

## MILK INCREASE PROTEST FILED BY ASSOCIATION

Action Branded 'Unfair' by Restaurant Group.

The Indiana State Restaurant Association, Inc., today formally protested the recent milk price rise to the State Milk Control Board, the Marion County milk administrator and the attorney general.

It charged that prices to restaurants and consumers were raised without "due notice or hearing," that it is manifestly unfair and illegal to set up such control over prices in a board composed entirely of persons who will profit by their own decisions, with no consumer representation.

It also charged "that the rules of the board and prices fixed by it have actually worked to defeat the intention of the act as stated in Section 1—'protection of public health and prevention of demoralizing trade practices.'"

"This is evidenced by admission of the board members that consumption had declined and that some unscrupulous persons, in order to maintain profits, are serving bulk milk rebottled, that cream has been reduced in strength by addition of whole milk, and many other devices have been resorted to, all of which are directly opposed to 'protection of public health and prevention of demoralizing trade practices.'"

THERE IS A STAR, KNOWN ONLY AS "A.C.+70° 8247," THAT IS COMPOSED OF MATERIAL SO HEAVY THAT A SMALL PINCH OF IT, IF DROPPED ON A MAN, WOULD CRUSH HIM!

The star referred to above is made up of matter so dense that one cubic inch of it would weigh about 620 tons. It is only a small star, not more than half as large as the earth, and is of the thirtieth magnitude, far too faint to be seen with the naked eye.

## DROUGHT STOCK RECEIVED HERE FOR PASTURING

About 1000 Head of Cattle Have Been Shipped Into State.

About 1000 - cattle have been shipped into Indiana for pasturing from North Dakota drought regions, J. Leonard Axby, state veterinarian, said today.

Requests are received by the veterinarian's office every day for permission to ship cattle here from drought areas, he said.

All North Dakota cattle are kept under strict quarantine to prevent any disease they might have from spreading to Indiana stock, the veterinarian stated. Of the 1000 head, about 600 are feeders which are to be fattened for beef, and the other 400 are breeders which are to be returned to North Dakota when the drought ends.

Most of the cattle are sent by North Dakota farmers to relatives in this state, Mr. Axby said.
