Maples are injured most with elms second, Mr. Rippey reported. Asked if early leaf shedding was a sign of a hard winter or an early spring, he said it was neither, but that it was a sign of a dry summer.

RECEIVERS FOR TWO LOCAL FIRMS ASKED

Woman Alleges They Have Not Paid Taxes.

Two suits on file in Marion County Superior Court today asked appointment of receivers for the Puritan Securities Co. and the Puritan Home Funding Co.

The suits were filed by Mrs. Bertha March, who stated in the complaints that she owns preferred stock in both companies. The suits charge that both companies are in arrears in payment of taxes and that there is "little possibility that the companies will pay out the stock when it matures."

In asking appointment of a receiver for the securities company, the complaint asked the receiver be appointed "with proper recognition of the rights of the Peoples State Bank of Indianapolis as trustee."

Stock of the Puritan Securities Co. matures Feb. 15, 1937. That of the Puritan Home Funding Co. matures Aug. 1, 1937.

The first company has an outstanding capitalization of \$150,000 and the second \$225,000. Neither has paid dividends for some time, in the complaints alleged. Both companies deal in real estate.

THIS CURIOUS WORLD

By William Ferguson

"BODE'S LAW"

THE RELATIVE DISTANCES OF THE PLANETS FROM THE SUN FOLLOW A CURIOUS RULE KNOWN AS "BODE'S LAW," STARTING WITH THE NUMBERS 0, 3, 6, 12, 24, ETC., DOUBLING EACH TIME, THEN ADDING THE NUMBER 4 TO EACH, WE COME REMARKABLY CLOSE TO THE SCALE OF DISTANCES FOR ALL THE PLANETS EXCEPTING NEPTUNE AND PLUTO.

MERCURY	0 + 4 = 4	ACTUAL DISTANCE 4
VENUS	3 + 4 = 7	" 7
EARTH	6 + 4 = 10	" 10
MARS	12 + 4 = 16	" 16
ASTEROIDS	24 + 4 = 28	" 20 TO 40
JUPITER	48 + 4 = 52	" 52
SATURN	96 + 4 = 100	" 95
URANUS	192 + 4 = 196	" 192
NEPTUNE	384 + 4 = 388	" 301
PLUTO	768 + 4 = 772	" 396

BUT NO ONE HAS BEEN ABLE TO GIVE A REASON FOR THE LAW.

BODE'S LAW is one of the mysteries of astronomy. Using the number 10 to represent the distance of the earth from the sun, Bode's Law shows Mercury to be 4, Venus 7, etc. At the time the law was discovered, a large gap existed between the planets Mars and Jupiter, and since the series of figures showed that a planet should be in this area, astronomers went to work and discovered the asteroid group occupying the space.

State Woman Writes, Prints Binds, Sells Her Own Poems

Nashville Artist Publishes Collection, Doing all the Work in Hoosier Shop.

Nelle Merrill, Indiana artist, was in Indianapolis today, prepared to market copies of her "one-woman" publishing enterprise, a book of poems entitled "Gold Millage."

Type-setter, engraver, printer, binder and saleswoman, Miss Merrill decided in 1932 that a collection of poems she had written were suitable for publication.

She dropped work at her art studio in Nashville, Ind., and went to the publisher of a newspaper there. He offered to teach her the art of printing if she worked in his shop for three months. She accepted.

In September, she started setting the type by hand and printing her book. She finished in March, completing her task by binding the book. She included in it four copper engravings, one a self-portrait, all of which she made herself. The book contained 61 poems.

She published about 200 copies and has sold most of them, she said today.

The book of poems was accepted by a Boston publishing house, which now is issuing a separate edition. Miss Merrill was granted the right to market the remaining copies of her "one-woman" first edition.

She also has written several lyrics and set the music to them. "My Little Cabin in the Hills," she has published.

LEWIS STRIVES TO HALT SPLIT IN FEDERATION

Consults Aids on Limiting Organizing Scope to Please A. F. of L.

By United Press

WASHINGTON, July 18.—Leaders of organized labor moved slowly today toward some efforts at reconciliation within its own ranks as John L. Lewis considered possible basis for formal treaty with the American Federation of Labor.

In an attempt to circumvent execution of what is considered to be inevitable suspension by the federation's executive council, should the matter be brought to a vote Aug. 3, conferences were held privately among chiefs of Mr. Lewis's "rebel" unions at the headquarters of his committee for industrial organization.

The C. I. O. chairman discussed with Thomas Kennedy, lieutenant Governor of Pennsylvania and official of the United Mine Workers, Mr. Lewis's own union, yesterday a possible schedule of industries in which the C. I. O. would assert its industrial right to organize industrial unions.

William Green, federation president, said today he still would insist on disbanding of the committee. He declined to express an opinion on a state of industries in which workers would be allowed to unionize along vertical lines.
