? Is it time for lunch, or dinner, or to see somebody about something?'"

"She'll learn that."

"No, she won't. She isn't the kind. When she is having a good time she becomes intemperate. She loves a double orgy of sensation. She forgets there is a world outside of what she's doing. She is the oldest in that crowd today. So it's up to her to jump off the fence and say, 'Good-by, kids. I have to go home. It's late.'"

Julie had to be pried loose, as she made no move to come home. Her father was right about her. Nearly all children lack awareness of something ahead; some lack it altogether. It is excellent training in control to tell them that nothing can last forever. It is one phase of "responsibility" that is very important.
