

LANE MARKERS ON STATE ROAD TO BE COLORED

Three Tints for Concrete
Curb Designed as
Safety Feature.

Colored concrete is to be used for the first time in Indiana highway construction on the new dual-lane section of U. S. 40 to be built between Indianapolis and Cumberland, it was announced today.

The colored concrete is to be used on the low, rounded curbing separating east and west bound traffic. Meanwhile Earl Crawford, State Highway Commission chairman, said highway construction employment in Indiana was 39 per cent higher in June than in April. He attributed the increase to the greater number of construction and improvement projects started in June.

Three Colors Used

On the new two-way road east of Indianapolis, engineers designed the low curb to separate the lanes because it was impossible to obtain enough right-of-way to erect a parkway between the 20-foot lanes. The curb, or island, designed to promote safety, is to be four feet wide at the base and two feet wide at the top, rising four inches above the pavement surface. Three colors—white, yellow and natural—are to be used on the sloping sides, and black on the top.

By use of different colors, highway engineers hope to determine which has the greatest visibility under all driving conditions. Tests using pigment in mixing concrete have been conducted by the State Department.

Bids on the project are to be received July 13.

REPORTS ON INCOME DUE, JACKSON WARNS

Clarence A. Jackson, Gross Income Tax Director, today warned against failure to file income reports for the second quarter.

A minimum fine of \$2 may be assessed against delinquent returns, Mr. Jackson said. Persons whose tax totals more than \$10 each quarter must file returns every three months. Others may pay by the year, he said.
